CSM\_E5AR\_DS\_E\_3\_5

# E5AR Digital Controllers offer high speed, high precision, and multiple I/O and use a 5-digit, 3-row LCD display for high visual clarity.

- A short sampling period of 50 ms enables use in applications requiring high-speed response.
- PV, SP, and MV data is displayed simultaneously in a 3-row, negative LCD display with a backlight.
- Multiloop control, cascade control, and proportional control are possible with a single Controller.
- When using models with CompoWay/F communications, initial settings can be downloaded and settings can be masked using Support Software (CX-Thermo version 4.0 or higher).
- Equipped with calculation functions as a standard (e.g., square root calculation and broken-line approximation).
- DeviceNet Communications
   Data setting and monitoring can be performed without special programming.

For the most recent information on models that have been certified for safety standards, refer to your OMRON website.

 $\Lambda$ 

Refer to Safety Precautions for All E5 R Models.

Refer to *E5AR/E5ER Operation* for operating procedures.

### Model Number Structure

# **■** Model Number Legend

1. Constant Values/Program

None: Constant value

2. Control Method

Blank: Standard or heating/cooling control

P: Position proportional control

3. Output 1

R: DPST-NO relay outputs

Q: Pulse voltage and pulse voltage/current outputs

C: Current and current outputs

4. Output 2

Blank: None

R: Relay outputs

Q: Pulse voltage and pulse voltage/current outputs

C: Current and current outputs

Note: When your order, specify the power supply voltage.

5. Auxiliary Outputs

Blank: None

4: 4PST-NO relay outputs

T: 2 transistor outputs

6. Optional Function 1

Blank: None

3: RS-485 communications

7. Optional Function 2

Blank: None

D: 4 event inputs

8. Input 1

B: Universal-input and 2 event inputs

F: Universal-input and FB

W: Universal-input and universal-input

9. Input 2

Blank: None

W: Universal-input and universal-input

10.Communications Method

Blank: None

FLK: CompoWay/F DRT: DeviceNet

**Note:** The above model number legend is intended as a functional description of models. Not all possible combinations of functions are available. Confirm model availability in *Ordering Information* when ordering.

The CX-Thermo Support Software (version 4.0 or higher) can be used to easily set parameters in conversational form.

Note: Be sure to read the precautions for correct use and other precautions in the following user's manual before using the Digital Controller.

E5AR/E5ER Digital Controller User's Manual (Cat. No. Z182)

E5AR/E5ER Digital Controller DeviceNet Communication User's Manual (Cat. No. H124)

# **Ordering Information**

# ■ Digital Controllers When your order, specify the power supply voltage.

# Standard Controllers (100 to 240 VAC)

Size	Control type	Control mode	Outputs	Opt	ional fund	tions	Model

For 3 years of assured use: -10 to 50°C (with no icing or condensation)	Other functions		Depends on model.					
Ambient operating humidity 25% to 85%	Ambient operating to	emperature						
	Ambient operating h	umidity	25% to 85%					
Storage temperature –25 to 65°C (with no icing or condensation)	Storage temperature		-25 to 65°C (with no icing or condensation)					

- Note 1: The supply voltage (i.e., 100 to 240 VAC or 24 VAC/VDC) depends on the model. Be sure to specify the required type when ordering.
  - The Controller is equipped with multiple sensor input. Temperature input or analog input can be selected with the input type setting switch. There is basic insulation between power supply and input terminals, power supply and output terminals, and input and output terminals.
     Do not use an inverter output as the power supply. (Refer to Safety Precautions for All E5 \(\sigma R\) Models.)

### **■** Characteristics

Indication accuracy	Thermocouple input with cold junction compensation: $(\pm 0.1\% \text{ of PV or } \pm 1^{\circ}\text{C}$ , whichever is greater) $\pm 1$ digit max. (See note 1.) Thermocouple input without cold junction compensation: $(\pm 0.1\% \text{ FS or } \pm 1^{\circ}\text{C}$ , whichever is smaller) $\pm 1$ digit (See note 2.) Analog input: $\pm 0.1\% \text{ FS} \pm 1$ digit max. Platinum resistance thermometer input: $(\pm 0.1\% \text{ of PV or } \pm 0.5^{\circ}\text{C}$ , whichever is greater) $\pm 1$ digit max. Position-proportional potentiometer input: $\pm 5\% \text{ FS} \pm 1$ digit max.								
Control mode	Standard control (heating or cooling control), heating/cooling control, standard control with remote SP (2-input models only), heating/cooling control with remote SP (2-input models only), cascade standard control (2-input models only), cascade heating/cooling control (2-input models only), proportional control (2-input models only), position-proportional control (control-valve control models only)								
Influence of temperature	termocouple input (R, S, B, W): $(\pm 1\%$ of PV or $\pm 10^{\circ}$ C, whichever is greater) $\pm 1$ digit max. her thermocouple input: $(\pm 1\%$ of PV or $\pm 4^{\circ}$ C, whichever is greater) $\pm 1$ digit max.								
Influence of voltage	I∗K-type thermocouple at −100°C max.: ±10°C max.								
Influence of EMS. (at EN61326-1)	Platinum resistance thermometer: $(\pm 1\% \text{ of PV or } \pm 2^{\circ}\text{C}$ , whichever is greater) $\pm 1$ digit max. Analog input: $(\pm 1\% \text{FS}) \pm 1$ digit max.								
Control period	0.2 to 99.0 s (in units of 0.1 s) for time-proportioning control output								
Proportional band (P)	0.00% to 999.99% FS (in units of 0.01% FS)								
Integral time (I)	0.0 to 3,999.9 s (in units of 0.1 s)								
Derivative time (D)	0.0 to 3,999.9 s (in units of 0.1 s)								
Hysteresis	0.01% to 99.99% FS (in units of 0.01% FS)								
Manual reset value	0.0% to 100.0% (in units of 0.1% FS)								
Alarm setting range	-19,999 to 99,999 EU (See note 3.) (The decimal point position depends on the input type and the decimal point position setting								
Input sampling period	50 ms								
Insulation resistance	20 MΩ min. (at 500 VDC)								
Dielectric strength	2,000 VAC, 50/60 Hz for 1 min (between charged terminals of different polarities)								
Vibration resistance	10 to 55 Hz, 20 m/s <sup>2</sup> for 10 min each in X, Y, and Z directions								
Shock resistance	100 m/s², 3 times each in X, Y, and Z directions								
Inrush current	100 to 240-VAC models: 50 A max. 24 VAC/VDC models: 30 A max.								
Weight	Controller only: Approx. 450 g; Mounting bracket: Approx. 60 g; Terminal cover: Approx. 30 g								
Degree of protection	Front panel: NEMA4X for indoor use (equivalent to IP66); Rear case: IP20; Terminals: IP00								
Memory protection	Non-volatile memory (number of writes: 100,000)								
Applicable standards	UL61010C-1, CSA C22.2 No. 1010-1 EN61010-1 (IEC61010-1): Pollution degree 2/overvoltage category 2								
EMC	EMI: EN61326-1 (See note 5.) Radiated Interference Electromagnetic Field Strength: EN55011 Group 1 Class A Noise Terminal Voltage: EN55011 Group 1 Class A								
	EMS: EN61326-1 (See note 5.) ESD Immunity: EN61000-4-2:  4 kV contact discharge (level 2) 8 kV air discharge (level 3)								
	Electromagnetic Immunity: EN61000-4-3: Burst Noise Immunity: EN61000-4-4:  10 V/m (amplitude-modulated, 80 MHz to 1 GHz, 1.4 GHz to 2 GHz) (level 3) 2 kV power line (level 3) 2 kV output line (relay output) (level 4) 1 kV measurement line, I/O signal line (level 4) 1 kV communications line (level 3)								
	Conducted Disturbance Immunity: EN61000-4-6: 3 V (0.15 to 80 MHz) (level 3)  Surge Immunity: EN61000-4-5: 1 kV line to line (power line, output line (relay output)) (level 2)  2 kV line to ground (power line, output line (relay output)) (level 3)  Power Frequency Magnetic Field Immunity: EN61000-4-8: 30 A/m (50 Hz) continuous field								
	Power Frequency Magnetic Field Immunity: EN61000-4-8: 30 A/m (50 Hz) continuous field Voltage Dip/Interrupting Immunity: EN61000-4-11: 0.5 cycle, 100% (rated voltage)								

- Note 1: K-, T-, or N-type thermocouple at -100°C max.: ±2°C ±1 digit max.

  U- or L-type thermocouple: ±2°C ±1 digit max.

  B-type thermocouple at 400°C max.: No accuracy specification.

  R- or S-type thermocouple at 200°C max.: ±3°C ±1 digit max.

  W-type thermocouple: (±0.3% of PV or ±3°C, whichever is greater) ±1 digit max.

  2: U- or L-type thermocouple: ±1°C ±1 digit

  R- or S-type thermocouple at 200°C max.: ±1.5°C ±1 digit

  3: "EU" (Engineering Unit) represents the unit after scaling. If a temperature sensor is used it is either °C or °F.

  4: Conditions: Ambient temperature from -10 to 23 to 55°C and voltage of -15% to 10% of rated voltage.

  5: Industrial electromagnetic environment (EN/IEC 61326-1 Table 2)

# **■** Communications Specifications

Transmission path connection	Multiple points		
Communications method	RS-485 (two-wire, half duplex)		
Synchronization method	Start-stop synchronization		
Baud rate	9,600, 19,200, or 384,000 bps		
Transmission code	ASCII		
Data bit length	7 or 8 bits		
Stop bit length	1 or 2 bits		
Error detection	Vertical parity (none, even, odd) Block check character (BCC): CompoWay/F CRC-16: Modbus		
Flow control	None		
Interface	RS-485		
Retry function	None		
Communications buffer	217 bytes		
Communications response send wait time	0 to 99 ms, Default: 20 ms		

# **DeviceNet**

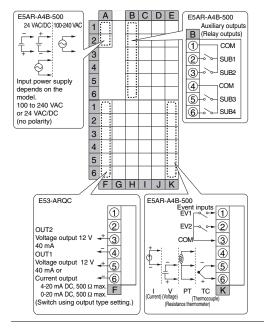

Item		Specifications				
Communications protocol		Conforms to DeviceNet				
Communications functions	Remote I/O communications	Master-slave connections (polling, bit-strobe, COS, or cyclic)     Conform to DeviceNet specifications.				
	I/O allocations	Can allocate any I/O data from the Configurator.				
		Can allocate any data, such as parameters specific to the DeviceNet and the Digital Controller variable area.				
		Up to 2 blocks for the IN Area, up to a total of 100 words.				
		One block for the OUT Area, up to 100 words (first word is always allocated to Output Enable Bits).				
	Message communications	can be sent (command	ds are sent in explicit mes-			
<b>Connection format</b>		Combination of multidrop and T-branch connections (for trunk and drop lines)				
Baud rate		DeviceNet: 500, 250, or 125 kbps, or automatic detection of master baud rate				
Communications m	edia	Special 5-wire cable (2 signal lines, 2 power lines, and 1 shield line)				
Communications distance		Baud rate	Network length	Drop line length	Total drop line length	
		500 kbps	100 m max. (100 m max.)	6 m max.	39 m max.	
		250 kbps	250 m max. (100 m max.)	6 m max.	78 m max.	
		125 kbps	500 m max. (100 m max.)	6 m max.	156 m max.	
		The values in parentheses apply when Thin Cables are used.				
Supply voltage		DeviceNet power supply: 24 VDC				
Allowable voltage r	ange	DeviceNet power supply: 11 to 25 VDC				
Current consumption	on	50 mA max. (24 VDC)				
Maximum number of connected	of nodes that can be	64 (includes Configurator when used)				
Maximum number of connected	of slaves that can be	63				
Error control		CRC error detection				
Power supply		Power supplied from DeviceNet communications connector.

### ■ Accessories (Order Separately)

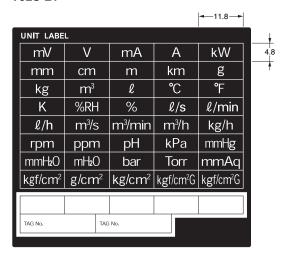

### **Terminal Cover**

#### E53-COV14 (for E5AR)

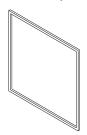

### **Unit Label Sheet**

#### Y92S-L1

### **Rubber Packing**

#### Y92S-P4 (for DIN96 $\times$ 96)

Order the Rubber Packing separately if it becomes lost or damaged. (Refer to page 4.)

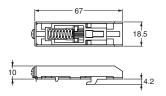

The Rubber Packing can be used to achieve an IP66 degree of protection.

(Deterioration, shrinking, or hardening of the rubber packing may occur depending on the operating environment. Therefore, periodic replacement is recommended to ensure the level of waterproofing specified in NEMA4. The time for periodic replacement depends on the operating environment. Be sure to confirm this point at your site. Consider one year a rough standard. OMRON shall not be liable for the level of water resistance if the customer does not perform periodic replacement.)

The Rubber Packing does not need to be attached if a waterproof structure is not required.

### **Mounting Adapters**

#### Y92H-9 (2pcs)

One set is packaged with the product.

Order Mounting Adapters separately if yours are lost or damaged.

ALL DIMENSIONS SHOWN ARE IN MILLIMETERS.

To convert millimeters into inches, multiply by 0.03937. To convert grams into ounces, multiply by 0.03527.

In the interest of product improvement, specifications are subject to change without notice.

#### Terms and Conditions Agreement

#### Read and understand this catalog.

Please read and understand this catalog before purchasing the products. Please consult your OMRON representative if you have any questions or comments.

#### Warranties.

- (a) Exclusive Warranty. Omron's exclusive warranty is that the Products will be free from defects in materials and workmanship for a period of twelve months from the date of sale by Omron (or such other period expressed in writing by Omron). Omron disclaims all other warranties, express or implied.
- (b) Limitations. OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, ABOUT NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OF THE PRODUCTS. BUYER ACKNOWLEDGES THAT IT ALONE HAS DETERMINED THAT THE

PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE.

Omron further disclaims all warranties and responsibility of any type for claims or expenses based on infringement by the Products or otherwise of any intellectual property right. (c) Buyer Remedy. Omron's sole obligation hereunder shall be, at Omron's election, to (i) replace (in the form originally shipped with Buyer responsible for labor charges for removal or replacement thereof) the non-complying Product, (ii) repair the non-complying Product, or (iii) repay or credit Buyer an amount equal to the purchase price of the non-complying Product; provided that in no event shall Omron be responsible for warranty, repair, indemnity or any other claims or expenses regarding the Products unless Omron's analysis confirms that the Products were properly handled, stored, installed and maintained and not subject to contamination, abuse, misuse or inappropriate modification. Return of any Products by Buyer must be approved in writing by Omron before shipment. Omron Companies shall not be liable for the suitability or unsuitability or the results from the use of Products in combination with any electrical or electronic components, circuits, system assemblies or any other materials or substances or environments. Any advice, recommendations or information given orally or in writing, are not to be construed as an amendment or addition to the above warranty.

See http://www.omron.com/global/ or contact your Omron representative for published information.

#### Limitation on Liability; Etc.

OMRON COMPANIES SHALL NOT BE LIABLE FOR SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR PRODUCTION OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED IN CONTRACT, WARRANTY, NEGLIGENCE OR STRICT LIABILITY.

Further, in no event shall liability of Omron Companies exceed the individual price of the Product on which liability is asserted.

#### Suitability of Use.

Omron Companies shall not be responsible for conformity with any standards, codes or regulations which apply to the combination of the Product in the Buyer's application or use of the Product. At Buyer's request, Omron will provide applicable third party certification documents identifying ratings and limitations of use which apply to the Product. This information by itself is not sufficient for a complete determination of the suitability of the Product in combination with the end product, machine, system, or other application or use. Buyer shall be solely responsible for determining appropriateness of the particular Product with respect to Buyer's application, product or system. Buyer shall take application responsibility in all cases.

NEVER USE THE PRODUCT FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY OR IN LARGE QUANTITIES WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCT(S) IS PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

#### Programmable Products.

Omron Companies shall not be responsible for the user's programming of a programmable Product, or any consequence thereof.

#### Performance Data.

Data presented in Omron Company websites, catalogs and other materials is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of Omron's test conditions, and the user must correlate it to actual application requirements. Actual performance is subject to the Omron's Warranty and Limitations of Liability.

#### Change in Specifications.

Product specifications and accessories may be changed at any time based on improvements and other reasons. It is our practice to change part numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the Product may be changed without any notice. When in doubt, special part numbers may be assigned to fix or establish key specifications for your application. Please consult with your Omron's representative at any time to confirm actual specifications of purchased Product.

<u>Errors and Omissions.</u> <u>Information presented by Omron Companies has been checked and is believed to be accurate; however, no responsibility is accurate.</u> assumed for clerical, typographical or proofreading errors or omissions.

2017.8
