Steel plated bottom base for wear resistance

TOL button (setting tolerance)

Using the [TOL] button enables you to check if measured value is within a specified range or not easily.

1. Press the [TOL] button until "SET" blinks on display, and the \uparrow symbol is displayed. In this state the maximum tolerance can be specified.
2. Holding down the [TOL] button will change the blinking position. Release [TOL] button when number to change is blinking, press again to change number +/- . Repeat until desired value is displayed. When the value is set, select [SET] and press the [TOL] button to save setting.
3. When \downarrow is displayed, use the same procedure to set the minimum tolerance level.
4. Press "TOL" button to return to blinking "SET" on display. Tolerance is now set.
5. When taking a measurement:
 - If the value is within the measurement tolerance, LCD will display 「OK」
 - If the value is above the measurement tolerance, LCD will display \uparrow
 - If the value is below the measurement tolerance, LCD will display \downarrow
