

Compact Smart Laser Sensor E3NC-L

CSM_E3NC-L_DS_E_5_1

Long-distance Variable Spot to Match the Application. Stable Detection with Pinpoint 0.1-mm Spot

- Select from two Sensor Heads to match the application from short distance to long distance.
- Product variations with variable spot and pinpoint spot for stable detection of your workpieces.
- Robot cable for reliable application in adverse environments. Laser Class 1 for safe application.
- White on black display characters for high visibility.
- Smart Tuning to achieve stable detection with easy setup.

For the most recent information on models that have been certified for safety standards, refer to your OMRON website.

 Refer to the *Safety Precautions* on page 8.

Ordering Information

Sensor Heads *(Dimensions → page 10)*

Sensing method	Appearance	Focus	Model
Diffuse-reflective		Variable spot	E3NC-LH02 2M
Limited-reflective		Spot	E3NC-LH01 2M

Amplifier Units *(Dimensions → page 11)*

Connecting method	Appearance	Inputs/outputs	Model	
			NPN output	PNP output
Pre-wired (2 m)		2 outputs + 1 input	E3NC-LA21 2M	E3NC-LA51 2M
Wire-saving Connector		1 output + 1 input	E3NC-LA7	E3NC-LA9
M8 Connector		1 output + 1 input	E3NC-LA24	E3NC-LA54
Connector for Sensor Communications Unit *		---	E3NC-LA0	

*A Sensor Communications Unit is required if you want to use the Amplifier Unit on a network.

Accessories (Sold Separately)

Sensor Head Accessories

Sensor Head Mounting Brackets

A Mounting Bracket is not provided with the Sensor Head. It must be ordered separately as required. (Dimensions → page 13)

Applicable Sensor Head	Appearance	Model	Quantity	Contents
E3NC-LH02		E39-L185	1	Mounting Bracket: 1 Nut plate: 1 Phillips screws (M3×18): 2
E3NC-LH01		E39-L186	1	

Amplifier Unit Accessories

Wire-saving Connectors (Required for models for Wire-saving Connectors.) (Dimensions → page 15)

Connectors are not provided with the Amplifier Unit and must be ordered separately. *Protective stickers are provided.

Type	Appearance	Cable length	No. of conductors	Model
Master Connector		2 m	4	E3X-CN21
Slave Connector			2	E3X-CN22

Sensor I/O Connectors (Required for models for M8 Connectors.) (Dimensions → page 15)

Connectors are not provided with the Fiber Amplifier Unit and must be ordered separately.

Size	Cable	Appearance	Cable type	Model
M8	Standard cable	Straight 	2m	XS3F-M421-402-A
			5m	XS3F-M421-405-A
		L-shaped 	2m	XS3F-M422-402-A
			5m	XS3F-M422-405-A

Amplifier Unit Mounting Bracket (Dimensions → page 16)

A Mounting Bracket is not provided with the Amplifier Unit. It must be ordered separately as required.

Appearance	Model	Quantity
	E39-L143	1

DIN Track

A DIN Track is not provided with the Amplifier Unit. It must be ordered separately as required. (Dimensions → page 16)

Appearance	Type	Model	Quantity
	Shallow type, total length: 1 m	PFP-100N	1
	Shallow type, total length: 0.5m	PFP-50N	
	Deep type, total length: 1 m	PFP-100N2	

End Plate (Dimensions → page 16)

Two End Plates are provided with the Sensor Communications Unit. End Plates are not provided with the Amplifier Unit. They must be ordered separately as required.

Ratings and Specifications

Sensor Heads

Item	Sensing method	Diffuse-reflective	Limited-reflective
	Model	E3NC-LH02	E3NC-LH01
Light source (wavelength)*1		Visible semiconductor laser diode (660 nm), 1.35 mW (average output: 315 μW) (JIS Class 1, IEC/EN Class 1, and FDA Class 1)	
Sensing distance*2	Giga-power mode (GIGA)	1,200 mm	70±15 mm
	Standard mode (Std)	750 mm	
	High-speed mode (HS)	250 mm	
	Super-high-speed mode (SHS)	200 mm	
Spot diameter*3		Approx. 0.8 mm (at distances up to 300 mm)	Approx. 0.1 mm (at distances up to 70 mm)
Differential distance*4		10% of sensing distance	
Indicators		OUT indicator (orange) and STABILITY indicator (green)	
Ambient illumination		Illumination on received light surface: 10,000 lx max. of incandescent light, 20,000 lx max. of sunlight	
Ambient temperature range		Operating: -10 to 55°C; Storage: -25 to 70°C (with no icing or condensation)	
Ambient humidity range		Operating and storage: 35% to 85% (with no condensation)	
Insulation resistance		20 MΩ min. (at 500 VDC)	
Dielectric strength		1,000 VAC at 50/60 Hz for 1 min	
Vibration resistance (destruction)		10 to 55 Hz with a 1.5-mm double amplitude or 100 m/s ² for 2 hours each in X, Y, and Z directions	
Shock resistance (destruction)		500 m/s ² for 3 times each in X, Y, and Z directions	
Degree of protection		IEC IP65 (E3NC-LH02: Applies only when adjuster is locked.)	
Connecting method		Pre-wired connector (standard length: 2 m)	
Materials	Case	Polybutylene terephthalate (PBT)	
	Lens	Methacrylic resin	
	Cable	PVC	
Weight (packed state/Sensor Head only)		Approx. 115 g/approx. 65 g	
Accessories		Instruction Manual	

*1. These Sensors are classified as Class 1 laser devices under IEC 60825-1 and the regulations of Laser Notice No. 50 for FDA certification. CDRH (Center for Devices and Radiological Health) registration has been completed. (Accession Number: 1220690)

*2. The values were measured using the OMRON standard sensing object (white paper).

*3. Defined as 1/e² (13.5%) of the central light intensity at the measurement distance.

The spot diameter is sometimes influenced by the ambient conditions of the workpiece, such as light that leaks from the main beam, if the reflection factor of the area surrounding the workpiece is higher than that of the workpiece.

*4. Measured at the rated sensing distance.

Amplifier Units

Item	Type		Standard models			Model for Sensor Communications Unit
	NPN output	E3NC-LA21	E3NC-LA7	E3NC-LA24	E3NC-LA0	
	PNP output	E3NC-LA51	E3NC-LA9	E3NC-LA54		
Connecting method		Pre-wired	Wire-saving Connector	M8 Connector	Connector for Sensor Communications Unit	
Inputs/outputs	Outputs	2 outputs	1 output		--- *1	
	External inputs	1 input				
Power supply voltage		10 to 30 VDC, including 10% ripple (p-p)				
Power consumption *2		At Power Supply Voltage of 24 VDC Normal mode: 1,560mW max. (Current consumption: 65mA max.) Power saving eco mode: 1,200 mW max. (Current consumption: 50 mA max.)				
Control outputs *3		Load power supply voltage: 30 VDC max., open-collector output Load current: Groups of 1 to 3 Amplifier Units: 100 mA max., Groups of 4 to 30 Amplifier Units: 20 mA max. Residual voltage: At load current of less than 10 mA: 1 V max. At load current of 10 to 100 mA: 2 V max. OFF current: 0.1 mA max.			---	
External inputs		Refer to *4.			---	
Indicators		7-segment displays (Sub digital display: green, Main digital display: white) Display direction: Switchable between normal and reversed. OUT indicator (orange), L/D indicator (orange), ST indicator (blue), DPC indicator (green), and OUT selection indicator (orange, only on models with 2 outputs)				
Protection circuits		Power supply reverse polarity protection, output short-circuit protection, and output reverse polarity protection			Power supply reverse polarity protection and output short-circuit protection	
Response time	Super-high-speed mode (SHS) *5	Operate or reset: 80 μs				
	High-speed mode (HS)	Operate or reset: 250 μs				
	Standard mode (Stnd)	Operate or reset: 1 ms				
	Giga-power mode (GIGA)	Operate or reset: 16 ms				
Sensitivity adjustment		Smart Tuning (2-point tuning, full auto tuning, position tuning, maximum sensitivity tuning, power tuning, or percentage tuning (-99% to +99%)), or manual adjustment.				
No. of Units for mutual interference prevention	Super-high-speed mode (SHS) *5	0				
	High-speed mode (HS)	2				
	Standard mode (Stnd)	2				
	Giga-power mode (GIGA)	4				
Functions	Dynamic power control (DPC)	Provided				
	Timer	Select from timer disabled, OFF-delay, ON-delay, one-shot, or ON-delay + OFF-delay timer: 1 to 9,999 ms				
	Zero reset	Negative values can be displayed. (Threshold value is shifted.)				
	Resetting settings *6	Select from initial reset (factory defaults) or user reset (saved settings).				
	Eco mode	Select from OFF (digital displays lit) or ECO (digital displays not lit).				
	Bank switching	Select from banks 1 to 4.				
	Power tuning	Select from ON or OFF.				
	Output 1	Select from Normal Detection Mode or Area Detection Mode.				
	Output 2	Select from normal detection mode, alarm output mode, or error output mode.	---		Select from normal detection mode, alarm output mode, or error output mode.	
	External input	Select from input OFF, tuning, power tuning, laser OFF, zero reset, or bank switching.			---	
Hysteresis width	Select from standard setting or user setting.					

*1. Two sensor outputs are allocated in the programmable logic controller PLC I/O table.
PLC operation via Communications Unit enables reading detected values and changing settings.

*2. At Power Supply Voltage of 10 to 30 VDC.

Normal mode: 1,650 mW max. (Current consumption: 55 mA max. at 30 VDC, 115 mA max. at 10 VDC)

Power saving eco mode: 1,350 mW max. (Current consumption: 45 mA max. at 30 VDC, 80 mA max. at 10 VDC)

*3. The total for both outputs of a model with 2 outputs is 100 mA max. (Residual voltage: Load current of less than 10 mA: 1 V max., Load current of 10 to 100 mA: 2 V max.)

*4. The following details apply to the input.

	Contact input (relay or switch)	Non-contact input (transistor)	Input time
NPN	ON: Shorted to 0 V (Sourcing current: 1 mA max.). OFF: Open or shorted to Vcc.	ON: 1.5 V max. (Sourcing current: 1 mA max.) OFF: Vcc - 1.5 V to Vcc (Leakage current: 0.1 mA max.)	ON: 9 ms min. OFF: 9 ms min.
PNP	ON: Shorted to Vcc (Sinking current: 3 mA max.). OFF: Open or shorted to 0 V.	ON: Vcc - 1.5 V to Vcc (Sinking current: 3 mA max.) OFF: 1.5 V max. (Leakage current: 0.1 mA max.)	

*5. The mutual interference prevention function is disabled if the detection mode is set to super-high-speed mode.

*6. The bank is not reset by the user reset function or saved by the user save function.

E3NC-LA7/LA9/LA24/LA54

Safety Precautions

To ensure safe operation, be sure to read and follow the Instruction Manual provided with the Sensor.

Sensor Heads

Laser Safety

Various safety standards regarding laser devices are stipulated in Japan and abroad. When this Sensor Head is used in Japan and when it is assembled in Japan but exported to a foreign country, the safety standards are classified into three cases.

1. When Using the Sensor Head in Japan

JIS C6802 stipulates the safety measures that must be observed by the user for each type of laser equipment.

E3NC-LH□□ Sensor Heads: Class 1

⚠ WARNING

Do not expose your eyes to the laser beam either directly or indirectly (i.e., after reflection from a mirror or shiny surface). The laser beam has a high power density and exposure may result in loss of sight.

Do not disassemble the Sensor Head. Doing so may cause the laser beam to leak, resulting in a risk of visual impairment.

• Displaying the Laser Label

Attach the certification label that is shown at the right to the side of the Sensor Head.

2. Using in the USA

When using devices in which the Sensor Head is installed to the USA, the devices are subject to FDA (Food and Drug Administration) laser regulations of the USA. These Sensors are classified as Class 1 laser devices under IEC/EN 60825-1 and the regulations of Laser Notice No. 50 for this certification. CDRH (Center for Devices and Radiological Health) registration has been completed. (Accession Number:1220690)

3. Using in Europe

This Sensor Head is classified in Class 1 under EN 60825-1.

Precautions for Safe Use

The following precautions must be observed to ensure safe operation of the Sensor Head.

1. Installation Environment

- Do not use the Sensor Head in an environment where explosive or flammable gas is present.
- To secure the safety of operation and maintenance, do not install the Sensor Head close to high-voltage devices or power devices.

2. Power Supply and Wiring

- Always use an E3NC-LA□□ or E3NC-LA0 Amplifier Unit. If a different Amplifier Unit is used, damage or fire may occur.
- High-voltage lines and power lines must be wired separately from the Sensor Head. Wiring them together or placing them in the same duct may cause induction, resulting in malfunction or damage.
- Always turn OFF the power supply before connecting or disconnecting the connectors.

3. Installation

- During installation, tighten the screws securely, but do not exceed the specified tightening torque.
- Specified torque (M3): 0.5 N·m

4. Others

- Never disassemble, repair, modify, deform by pressure, or incinerate the Sensor Head. Do not turn the adjuster on the E3NC-LH02 with a force that is greater than 40 mN·m. Damage or fire may occur.
- Dispose of the Sensor Head as industrial waste.
- If you notice any abnormalities, immediately stop using the Sensor Head, turn OFF the power supply, and contact your OMRON representative.

Precautions for Correct Use

Observe the following precautions to prevent failure to operate, malfunctions, or undesirable effects on Sensor Head performance.

1. Installation Environment

Do not install the Sensor Head in locations subject to the following conditions:

- Ambient temperatures outside of the rated range
- Condensation caused by rapid changes in temperature
- Relative humidity that is not between 35% and 85%
- Corrosive or flammable gas
- Dust, salt, or iron particles
- Direct vibration or shock
- Strong external light interference (such as other laser beams or electric arc-welding machines)
- Direct sunlight or near heaters
- Water, oil, or chemical fumes or spray
- Strong magnetic or electric fields

2. Warming Up

- The circuits will be unstable just after the power supply is turned ON, so measurement values may fluctuate gradually.

3. Maintenance and Inspection

- Always turn OFF the power supply before adjusting or connecting/disconnecting the Sensor Head.
- Do not use thinner, benzene, acetone, or kerosene to clean the Sensor Head.
- If large dust particles or dirt adheres to the filter on the front of the Sensor Head, use a blower brush (such as one used to clean camera lenses) to blow it off. Do not blow the dust particles or dirt with your mouth. To remove dust particles or dirt, wipe it off gently with a soft cloth (such as one for cleaning lenses) moistened with a small amount of alcohol. Do not wipe it off with excessive force. Scratches on the filter may cause errors.

4. Sensing Object

- The Sensor Head cannot accurately measure the following types of objects: Transparent objects, objects with an extremely low reflection ratio, objects smaller than the spot diameter, objects with a large curvature, excessively inclined objects, etc.

Amplifier Units

WARNING

This Amplifier Unit is not designed or rated for ensuring safety of persons either directly or indirectly.

Do not use it for such purposes.

Do not use the Amplifier Unit with voltage in excess of the rated voltage.

Excess voltage may result in malfunction or fire.

Never use the Amplifier Unit with an AC power supply.

Otherwise, explosion may result.

Precautions for Safe Use

The following precautions must be observed to ensure safe operation of the Amplifier Unit. Doing so may cause damage or fire.

- Do not install the Amplifier Unit in the following locations.
 - Locations subject to direct sunlight
 - Locations subject to condensation due to high humidity
 - Locations subject to corrosive gas
 - Locations subject to vibration or mechanical shocks exceeding the rated values
 - Locations subject to exposure to water, oil, chemicals
 - Locations subject to stream
 - Locations subjected to strong magnetic field or electric field
- Do not use the Amplifier Unit in environments subject to flammable or explosive gases.
- Do not use the Amplifier Unit in any atmosphere or environment that exceeds the ratings.
- To secure the safety of operation and maintenance, do not install the Amplifier Unit close to high-voltage devices or power devices.
- High-voltage lines and power lines must be wired separately from the Amplifier Unit. Wiring them together or placing them in the same duct may cause induction, resulting in malfunction or damage.
- Do not apply any load exceeding the ratings. Otherwise, damage or fire may result.
- Do not short the load. Otherwise, damage or fire may result.
- Do not use the Amplifier Unit if the case is damaged.
- Burn injury may occur. The Amplifier Unit surface temperature rises depending on application conditions, such as the ambient temperature and the power supply voltage. Use caution when operating or cleaning the Amplifier Unit.
- When setting the sensor, be sure to check safety such as by stopping the equipment.
- Be sure to turn off the power supply before connecting or disconnecting wires.
- Do not attempt to disassemble, repair, or modify the Amplifier Unit in any way.
- When disposing of the Amplifier Unit, treat it as industrial waste.

Precautions for Correct Use

- Connect the load correctly.
- Do not miswire such as the polarity of the power supply.
- Be sure to mount the unit to the DIN track until it clicks.
- When using the Amplifier Units with Wire-saving Connectors, attach the protective stickers (provided with E3X-CN-series Connectors) on the unused power pins to prevent electrical shock and short circuiting. Attach the protective cap when using a model with a connector for a Sensor Communications Unit.

Amplifier Unit with Wire-saving Connector

Amplifier Unit with Connector for Sensor Communications Unit

- Use an extension cable with a minimum thickness of 0.3 mm² and less than 100 m long.
- Do not apply the forces on the cord exceeding the following limits: Pull: 40N; torque: 0.1N·m; pressure: 20N; bending: 29.4N
- Do not apply excessive force (9.8 N max.) such as tension, compression or torsion to the connector of the Sensor Head that is fixed to the Amplifier Unit.
- Always keep the protective cover in place when using the Amplifier Unit. Not doing so may cause malfunction.
- It may take time until the received light intensity and measured value become stable immediately after the power is turned on depending on use environment.
- The product is ready to operate 200ms after the power supply is turned ON.
- The Mobile Console E3X-MC11, E3X-MC11-SV2 and E3X-MC11-S cannot be connected.
- The mutual interference prevention function does not work when in combination with E3C/E2C/E3X.
- If the unit receives excessive sensor light, the mutual interference prevention function may not work properly, resulting in malfunction of the unit. In such case, increase the threshold.
- Standard models (E3NC-LA21/51/7/9)
The Sensor Communication Unit E3X-DRT21-S, E3X-CRT, E3X-ECT and E3NW cannot be connected.
Model for Sensor Communication Unit (E3NC-LA0)
The Sensor Communication Unit E3NW can be connected.
E3X-DRT21-S, E3X-CRT, E3X-ECT cannot be connected.
- If you notice an abnormal condition such as a strange odor, extreme heating of the unit, or smoke immediately stop using the product, turn off the power, and consult your dealer.
- Do not use thinner, benzene, acetone, and lamp oil for cleaning.

Read and understand this catalog.

Please read and understand this catalog before purchasing the products. Please consult your OMRON representative if you have any questions or comments.

Warranties.

(a) Exclusive Warranty. Omron's exclusive warranty is that the Products will be free from defects in materials and workmanship for a period of twelve months from the date of sale by Omron (or such other period expressed in writing by Omron). Omron disclaims all other warranties, express or implied.

(b) Limitations. OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, ABOUT NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OF THE PRODUCTS. BUYER ACKNOWLEDGES THAT IT ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE.

Omron further disclaims all warranties and responsibility of any type for claims or expenses based on infringement by the Products or otherwise of any intellectual property right. (c) Buyer Remedy. Omron's sole obligation hereunder shall be, at Omron's election, to (i) replace (in the form originally shipped with Buyer responsible for labor charges for removal or replacement thereof) the non-complying Product, (ii) repair the non-complying Product, or (iii) repay or credit Buyer an amount equal to the purchase price of the non-complying Product; provided that in no event shall Omron be responsible for warranty, repair, indemnity or any other claims or expenses regarding the Products unless Omron's analysis confirms that the Products were properly handled, stored, installed and maintained and not subject to contamination, abuse, misuse or inappropriate modification. Return of any Products by Buyer must be approved in writing by Omron before shipment. Omron Companies shall not be liable for the suitability or unsuitability or the results from the use of Products in combination with any electrical or electronic components, circuits, system assemblies or any other materials or substances or environments. Any advice, recommendations or information given orally or in writing, are not to be construed as an amendment or addition to the above warranty.

See <http://www.omron.com/global/> or contact your Omron representative for published information.

Limitation on Liability; Etc.

OMRON COMPANIES SHALL NOT BE LIABLE FOR SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR PRODUCTION OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED IN CONTRACT, WARRANTY, NEGLIGENCE OR STRICT LIABILITY.

Further, in no event shall liability of Omron Companies exceed the individual price of the Product on which liability is asserted.

Suitability of Use.

Omron Companies shall not be responsible for conformity with any standards, codes or regulations which apply to the combination of the Product in the Buyer's application or use of the Product. At Buyer's request, Omron will provide applicable third party certification documents identifying ratings and limitations of use which apply to the Product. This information by itself is not sufficient for a complete determination of the suitability of the Product in combination with the end product, machine, system, or other application or use. Buyer shall be solely responsible for determining appropriateness of the particular Product with respect to Buyer's application, product or system. Buyer shall take application responsibility in all cases.

NEVER USE THE PRODUCT FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY OR IN LARGE QUANTITIES WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCT(S) IS PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

Programmable Products.

Omron Companies shall not be responsible for the user's programming of a programmable Product, or any consequence thereof.

Performance Data.

Data presented in Omron Company websites, catalogs and other materials is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of Omron's test conditions, and the user must correlate it to actual application requirements. Actual performance is subject to the Omron's Warranty and Limitations of Liability.

Change in Specifications.

Product specifications and accessories may be changed at any time based on improvements and other reasons. It is our practice to change part numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the Product may be changed without any notice. When in doubt, special part numbers may be assigned to fix or establish key specifications for your application. Please consult with your Omron's representative at any time to confirm actual specifications of purchased Product.

Errors and Omissions.

Information presented by Omron Companies has been checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical or proofreading errors or omissions.

2013.7

In the interest of product improvement, specifications are subject to change without notice.
