minico $\varnothing 16$ Command Switches AR16•DR16, AF16•DF16

- An integrated structure with built-in contacts that can reduce control panel depth.
- A wide variety of sockets are available to simplify wiring.

Operator • Contacts

Mounting panel

Supporting smaller and thinner operator's panels

A structure that integrates operator and contacts to reduce panel-mounting depth. Terminals extending to the rear of the switch ensure easy wiring work.

A wide variety of sockets reduce wiring work

Switches combine with a variety of sockets to simplify wiring.

● Fast-connection socket

- Applicable as a fast-connection terminal switch by combining the socket with a switch.
- Easily wired by simply removing the wire sheath and inserting the wires while pressing the insertion slot button (no soldering required).
- Incorporates a branch terminal for easy branching.

● Connector socket

- Applicable as a connector by combining the socket with receptacles.
- The socket holds the receptacles, making it easy to connect the receptacle to the switch with a single operation.

● Socket for PC board

- Applicable as a switch for PC board by combining the socket with a switch.
- Pattern wiring reduces the number of wiring man-hour and helps prevent faulty wiring.

Contributes to attractive panel designs

In addition to the standard type, a thin type with a panel protrusion of only 2 mm is available, allowing high-density mounting for attractive panel designs.

Integrated contact structure (Thin type) AF16/DF16 series

- Keep in mind that the panel cutout size for the thin type depends on the operator shape. See page 04/167 for details.
- The panel depth is unified to 35.9mm.

Brighter illuminated surface

Less power consumption helps to save energy. A longer service life helps to reduce maintenance costs.

Dedicated LED lamp

Degrees of protection IP65

The operator has IP65 protection for smooth operation without adverse effects from oil, water, or dusts. Applicable to a wide variety of equipment, from machine tools to OA equipment.

Highly reliable contact mechanism

Gold-plated contacts and a snap-action mechanism enables IC-level applications (with a switching current of 1 mA at 5 V).

Meets EU RoHS requirements

Standard models meet RoHS requirements (EU Directive 2002/95/C).

Standard models meet international standards

Standard models meet UL/CSA requirements, China Compulsory Certification (CCC) standards, and TÜV EN standards, making them ideal for equipment for export.

Note: Command switches shipped as single articles to China must conform to the Product Quality Law. Check with your Fuji Electric representative.

The insertion/extraction life of the key is greatly extended

The key selector switch incorporates a pin tumbler type key (reversible type) to improve the insertion/extraction performance of the key.

- Six key types are available.
- The pin tumbler construction improves security.

The operating angle position of the selector switch can be easily changed.

The bezel is separate from the knob (key), so the operating angle position can be easily changed in 45° increments (with the AR16 series rectangular or square type only). The following figure shows a knob type example. Same applies to the key type.

- Two-position model example.

Ø22 (Ø25) AR22 and DR22 Command Switches

The use of a release arm enables easy mounting.

Operator • Contacts

Mounting panel

Easy attachment and detachment with a release arm

The separate structure with a unique wedge mechanism enables one-step attachment and detachment of the operating section and contact section, without the use of any tool.

One-step lock!

Attachment

Push

Detachment

One Touch!

One-step release!

Contact block and transformer unit can also be added or replaced in a single step

All contact block and transformer unit are designed with snap-on mounting, so no tools are required.

One Touch!

Attachment

One Step!

Detachment

Improved work efficiency through bi-directional wiring

Terminals can be wired from two directions. This is ideal for wiring crossovers or wiring in narrow spaces. Square washers are used to enable wiring with solid wires.

Utility

Wiring from two directions

1NO

Blue

1NC

Red

Lamp terminals and Transformer Unit

Black

Color coding of contact blocks, lamp terminal and transformer unit makes wiring and checking easy.

Panel thickness need not be adjusted

Because the back surface of the operating section is mounted with a tightening nut, there is absolutely no need to adjust the panel thickness.

Also, the operator can be mounted on the panel along with a previously installed button and knob.

Easy

Mounting panel

Superior contact reliability

All the contacts are double break type and feature self-cleaning action. Every time the switch is operated, the contact surfaces are wiped with a sliding movement, thus ensuring high contact reliability even at low voltage and small current levels (5V, 5mA).

Buzzers are also available

Electronic or electromagnetic buzzers provide audible feedback on the status of the equipment. Splash-proof buzzers that conform to EN 60204-1 (degrees of protection) are also available (enclosure used in general industry: IP54).

Tightening nut

Contact section

Depth of the short body

A short design enables full use of the available depth of the equipment.

Short

① The Short-body Pilot light is 21.5mm long.

Switches with IP2X-compliant terminals are also available

Switches with IP2X-compliant terminals with a finger protection structure conforming to EN 60204-1 (Protection against electric shock) are available. (A test finger that simulates a human finger does not come into contact with live parts.)

Safety

Contacts Transformer unit Lamp terminal for pilot light

Note: For details, refer to AR22 and DR22-series Special Products.

High brightness LED illuminated model, "PIKARI-KUN"

- Standard models feature (1) higher equipment grade, (2) enhanced safety that enables easy identification of the status, and (3) adoption of pure green illumination color through a major improvement in visibility (Luminance) through the adoption of four elements LED.
- Along with a significant improvement in Luminance, energy is saved through a reduction in power consumption.
- The maintenance cost is also reduced by increasing the service life.

Terminal cover for charged parts provided as a standard accessory

A terminal cover that covers the terminals is provided as a standard accessory to help prevent electric shock by reducing exposure to charged parts.

Note: Not provided on all models.

Lamp base shape facilitates easy replacement

The same lamp base shape of BA9s/13 for both high brightness LED lamps and incandescent lamps facilitates application.

Standard models meet international standards

Standard models meet UL/CSA requirements and TÜV EN standards, making them ideal for equipment for export.

Chinese CCC-compliant models are also available.

Note: For details, refer to List of Models.
See page 04/3 to 04/6

Global Standardization

Features 30 × 50 mm tight mounting

Note: Not applicable to all models.

Panel cutout dimensions of 22.3 mm and 25.5 mm diameter

By providing a projection on the tightening nut, one switch can be mounted on two different panel cutout dimensions. Therefore, switches do not need to be purchased to match the panel cutout dimensions.

Ø 22.3^{+0.4}₀ mm Ø 25.5^{+0.5}₀ mm

Units can be mounted on a 25.5-mm diameter hole simply by turning over the tightening nut.

Safety equipment

16 to 30 mm diameter

Command Switch Emergency Stop (Illuminated) Pushbutton Switches

These pushbutton switches comply with various international standards, so they can be reliably used as emergency stop devices.

Ø16 (AH165, AR16)

minico

AR16V0R

Compliance with International Standards

The emergency stop pushbuttons employ FUJI's original Trigger Action mechanism.

They are suitable for emergency stop and safety.

This mechanism prevents the contacts from moving until the button is pushed and locked.

- Provided with a Trigger Action mechanism conforming to EN 480.
- Provided with direct opening action (approved by TÜV) conforming to EN60947-5-1 and EN60947-5-5. ↻

Button section	Not pushed	Being pushed	Locked
Contact operation transitions			
NC contacts	Closed	Closed	Open

Emergency stop pushbutton switches available with an integrated contact structure

Emergency stop pushbutton switches are available with an integrated contact structure in which the operating section and contact section are combined into one unit (AH165-V, AR16V, and AR22VG). By arranging the contacts in an integrated structure, the reliability of the safety protection function is increased.

- The AR16V types feature a panel depth dimension of 28 mm for non-illuminated models and can have up to four sets of contacts.
- The AR22VGF types are equipped with a lamp circuit interlocking structure in which a lamp lights when the switch is locked.

Non-illuminated

Illuminated

Ø22 (AR22, AM22)

AR22V0L

AM22VME

Ø30 (AR30)

AR30V1R

A mechanical indicator mechanism by which the operating status can be seen at a single glance is available.

In AM22VME types, the operating status is indicated mechanically in the form of green and red colors in three button display windows

Reset status (no operation being performed): **Green** Locked status (during operation): **Red**

- Ideal for mechanical control panels in which display power supply is difficult to ensure.

SEMI-compliant guard rings are also available

This guard ring can be combined with our emergency stop switches to comply with the SEMI standards required for semiconductor manufacturing devices.

Combination of an AR9R008 guard ring with an AR22V2R switch

Combination of an AR9R008 guard ring with an AR22V3R Z286 switch

- Emergency stop switches with the "EMO" mark are available (AR22V3R Z286).
- EMERGENCY OFF labels are available.

Note: For details, refer to SEMI-compliant guard rings.

AR22V3R Z286

Standard models meet international standards

Standard models meet UL/CSA requirements and TÜV, EN Standard are available and exhibit CE marking. Chinese CCC-compliant models are also available.

Note: For details, refer to the list of models.

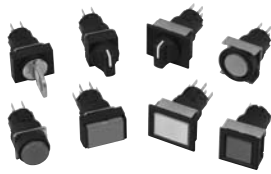

Emergency stop pushbutton switches with IP2X -compliant terminals are also available

Emergency stop pushbutton switches with IP2X-compliant terminals with a finger protection structure conforming to EN 60204-1 (protection against electric shock) are available. (A test finger that simulates a human finger does not come in contact with live parts.)

Note: The AR16V types is IP2X compliant when used with a terminal cover for charged parts (AR9Y262, sold separately). Switches from the AH165-V types are not IP2types compliant. For details on the AR22, 30V, Q, and AM22V types, refer to Special Products. The standard AR22V/G types are IP2X compliant.

General information

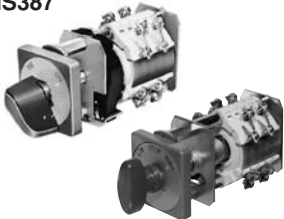

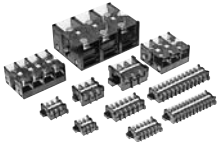

Command Series

Series	Type	Features
Command Series	AR22 and DR22 	<ul style="list-style-type: none"> • Standard models feature illumination with high brightness LEDs. • No adjusting of panel thickness is necessary. • The button and lens can be mounted on a panel while the operator is engaged. • Easy replacing contact block and transformer. • Wiring from two directions is possible. • The shortest among industrial pushbuttons. The transformer now occupies far less space. • A terminal cover are provided, assuring safety and security. • The emergency stop pushbuttons employ FUJI's original Trigger Action mechanism. They are suitable for emergency stop and safety. • Mountable even on panel cutout 25mm diameter. • AR22 and DR22 series of the ø22 Command Switches are approved by UL/CSA CCC and TÜV (EN standard). • Bearing CE markings.
	AR30 and DR30 	<ul style="list-style-type: none"> • Standard models feature illumination with high brightness LEDs. • Easy replacing contact block and transformer. • The shortest among industrial pushbuttons. The transformer now occupies far less space. • A terminal cover are provided, assuring safety and security. • The emergency stop pushbuttons employ FUJI's original Trigger Action mechanism. They are suitable for emergency stop and safety. • AR30 and DR30 series of the ø30 Command Switches are approved by UL/CSA, CCC and TÜV (EN standard). • Bearing CE markings.
	AR16 and AF16 	<ul style="list-style-type: none"> • An integrated operator component and contact mechanism that reduces control panel's depth. A unified depth of 28.4mm for the Standard type and 35.9mm for the Thin type. • Thin type and Standard types available for your control panel design. Select an optimum one to match your control panel design. • A wide variety of sockets help to reduce wiring. • Incorporating a gold-flashed SPDT or 2PDT contact mechanism with a snap-action structure that makes and breaks 1mA at 5V. • A key selector switch with a pin tumbler key and reversible type mechanism provides improved key insertion and removal (extraction) performance. • Complies with RoHS (EU Directive 2002/95/EC). • The standard AR16 and DR16, AF16 and DF16 series of the ø16 Command Switches are approved by UL/CSA, CCC and TÜV (EN standard). • Bearing CE markings.
	AH164 and AH165 AH165-2 	<ul style="list-style-type: none"> • Standard models feature illumination with high brightness LEDs. • Unified depth dimension of 24 mm for type with indicator and 42.5 mm for other types. • Application possible at 1 mA, 5 V due to gold-plated contacts and sliding structure. • Incandescent, neon and LED lamps are available. • Easy replacing contact block. • AH165-2 series are about twice as large as the AH165 series. • AH164 and AH165, AH165-2 series of the ø16 Command Switches are approved by UL/CSA, CCC and TÜV (EN standard). • Bearing CE markings.

MINIMUM ORDERS

Orders amounting to **less than ¥10,000** net per order will be charged as ¥10,000 net per order plus freight and other charges.

WEIGHTS AND DIMENSIONS

Weights and dimensions appearing in this catalog are the best information available at the time of going to press.

FUJI ELECTRIC FA has a policy of continuous product improvement, and design changes may make this information out of date.

Please confirm such details before planning actual construction.

INFORMATION IN THIS CATALOG IS SUBJECT TO CHANGE WITHOUT NOTICE.

■ Command series

AR22/DR22

AF94-320

AF94-310

AF98-88

- 22mm diameter hole
- Mountable even on panel cutout 25mm in diameter.
- Provided with newly developed release arm
- Provided with terminal cover for safety and security
- UL, CSA, TÜV and CCC approved

AH164, 165

SK-1103

SK-1138

- 16mm diameter hole, finger-sized button
- Incandescent, neon and LED lamps are available.
- Block type contact
- AH165 series is oil-tight
- UL, CSA, TÜV and CCC approved

AR30/DR30

AF95-4

AF95-6

AF98-195

- 30mm diameter hole
- Provided with terminal cover for safety and security
- UL, CSA, TÜV and CCC approved

AH165-2

AF87-211

AF87-208

- 16mm diameter hole
- AH165-2 series are about twice as large as the AH165 series
- Incandescent, neon and LED lamps are available.
- Block type contact
- AH165-2 series is oil-tight
- UL, CSA, TÜV and CCC approved

AR16/DR16, AF16/DF16

KKD07-157

KKD07-171

KKD07-183

- 16mm diameter hole, finger-sized button
- Integrated contact structure
- AR16 series is standard type.
- AF16 series is thin type.
- UL, CSA, TÜV and CCC approved

The AR22 now uses a release arm with a wedge mechanism developed by Fuji Electric FA. This enables you to mount or remove the operator and contact block without using any tools. When fitting the switch to a panel, you can ignore the panel thickness. You have only to secure the operator with a locking nut from behind the panel without any need for adjustment. The improved locking nut is capable of mounting the operator in both 22.3mm and 25.5mm dia. panel cutout holes.

■ Features

Facilitated mounting

- No adjusting of panel thickness is necessary.
- The button and lens can be mounted on a panel while the operator is engaged.
- Mountable even on a panel cutout 25.5mm in diameter.

Miniaturization

- Pushbuttons and selector switches with 1NO+1NC: 41mm deep
- Pilot lights: 37mm deep
- The transformer now occupies far less space.

Easy replacing contact block and transformer

- Because of a snap-on mounting, replacement or addition of the contact block and transformer unit is very simple.
- The contact block is common to all the pushbuttons of this series.
- Contact block is easily replaced even when the pushbuttons are mounted closely together.
- Replacement of the contact block can be done with a screwdriver, without the need for any special tool.

Wiring

- Wiring from two directions is possible.
- Wiring in both vertical and lateral directions facilitates wiring in narrow spaces.
- Color coding of contact blocks makes wiring easy. 1NO: Blue, 1NC: Red
- Lamp terminal and transformer unit: Black

Safety

- A terminal cover is provided, assuring safety and security.
- FUJI's original Trigger Action mechanism is used in the emergency stop pushbuttons. They are suitable for emergency stop and safety. This mechanism prevents the contacts from moving until the button is pushed and locked.
- Reliability of safety functions increased by integrated operator and contact block construction. (AR22VG)

Protection

- Excellent oil-tight construction (IP65) of the operator.
- Closure of the contact block has been improved.

■ Approvals

For further information related to approved type, see page 04/3 to 04/06.

Symbol mark	○	I	⊕	○	I	⊕	
Color of button	White	Black	White	Black	White	Black	Clear
Color of mark	Red		Green		Green		Black
Code	01	02	03	04	11	12	02B 04B 12B

⑥ Special product

Z9: Resisting water-soluble cutting oils and heat
Z8: With a contact protection cover
Z4: Resisting sulfuration gas
ZB: Meeting IP2X finger-protection standards

Notes: *1 Products with no trigger action mechanism. These products cannot be used as emergency stop switches that comply with EN standards.

*2 Button color of emergency stop switches are Red only.

• The manufacturing range varies depending on the model. For details, refer to the contents of this catalog.

Selector and illuminated selector switches

AR22 PL – 2 □ **10 E3 G** □ □
 ① ② ③ ④ ⑤ ⑥ ⑦ ⑧ ⑨

① **Product category**

AR22: 22mm dia. selector switch and illuminated selector switch

② **Operator**

- Selector switch
 - PR: Knob
 - PCR: Knob operated control type
 - WR: Lever
 - WCR: Lever operated control type
 - RR: Cylindrical knob
 - RCR: Cylindrical knob operated control type
 - JR: Key
 - JCR: Key operated control type
 - JAR: Key (Long durability)
 - PY: Knob with square bezel
 - PCY: Knob operated control type with square bezel
 - WY: Lever with square bezel
 - WCY: Lever operated control type with square bezel
 - RY: Cylindrical knob with square bezel
 - RCY: Cylindrical knob operated control type with square bezel
 - JY: Key with square bezel
 - JCY: Key operated control type with square bezel
- Illuminated selector switch
 - PL: Knob
 - PP: Knob with square bezel

③ **Operation**

- 2: 2-position, maintained
- 0: 2-position, spring return
- 3: 3-position, maintained
- 6: 3-position, spring/manual return (Left to center)
- 7: 3-position, spring/manual return (Right to center)
- 1: 3-position, spring return
- 4: 4-position, maintained (For AR22PCR, WCR, RCR)
- 5: 5-position, maintained (For AR22PCR, WCR, RCR)

④ **Key removable position**

- A: Left
- B: Left and right
- C: Left, right and center
- D: Right
- E: Center
- F: Right and center
- G: Left and center

- S: Blue (Not available for selector switch)

⑧ **Key type No.**

A, B, C, D, E or F
 ("A" is standard)

⑨ **Special product**

- Z9: Resisting water-soluble cutting oils and heat
- Z8: With a contact protection cover
- Z4: Resisting sulfuration gas
- ZB: Meeting IP2X finger-protection standards

Note: • The manufacturing range varies depending on the model. For details, refer to the contents of this catalog.

AR22 and DR22

Type number nomenclature

Pilot lights

DR22 D0L – E3 W □

① ② ③ ④ ⑤

① **Product category**

DR22: 22mm dia. pilot light

② **Lens**

D0L: Dome

E3L: Extended round

K0L: Faceted

F3M: Flush square

F4M: Flush square (Transparent lens)

F5M: Flush square (12mm high frame)

E3M: Extended square

E3N: Flush rectangular

E3P: Extended round with square bezel

③ **Lamp voltage**

• Incandescent lamp

54: 5.5V AC/DC, without transformer

C4: 15V AC/DC, without transformer

D4: 20V AC/DC, without transformer

E4: 24V AC/DC, without transformer

H4: 100-110V AC, with transformer

L4: 115-127V AC, with transformer

M4: 200-220V AC, with transformer

Q4: 230-254V AC, with transformer

S4: 350-380V AC, with transformer

T4: 400-440V AC, with transformer

V4: 480V AC, with transformer

W4: 500-550V AC, with transformer

• LED lamp

A3: 6V AC, without transformer

63: 6V DC, without transformer

B3: 12V AC/DC, without transformer

C3: 15V AC/DC, without transformer

E3: 24V AC/DC, without transformer

H3: 100-110V AC, with transformer

L3: 115-127V AC, with transformer

M3: 200-220V AC, with transformer

Q3: 230-254V AC, with transformer

S3: 350-380V AC, with transformer

T3: 400-440V AC, with transformer

V3: 480V AC, with transformer

W3: 500-550V AC, with transformer

H7: 110V DC, with resistor unit

58: 5.5V AC/DC, short-body without transformer

C8: 15V AC/DC, short-body without transformer

D8: 20V AC/DC, short-body without transformer

E8: 24V AC/DC, short-body without transformer

H8: 100-110V AC, short-body with transformer

L8: 115-127V AC, short-body with transformer

M8: 200-220V AC, short-body with transformer

A9: 6V AC, short-body without transformer

69: 6V DC, short-body without transformer

B9: 12V AC/DC, short-body without transformer

C9: 15V AC/DC, short-body without transformer

E9: 24V AC/DC, short-body without transformer

H9: 100-110V AC, short-body with transformer

L9: 115-127V AC, short-body with transformer

M9: 200-220V AC, short-body with transformer

④ **Color of lens**

G: Green

Y: Yellow

R: Red

A: Orange

W: White

S: Blue

⑤ **Special product**

Z9: Resisting water-soluble cutting oils and heat

Z4: Resisting sulfuration gas

ZB: Meeting IP2X finger-protection standards

Note: • The manufacturing range varies depending on the model. For details, refer to the contents of this catalog.

Joy stick selector switches

AR22A 0 N – A0A0 B

① ②③ ④ ⑤

① **Product category**

AR22A: 22mm-dia. Joy stick selector switch

② **Handle**

- 0: Ball type (without lock, manual return)
- 1: Ball type with lock (manual return)
- 2: Rubber cap type (without lock, manual return)
- 5: Ball type (without lock, spring return)
- 6: Ball type with lock (spring return)
- 7: Rubber cap type (without lock, spring return)

③ **Terminal**

- N: Screw
- H: Solder/tab

④ **Contact arrangement**

Contact arrangement	Blank	1NO	1NC	1NO+1NC	2NO	2NC	2NO+2NC
Code	Screw	0	A	B	1	D	E
	Solder/tab	0	-	-	1	-	2

Operating direction code of contacts

Ex. AR22A0N-A 0 A 0 B
1 2 3 4

⑤ **Handle color**

- B: Black

■ **Ordering information**

Specify the following:

1. Type number

For the CCC approved product, add the suffix **(CCC)** to the type number

Example: Pushbutton switch **AR22F0R-11B(CCC)**

Buzzers

DR22B 5 – E B

① ② ③ ④

① **Product category**

DR22B: 22mm-dia. buzzer

② **Sound**

- 5: Electronic sound
- 3: Magnetic sound
- 8: Electronic sound (IP54)

③ **Operating voltage**

- A: 6V AC (Type "5", "8")
- 6: 6V DC (Type "5", "8")
- E: 12-24V AC/DC (Type "5", "8")
- F: 35-48V AC/DC (Type "5", "8")
- H: 100-110V AC
- M: 200-220V AC
- 1: 100-110V DC (Type "5", "8")

④ **Color of head**

- B: Black

Pushbuttons/Selectors/Pilot Lights/Buzzers AR22 and DR22 Ratings and specifications

■ Lamp durability

Lamp	Durability (reference)	Judgement criterion
LED	Approx. 30000h	When brightness is less than 50% of initial value
Incandescent	Approx. 5000h (AC)	When the bulb burns out
Neon	Approx. 5000h	When a remarkable blackening appears in the glass bulb and the using becomes improper

Notes: • The operating voltage for incandescent lamps is set at 80 to 90% of the lamp's rated voltage.
• The durability of LED lamp is a mean value in all colors.

Estimated durability for LED lamps

Notes: • Durability at $T_a=25^{\circ}\text{C}$
• Durability is affected by temperature, humidity, and voltage fluctuation.

■ Combination of lens color and LED or neon lamp luminous color

Lens Color	Code	LED or neon lamp Luminous color	Type
Green	G	Green	APX510-■G
Red	R	Red	APX510-■R
White	W	Orange	APX510-■O
Yellow	Y	Yellow	APX510-■Y
Orange *	A	Amber	APX510-■A
Blue	S	Blue	APX510-■S
Red (AR22VGF)	R	Red	AR9L002-ER
		Orange (Neon lamp)	AR9N001-■A

Notes: * DR22F4M: LED lamp color is orange. (APX510-■O)
• Replace the ■ mark by the lamp voltage code

		With resistor unit	100 to 110V DC Discontinued	DR22B8-1B

- Notes:
- Intermittent/continuous sound selection (DR22B5, B8)
See the "Short-circuit terminal" in the dimensions diagram on the 04/49 page, and select as follows:
 - Short-circuit terminal mounted → Intermittent sound
 - Short-circuit terminal not mounted → Continuous sound

- Sound volume adjustment (DR22B3)
Use a flat-bladed screwdriver with a narrow tip to gently turn "Control knob" shown in the dimensions diagram on the 04/49 page, as follows.
- Clockwise → Increase sound pressure
- Counterclockwise → Decrease sound pressure

Pushbuttons/Selectors/Pilot Lights/Buzzers AR22 and DR22 Notes on use

Notes on use

■ Fit two sizes of panel cutout holes

* The unique nut with a step allows switch to be mounted in either 22.3mm- or 25.5mm-dia. holes as shown in Fig. 1 without any extra adapter.

Fig. 1 Panel cutout

The switch mounted as a $\phi 22$ mm diameter unit.

The switch mounted as a $\phi 25$ mm diameter unit.

Note: * If key-washer or legend plate are not used, 3.2mm-wide location holes need not be cutout.

■ Detaching contact block from the operator

While keeping the white release arm pressed with one finger, pull-out the contact block in the direction by the arrow.

Fig. 2 Detaching contact block from the operator

■ Mounting operator to panel

① In a 22.3mm-dia. panel cutout hole
Insert the operator into the cutout hole from the panel front as shown in the Fig. 3.
Then, fit section "A" of the AR9A004 wrench from behind the panel and secure the operator with nut. (See page 04/108 for the wrench)

Fig. 3 Mounting an operator in a 22.3mm-dia. hole

Note: Recommended tightening torque is from 1 to 1.5N•m

② In a 25.5mm-dia. panel cutout hole

As shown in Fig. 4, with the nut step-out side oriented to the panel, use the wrench to tighten the nut and secure the operator.

Fig. 4 Mounting a operator in a 25.5mm-dia. hole

Note: 1. Recommended tightening torque is from 1 to 1.5N•m
2. Ensure that the step-out portion of the nut is correctly fitted in the cutout hole.

For easier mounting in the 25.5mm-dia. hole, the AR9Y718 adapter is also available separately.

Fig. 5 Mounting with an adapter and locking nut

■ Mounting contact block to the operator

As shown in Fig. 6, align the protruding part of the contact block release arm with the operator groove at the ∇ mark. Then, insert the contact block into the operator until it clicks.

Fig. 6 Mounting the contact block to the operator

■ **VG type panel mounting**

As shown in the illustration, remove the live section cover, nut, and washer, and insert the main unit into a panel which has been cut from the front side of the panel. Place the type number AR22 facing upward, and secure the main unit with the nut using a wrench AHX701. The appropriate tightening torque is 1 to 1.5N•m.

Fig. 7

■ **Joy stick selector switch mounting on panel**

- (1) Twist and remove the ball from the operator.
- (2) Loosen the nut and remove the switch if the switch is provided with a lock.
- (3) If no locking nut is provided, loosen the nut and remove the switch after the packing part (A) shown in the illustration is stretched to the lever groove.
- (4) Mount the switch in the order opposite to removal. Set the packing to the notch on the lever as a reference. Do not separate the nut from the packing.
- (5) Use a torque wrench AR9A006 to tighten the nut from the front of the panel.

Note: Recommended tightening a torque is 1 to 1.5N•m.

Fig. 8

■ **Buzzer mounting on panel**

- (1) Remove the nut, and insert the main unit into the mounting hole from the back of the panel.
- (2) Tighten the buzzer using a wrench AR9A006 from the front side of the panel.

Note:

- Recommended tightening torque is 1 to 1.5N•m.
- Electronic sound (IP54) type has a all-in-one unit with nut and cap.

■ **Applicable panel thickness**

The AR22/DR22 series switches are mountable to panels with thickness as given in Table below.

Mounting condition		Applicable panel thickness (mm)	
Without accessories		1 to 6	
With accessories	Protective cover, water-proof cap, legend plate	1 to 4	
	Key washer	without hole	1 to 4
		with hole	1 to 5
	Adapter for a 25.5mm-dia. hole		1 to 5.5

- When using a joy stick selector switch and buzzer
 The applicable panel thickness is 1 to 6mm. Five 1.3mm packings (single-piece type) are included as standard equipment. Insert as many as required depending on the panel thickness, using the following table as a guide. When using a key washer, legend plate, or adapter, their thickness will have to be added to the values in the guide.

Panel thickness (mm) (plus key washer, legend plate)	Number of packings (reference)
1.0 to 1.6	5
1.6 to 2.8	4
2.8 to 3.8	3
3.8 to 4.8	2
4.8 to 6.0	1

04

Pushbuttons/Selectors/Pilot Lights/Buzzers

AR22 and DR22

Notes on use

■ Minimum mounting space, mm

(1) Minimum mounting space

Fig. 9

- Notes:
- *1 AR22M0□, M5□, V5□, V0□, V2□, V7R, VG□: 42mm
AR22M3R, M8R: 49mm
AR22Q2R, WR, W0R, WY, WCY: 40mm
 - *2 When mounting contact blocks at 30mm pitch, use it circuit of 380V or less.
 - *3 Short body with transformer types: 50mm.
 - *4 Rectangular types: 36.5mm (except for short body without transformer types).
 - *5 Short body without transformer types: 60mm.
 - *6 Rectangular short body without transformer types: 60mm.
 - *7 This dimension applies when transformer units or contact blocks face each other.
 - *8 This dimension applies when transformer unit or contact block is mounted on only one side.

When mounting operators on a panel, orient all ▽ marks on the operator upwards.

(The operator release arms are oriented upwards.) This aligns the terminals of all contact blocks, thus making wiring easy.

(2) Detaching contact blocks from operators

As shown in Fig. 10, insert a flat-head screw driver into the groove of the white release arm on the contact block. Then, while inserting the driver in hole A of the operator base, lower the driver grip and take out the contact block.

Fig. 10

Note: Use a flat head screwdriver as shown at the right.

■ Products with blue and green LEDs

The LED devices on products with high-brightness (blue and green) LEDs are very sensitive to static electricity. When replacing LED lamps do not allow static electricity to come into direct contact with the metal frame on the upper side of the LED lamp. The LED device may be damaged if this part is subjected to static electricity. When installing or removing an LED lamp, it is recommended that you use the lamp changer (AHX790).

Fig. 11

■ Wiring

(1) The terminal screws are M3.5 pan head screws. Solid wires, stranded wires, or crimp terminals can be connected.

Fig. 12

(2) Two crimp terminals can be used by putting one of them on top of the other. If fork-type crimp terminals are used in the horizontal direction, however, use ones as shown in the figure below. (i.e., Toei Tanshi's F2-3.5S or an equivalent).

Fig. 13

- (3) The terminal washers are a self-lifting type.
- (4) Tighten the terminal screws to a tightening torque of 0.8 to 1N•m.
- (5) Keep the terminals free of external force while wiring or after wiring, or operational failures may result.
- (6) Do not use screws other than the provided terminal screws.

Notes:

- If solid wires are connected to the lamp terminals in the horizontal direction (on the side), be sure to insert the solid wires into the square washers.
- Terminal layout., see page 04/54
- See page 04/53 for the wiring of the joy stick selector switch and VG type.

■ LED Indicator

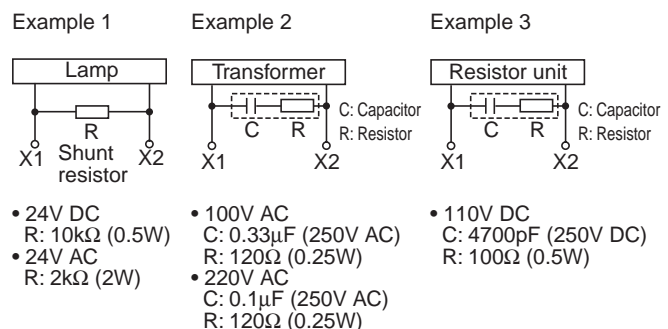

(1) LED Lamp Malfunctioning

The LED lamp is lit by a very small level of current. Therefore, it may be erroneously lit by a leaking current from the surge absorption circuit or semiconductor circuit or due to stray capacitance between cables. In that case, provide a countermeasure (e.g., connect a resistor in parallel with the LED lamp).

• Countermeasure for Malfunctioning

The LED lamp malfunctions can be prevented by connecting a shunt resistor (R) or CR elements (a capacitor and resistor) in parallel with the LED lamp terminal. The resistance and CR values vary depending on the model and the operating conditions.

Fig. 14

- 24V DC
R: 10kΩ (0.5W)
- 24V AC
R: 2kΩ (2W)
- 100V AC
C: 0.33μF (250V AC)
R: 120Ω (0.25W)
- 220V AC
C: 0.1μF (250V AC)
R: 120Ω (0.25W)
- 110V DC
C: 4700pF (250V DC)
R: 100Ω (0.5W)

(2) Incoming surge

High luminance LED products use an element sensitive to static electricity. They may not be lit by an abnormal voltage like surge. Please note it.

■ Joy stick selector switch

- Screw terminal wiring
- (1) The terminals use M3.5 pan head screws. Use crimp terminals to wire the terminals.

Fig. 15

- (2) The terminal washers are a self-lifting type.
- (3) Tighten the terminal screws to a tightening torque of 0.8 to 1.0N•m. Keep the terminals free of external force during and after wiring, or operational failures may result.

• Solder (tab terminal) wiring

- (1) Pay attention to the following items when soldering the terminals.
 - Use a soldering iron with a power consumption of 30W. Use resin-core solder.
 - If a 30W soldering iron is used, finish soldering the terminals within five seconds. If a 20W soldering iron is used, finish soldering the terminals within 10 seconds. Make sure that the soldering iron tip length is at least 20mm long. Do not apply external force to the terminals. Because lead-free solder's melting point is slightly high, soldering work may be difficult. Use a soldering iron whose tip is rather large or whose calorific value is rather high.
- (2) When using adjacent terminals, use insulation tubes to prevent the terminals from short-circuiting. Utmost attention must be paid to the solder terminals if especially thick wires are used or if a large quantity of solder is used.
- (3) Connectable wires
 - Solid wire: 2 wires, 0.8mm dia. max.
 - Stranded wire: 1 wire, 0.75mm² max.
- (4) Use the 110 (2.8mm) series receptacle for the tab terminals.
- (5) Wire the tab terminals with the contact unit connected to the main unit.

• Operation

Operation shall be made after the joy stick operation lever is surely returned to the center position. Do not apply excessive force to the operation lever. The maximum permissible force is 100N.

• Use of contact blocks

If NO and NC contacts are used in the same contact block, check that there is no difference in potential. Do not connect different type of power source different in type.

■ Buzzer

- Noise
- If the application circuit is likely to generate excessively strong noise, connect a surge absorber (e.g., FUJI's ENC390D, provided that the switch is a 24V type) in parallel with the buzzer.

• Place of Use

The buzzer does not have a drip-proof construction. Do not use the buzzer in places where oil or water is sprayed or where dust accumulates. If the buzzer is a splash-proof type, it will resist sprays of water.

- Do not use the buzzer in places that are subject to an excessive amount of corrosive gas.
- Note that the buzzer is likely to sound erroneously due to leakage current or the like.

■ AR22VG type

- As shown in Fig. 16 (a), engage the tip of the wrench (AHX8003) with the groove in the center to mount or remove the locking unit. The recommended tightening torque is 0.6 to 1N•m.

- As shown in Fig. 16 (b), insert the lamp changer (AHX790) and press the lamp changer to mount or remove the lamp. Turn the lamp changer clockwise when mounting the lamp and counterclockwise when removing it.

Fig. 16

Note: The lamp and neon lamp are special models for the AR22VGF. Use only these special lamps for replacement.

• Wiring

The terminals use M3.5 pan head screws. Use crimp terminals for wiring and cover the crimp terminals with insulation tubes.

Fig. 17

- The terminal washers are a self-lifting type.
- Tighten the terminal screws to a torque of 0.8 to 1N•m. Keep the terminals free of external force during and after wiring, or operational failures may result.
- Wiring precautions
 - (1) Use of round-type crimp terminal
 - Remove the live section cover, and half-tighten to the point parallel with the terminal rib white marks in the direction of the arrows as shown in the illustration below.
 - Mount the live section cover and tighten the terminals securely.

Fig. 18

As shown in the illustration below, mount the live section cover so that the mounting legs of the cover engage with the concave parts of the main unit.

Fig. 19

- (2) If fork-type crimp terminals are used, wiring will be possible without removing the live section cover.

Pushbuttons/Selectors/Pilot Lights/Buzzers

AR22 and DR22

Notes on use

■ Operation

- Do not use a hitting or bouncing action to operate the button, or the switch may break. Always operate the switch by hand. Do not pull mushroom head pushbuttons or alternate buttons other than the Q2.
- Do not rotate the selector ring type while the button is pressed, or the mechanism may break.
- The control type incorporates make-before-break contacts. Prepare a protection circuit for the application.
- The dial of the selector switch rotates with a light force. Do not apply force in excess of 1N•m. Please do not pull out or insert the key forcibly.
- To release the lock of the push-lock type, rotate the button clockwise as shown by the arrow. Do not pull the button, or the latch may break and the lock may fail to work.
- Do not lock the emergency stop pushbutton switch and emergency stop illuminated pushbutton switch in use. Push and lock the switch in case of an emergency only.

■ Terminal layout

Fig. 20

The full range of the contact blocks and transformer units suitable for the AR22 and DR22 series may also be fitted to the AR30 and DR30 series.

■ **Features**

Quick-replacement contact blocks and transformer units

The snap-on construction makes replacement and addition of contact blocks and transformer units very simple and straightforward.

Oil-and dust-proof operator module construction

The protection level of the AR30/DR30 operator modules conforms to IEC Standard IP65. The special seals protect the operator modules and switch mechanisms against oil, dust, and grime, thus ensuring high performance in dusty and moist environments.

Miniaturization

- Selector switches with 1NO+1NC: 41mm deep
- Pilot lights: 34mm deep
- The transformer now occupies far less space.

Self-cleaning contacts

All the contacts are double break type and feature self-cleaning action. Every time the switch is operated, the contact surfaces are wiped with a sliding movement, thus ensuring high contact reliability even at low voltage and small current levels (5V, 5mA).

Metal nut

Safer model with metal nut is also available

Wiring

- Wiring from two directions is possible.
- Wiring in both vertical and lateral directions facilitates wiring in narrow spaces.
- Color coding of contact blocks makes wiring easy. 1NO: Blue, 1NC: Red
- Lamp terminal and transformer unit: Black

Safety

- A terminal cover is provided, assuring safety and security.
- FUJI's original Trigger Action mechanism is used in the emergency stop pushbuttons. They are suitable for emergency stop and safety. This mechanism prevents the contacts from moving until the button is pushed and locked.

Protection

- Excellent oil-tight construction (IP65) of the operator.
- Closure of the contact block has been improved.

■ **Approvals**

For further information related to approved type, see page 04/56 to 04/59.

AR30A: 30mm-dia. Joy stick selector switch

② Handle

- 0: Ball type (without lock, manual return)
- 1: Ball type with lock (manual return)
- 2: Rubber cap type (without lock, manual return)
- 5: Ball type (without lock, spring return)
- 6: Ball type with lock (spring return)
- 7: Rubber cap type (without lock, spring return)

③ Terminal

- N: Screw
- H: Solder/tab

④ Contact arrangement

Contact arrangement	Blank	1NO	1NC	1NO+1NC	2NO	2NC	2NO+2NC	
Code	Screw	0	A	B	1	D	E	–
	Solder/tab	0	–	–	1	–	–	2

Operating direction code of contacts

Ex. AR30A0N-A0A0B
1 2 3 4

⑤ Handle color

- B: Black

■ Ordering information

Specify the following:

1. Type number

For the CCC approved product, add the suffix **(CCC)** to the type number

Example: Pushbutton switch AR30F0R-11B**(CCC)**

Buzzers

DR30B 5 – E B

① ② ③④

① Product category

DR30B: 30mm-dia. buzzer

② Sound

- 5: Electronic sound
- 6: Electronic sound (economy)
- 0: Magnetic sound
- 8: Electronic sound (IP54)

③ Operating voltage

- A: 6V AC (Type "5", "8")
- 6: 6V DC (Type "5", "8")
- E: 12-24V AC/DC (Type "6" : 24V DC)
- F: 35-48V AC/DC (Type "5", "8")
- G: 24V AC (Type "6")
- H: 100-110V AC
- M: 200-220V AC
- 1: 100-110V DC (Type "5", "8")

④ Color of head

- B: Black

Pushbuttons/Selectors/Pilot Lights/Buzzers

AR30 and DR30

Ratings and specifications

■ Lamp durability

Lamp	Durability (reference)	Judgement criterion
LED	Approx. 30000h	When brightness is less than 50% of initial value
Incandescent	Approx. 5000h (AC)	When the bulb burns out

Notes: •The operating voltage for incandescent lamps is set at 80 to 90% of the lamp's rated voltage.
•The durability of LED lamp is a mean value in all colors.

Estimated durability for LED lamps

Notes: • Durability at $T_a=25^{\circ}\text{C}$
• Durability is affected by temperature, humidity, and voltage fluctuation.

Incandescent lamp voltage characteristics

■ Combination of lens color and LED luminous color

Button color (lens or color plate)		LED lamp (high-brightness)			LED lamp (high-brightness)

Notes on use

■ **Panel cutout hole**

Fig. 1 Panel cutout hole dimensions, mm

Note : If key-washer or legend plate are not used, 4.8mm-wide, location holes shown in Fig. 1 need not be cutout.

■ **Mounting operator to panel**

1. Pushbutton with a round bezel (ordinary mounting)

Insert the operator into the cutout hole from the back of the panel, and tighten the nut with the AHX001 wrench from the front of the panel to secure the operator as shown in Fig.2.

Fig. 2 Pushbutton with a round bezel

Note : Recommended tightening torque is from 1.5 to 2N•m.

2. AR30V0R, V0L, V2R, V2L, V5R, V5L

- (1) The button is removed after loosening the center button by inserting the end of the AR9A002 tightening wrench or the AR9A005 wrench (enclosed with pushbutton) into the holes in the center button and turning counterclockwise, as shown in Fig.3.
- (2) Attach the operator in the same manner as described in step 1.

Fig. 3

Insert the operator into the cutout hole from the back of the panel, and as shown in Fig.4, insert the pushbutton into the operator cylinder while aligning the grooves inside the pushbutton with the protrusions on the operator.

Fig. 4 Setting pushbutton to operator cylinder

3. AR30WR, WCR

- (1) As shown in the following figure, insert the tip of a flathead screwdriver into the selector tip groove. Rotate the screwdriver in the direction indicated by the arrow until the selector tip rises, and draw out the knob.
- (2) Attach the operator in the same manner as described in step 1.
- (3) Insert the knob, with the selector tip in the floated state, into the original position of the rotation tube, and push the selector tip into place.

Fig. 5

4. AR30M0R, M4R, M5R, B0R, Q7L

- (1) Loosen the button by hand.
- (2) Attach the operator in the same manner as described in step 1.
- (3) Screw in the button by hand, making sure that the button is screwed in all the way. (Recommended tightening torque: 0.3 to 0.5 N•m)

Fig. 6

5. AR30M3R, M8R, B1R, B2R and B3R

The outer circumference of the nut is threaded, so be careful not to cut your hand on it.

- (1) Loosen and remove the guard ring by hand.
- (2) Loosen and remove the button and nut by hand.
- (3) Insert the operator into the cutout hole from the back of the panel, and tighten the nut to secure it in place. (Recommended tightening torque: 0.3 to 0.5 N•m)
- (4) Screw in the button by hand, making sure that it is screwed in all the way. (Recommended tightening torque: 0.3 to 0.5 N•m)
- (5) Loosen and remove the guard ring by hand. (Recommended tightening torque: 1.5 to 2.5 N•m)

Fig. 7

6. AR30N0R, V1R, Q2R

- (1) Loosen and remove the screw on the side of the button, taking care not to loosen the screw.
- (2) Attach the operator in the same manner as described in step 1.
- (3) Attach and secure the button in place with the screw, making sure that the head of the screw does not protrude from the side.
- (4) Recommended tightening torque: N0R, V1R 0.5 to 1.0N•m
Q2R 0.3 to 0.5N•m

Fig. 8

7. AR30GSR

- (1) Insert the tips of the AR9A001 wrench into the indentations around the button center, and turn the wrench to loosen and remove the button.
- (2) Loosen and remove the guard ring by hand.
- (3) Insert the switch operator into the cutout hole from the back of the panel, and secure it with the guard ring from the front of the panel. (Recommended tightening torque: 1.5 to 2.5 N•m)
- (4) Attach and secure the button with the AR9A001 wrench. (Recommended tightening torque: 0.3 to 0.5 N•m)

Fig. 9

8. DR30F4M, F4N, M4M

Insert the pilot lights from the front of the panel and fix it with the AHX536 tightening wrench from the back of the panel.

- (1) Recommended tightening torque: 1 to 1.5N•m
- (2) For pilot lights with transformers and resistance units, remove the transformer or resistance unit in advance. (Fig.10)

Fig. 10

9. Mounting a 22mm-dia. command switch with a square button and a square bezel, or with a round button and a square bezel, to a panel cutout hole for a 30mm-dia. command switch using an adapter

As shown in Fig. 11, mount an adapter and packing onto a 22mm-dia. command switch (AR22, DR22 series) with a square button and a square bezel or one with a round button and a square bezel. Then, insert the switch operator into the panel cutout hole from the front of the panel. Use AR9A004 wrench section A to tighten the locking nut from behind the panel to secure the switch.

Use the adapter accessory nut for this purpose. Do not use the command switch accessory nut.

Fig. 11 Command switch with a square button and a square bezel, and command switch with a round button and a square bezel

Note : • Recommended tightening torque is from 1 to 1.5N•m.
• Panel thickness: 2.5 to 5mm

This adapter can be used with the following 22mm-dia. Command switches :

- AR22F0M, F5M, E0M, E5M, F0P, F5P, E0P, E5P, M4P
- AR22F0S, F5S, E0S, E5S, F0Y, F5Y, E0Y, E5Y, M4Y
- AR22PY, PCY, WY, WCY, RY, RCY, JY, JCY, PP
- DR22F3M, F4M, F5M, E3M, E3P

10. AR30S1R, S2R, S3R, S6R

- (1) Attach the operator in the same manner as described in step 1.
- (2) Attach the rosette assembly to the operator.
- (3) Pressing the rosette from the directions indicated by the arrows, insert the selector tip in the groove.
- (4) Make sure that the selector tip is inserted completely.
- (5) To remove the rosette, use a small flathead screwdriver to remove the selector tip as described in step 3, and then remove the rosette.

Fig. 12

11. AR30A (joy stick selector)

- (1) Remove the clamp ring as shown in the following figure.
 - (2) Attach the operator in the same manner as described in step 1.
- Note: Even if a lock type is used, remove the clamp ring in the same manner.

Fig. 13

12. AR30HR

- (1) The lever is removed after loosening the nut by hand.
- (2) Loosen and remove the tightening nut by hand.
- (3) Insert the operator into the cutout hole from the back of the panel, and tighten the tightening nut with the AHX001 wrench or AR9A006 wrench from the front of panel to secure the operator as shown in Fig. 14. (Recommended tightening torque : 1.5 to 2.5N • m)
- (4) Attach the lever assembly to the operator.
- (5) Screw in the nut by hand, making sure that it is screwed in all the way.

Fig. 14

Water-proof and dust-proof cap

Applicable type: Water-proof cap AHX052
 Dust-proof cap AHX032, 033, 034, 113, 157

When attached to the panel in combination with a water-proof or dust-proof cap, the water-proof cap or dust-proof cap may sink downward and prevent the depressed button from returning to its original position.

As shown in the following figure, cut an approximately 5-mm air outlet in the portion of the ring packing touching the panel surface. Also, reduce the number of packing rings by one below the standard number. The clamp ring tightening torque is 1.5 to 2.5 N•m.

Fig. 15

Degree of protection

The water-proof cap or dust-proof cap seals the panel surface to provide IP65 protection.

Applicable panel thickness

The AR30/DR30 series switches are mountable to panels with the thickness given in the table below.

Switch mounting condition	Applicable panel thickness
Without accessories	1 to 6mm
With accessories	AR9Y003 adapter 2.5 to 5mm

Using accessory ring-packings

Use the required number of ring-packings (1.6mm-thick, 4 pieces, resin mold).

Table below is a guideline for using the packings.

If a locking nut or legend plate is used, the thickness must be counted as an additional panel thickness.

Panel thickness vs. number of packings (reference data)

Effective panel thickness including lock-ring and legend plate thicknesses	Number of packings
1.0mm to less than 2.0mm	4
2.0mm to less than 3.6mm	3
3.6mm to less than 5.0mm	2
5.0mm to less than 6.0mm	1

Minimum mounting space, mm

The minimum mounting spaces required for AR30/DR30 command switches are given below. (Fig. 16)

Fig. 16

- Illuminated pushbutton and pushbutton
- Emergency stop illuminated pushbutton and emergency stop pushbutton
- Illuminated and non-illuminated selectors
- Pilot light

Notes: *1 AR30M3R, M8R, GSR: 55mm
 *2 AR30B□R, GPR, V1R: 80mm

Type	*3	*4
F4M	34	34
F4N (Vertical lengthwise mounting)	40	34
(Horizontal lengthwise mounting)	34	40
M4M	40	40
Pilot lights short-body with transformer	50	42
Pilot lights with resistor	80	42

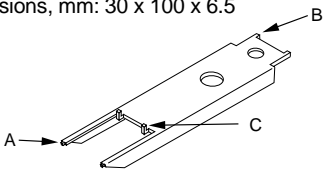

Other items are the same as for the AR22 and DR22 series, see page 04/50 to 04/54.

Accessories

■ Accessories

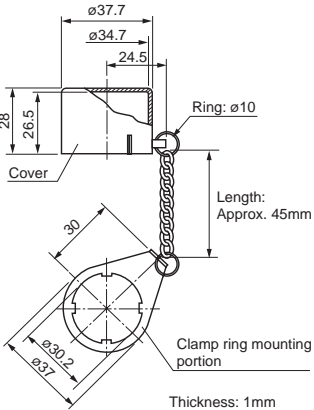

Description	Type
Wrench	AR9A004 Dimensions, mm: 30 x 100 x 6.5   Remarks Section "A" Use this section to tighten the nut for mounting the operator on a panel. Section "B" Use this section to tighten or remove the lens. Applicable type: AR22F0L, F5L, E0L, E5L, F0P, F5P, E0P, E5P AR22G1L, G2L, G4L, G6L, G7L, G9L DR22E3L, E3P AR30E0L, E5L, G2L, G3L, G4L, G7L, G8L, G9L DR30E3L Section "C" Fit the tabs on the section "C" in the center button, and turn the wrench to tighten or remove the button. Applicable type: AR22V (except V4R, VG type) AR30V (except V1R type)
Wrench for AR22, DR22	AR9A701 Dimensions, mm: $\varnothing 28 \times 70$ Application: AR22, DR22 nut tightening
Wrench	AHX536 Dimensions, mm: $\varnothing 32 \times 76$ Application: DR30F4M, F4N, M4M, N1, N2 nut tightening
Wrench	AR9A001 Dimensions, mm: $\varnothing 22 \times 35$ Application: AR22, DR22 round-type lens tightening AR22E0M, E5M oil-proof cap tightening AR30, DR30 round-type lens tightening AR30GSR button tightening
Wrench (for center button)	AR9A002 Dimensions, mm: $\varnothing 18 \times 60$ Application: AR22V center button tightening (except V4R, VG type) AR30V center button tightening (except V1R type)
Wrench	AHX701 Dimensions, mm: $\varnothing 25 \times 72.5$ Application: DR22N, AR22VG nut tightening

Description	Type
Wrench (for center button)	AHX8003 Dimensions, mm: $\varnothing 14 \times 50$ Attaching and removing the center button of the AR22VGF type. 
Wrench for AR22,30 and DR22, 30	AR9A006 Dimensions, mm: $\varnothing 40 \times 100$ To mount an AR22, 30 or DR22, 30 command switch to a panel, use this wrench to tighten the nut securely. It is very easy to fit this wrench onto the nut. The wrench with an inside rubber-lining can be easily used with either your right or left hand. 
Wrench for AR30, DR30	AHX001 Dimensions, mm: $\varnothing 47 \times 100$ To mount an AR30 or DR30 command switch to a panel, use this wrench to tighten the nut securely. 
Special tool	AHX321 Dimensions, mm: 42 x 130 x 6.5 For all types except pilot lights DR9A321-T Dimensions, mm: 57 x 130 x 30 For pilot lights <ul style="list-style-type: none"> This tool is used to remove contact blocks and transformer units. The AHX321 can remove round color lens of switches.  
Wrench/Lamp changer	AHX702 Dimensions, mm: $\varnothing 36 \times 55$ Use this wrench to tighten or remove the lens and lamp. Used with: Lens of DR22D0L, K0L and DR30D0L, K0L Incandescent lamp of pilot lights and illuminated pushbuttons 
Lamp changer	AHX790 Dimensions, mm: $\varnothing 14 \times 55$ <ul style="list-style-type: none"> Use this rubber wrench for mounting or removing lamps from pilot lights and illuminated pushbutton switches. This wrench can be used for both LED and incandescent lamps. One end is for the BA9S/13 lamp, and the other is for the E12/15 lamp (for use with 30mm dia. pilot lights with resistor). For 30mm dia. pilot lights with resistor, this tool can also be used to attach or remove incandescent lamps. 

Description	Type
Protection cover	AR9E760 This cover protects against accidental operation. The cover lid is returned home with a spring force. (Packing is provided) Used with: AR22F0L, F5L, E0L, E5L, F0M, F5M, E0M, E5M, F0P, F5P, E0P, E5P AR22F0R, F5R, E0R, E5R, F0S, F5S, E0S, E5S, E0Y, E5Y, F0Y, F5Y, FAR, FBR, EAR, EBR Dimensions, mm: 

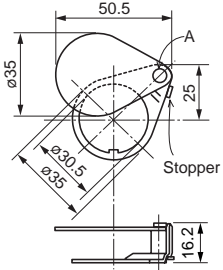

AF95-29

Cover for preventing operating errors with 30mm dia. types	AR9E538 Inadvertent operation can be prevented by fitting a transparent cover with chain in the clamp ring. Used with: AR30F0R, F5R, E0R, E5R, E0L, E5L Dimensions, mm:  Cover Ring: $\phi 10$ Length: Approx. 45mm Clamp ring mounting portion Thickness: 1mm
--	--

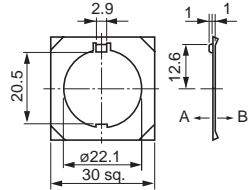

AF91-671

Cover for preventing operating errors with 30mm dia. types	AHX408 This is a metallic cover for preventing inadvertent operation. Used with: AR30F0R, F5R Dimensions, mm:  When attaching the cover to a vertical panel, if you attach it so that the portion indicated by an "A" is at the upper right, the stopper causes the cover to stop above the push button to halt further rotation. The material is steel (zinc plated).

.AF93-420

Description	Type
Key washer for AR22, DR22	AR9Y715 Use this metal washer when securing a operator in a 22.3mm dia. panel cutout hole. Dimensions, mm: 

AF95-25

- When the periphery of the panel cutout has a hole to stop rotation, use with side A contacting the panel (except for Joy stick selector types).
- Even when the periphery of the panel cutout does not have a hole to stop rotation, if used with side B contacting the panel it can serve as a washer for eliminating play (except for Joy stick selector types).

Key washer for $\phi 30$	AHX082 Use this metal washer when securing an operator in a 30.5mm dia. panel cutout hole. Dimension, mm: 
--------------------------	---

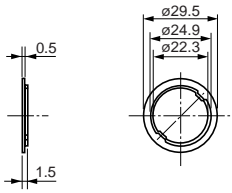

SC-1016

Operator base cover	AR9Y002 Attach this cover to the operator base of a pushbutton switch with only one contact block (1NO or 1NC) to protect against dust.
---------------------	---

AF95-26

Adapter for AR22, DR22	AR9Y718 Use this resin adapter to mount the AR22/DR22 (switch/pilot light) in a 25.5mm dia. cutout hole on a panel. Dimensions, mm: 
------------------------	---

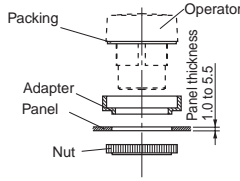

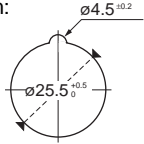

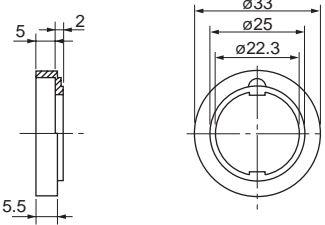

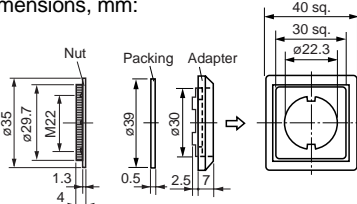

.AF95-28

Pushbuttons/Selectors/Pilot Lights

AR22/DR22 and AR30/DR30

Accessories

Description	Type
Adapter for AR22 and DR22 	AR9Y008 Use this resin adapter to mount the AR22/DR22 (switch/pilot light) in a 25.5mm dia. cutout hole on a panel. Mounting, mm:  Panel cutout, mm:  Equipped with device for stopping rotation Used with: AR22, DR22 round head types (except for M3R, M8R, VG□, joy stick selectors and buzzers) Dimensions, mm: 
Adapter for AR30 and DR30 	AR9Y003 Mount this adapter onto a 22mm dia. command switch with a square bezel to obtain a 30mm dia. command switch with a square/round button and a square bezel. A resin ring-packing and a nut are accessories of the adapter. Dimensions, mm:  Note: Panel thickness: 2.5 to 5mm

AF98-198

AF95-416

Description	Type
Round-frame adapter for 30mm dia. types 	AR9Y004 By using this adapter in combination with the round type 22mm dia. command switch, the 22mm dia. command switch can be used as a 30mm dia. command switch/round frame type. Used with: AR22, DR22 round types (except for M3R, M8R, VG□, Joy stick selectors, buzzers) Dimensions, mm  Note: Panel thickness: 2.5 to 5mm
Round-frame adapter for 30mm dia. type VG 	AHX958 Using this adapter in combination with model AR22VG (22mm dia.) allows mounting to a 30.5mm panel cutout hole. The attachment method is as follows. <ul style="list-style-type: none"> • The washer and nut (22.3mm dia.) originally attached to the operator will not be used, so remove them. • Attach the 22mm dia. packing (included), the 30mm dia. adapter and the 30mm dia. packing to the operator in that order, and insert the operator into the cutout hole. • From the back of the panel cutout hole, fasten the 30mm-dia. nut using the AHX701 wrench. The correct tightening torque is 1 to 1.5 N•m.  <p>*1 Adapter for 30mm dia. (AHX958)</p> Panel cutout, mm:  Dimensions, mm:  Note: Panel thickness: 1 to 6mm

Description	Type		
Base unit for transformer separate mounting	AR9T003 Use this base in combination with a transformer unit. This base unit can be mounted using screws or rails. Dimensions, mm 		
 KK02-118A	* Except for the types 110V AC, 127V AC and 220V AC.		
Resistor Voltage stabilizer Device for LED lamp flickering	Resistor: AR9T519-H (110V DC) Fit this resistor when using LED of 24V DC rating with 110V DC power. Voltage stabilizer: AR9T001-E This unit allows an LED lamp of 24V DC rating to be used in a circuit with voltage from 27V to 35V (AC or DC). Flickering device: 6V AC: AR9T002-A 6V DC: AR9T002-6 12 to 24V AC: AR9T002-G * 12 to 24V DC: AR9T002-E * * Used in combination with 12V, 15V, or 24V rated LED lamp. Note: With terminal cover

Pushbuttons/Selectors/Pilot Lights/Buzzers

AR22 Special products

Semi standard compliant guarding

■ Features

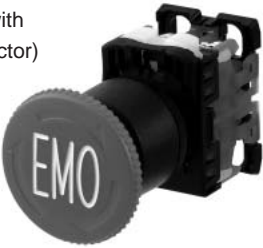

- Combine a guard ring with a Fuji electric emergency stop pushbutton switches to comply with SEMI (SEMI-S2, SEMATECH Application Guide for SEMI S2-93).
- EMERGENCY OFF legend plates are available.
- Emergency stop pushbutton switches labeled with "EMO" are available.

■ Accessories

Description	Type	Color
 (KKD05-263)	AR9R008	Yellow
Legend plate for AR9R008 emergency off  (KKD05-262)	AR9P721-5C	Yellow (Black legend)

■ Emergency stop pushbutton switches

Operator	Contact	Type	Color
 (KKD05-261)	1NC	AR22V3R-01RZ286	Red (White legend)
	1NO+1NC	AR22V3R-11RZ286	
	2NC	AR22V3R-02RZ286	
	1NO+2NC	AR22V3R-12RZ286	
	3NC	AR22V3R-03RZ286	
	1NO+3NC	AR22V3R-13RZ286	
	2NO+2NC	AR22V3R-22RZ286	
	4NC	AR22V3R-04RZ286	

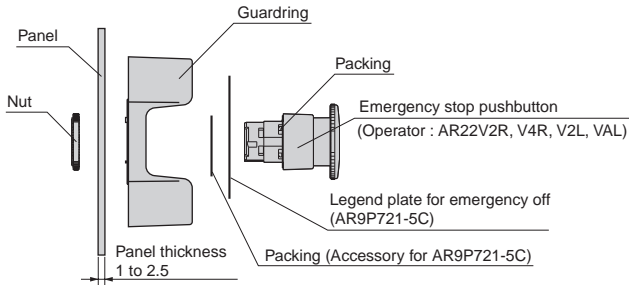

Note : Contact arrangements indicated in the table can be supplied.

■ Dimensions, mm

● Guardring (AR9R008)

● Installation

● Legend plate for emergency off (AR9P721-5C)

Note : • Engraving for marking letters is not available.
• Letter height : 13mm

■ Notes on use

This guardring conform to SEMI standard. Please do not use it for the emergency stops other than Semiconductor manufacturing Equipment.

■ Applicable types

AR22V2R, V4R, V2L, VAL and V3R Z286

* Dimension A (the height difference between the switch and guardring) depends on the emergency stop (Illuminated) pushbutton switch that is being used. Refer to the following table.

Type	Panel thickness	A (Reference)	
AR22V2R	1~2.5	2mm	With AR9P721-5C
AR22V4R	1~2.5	2mm	With AR9P721-5C
AR22V2L	1~2.5	2mm	With AR9P721-5C
AR22VAL	1~2.5	2mm	With AR9P721-5C
AR22V3R (Z286)	1~3.6	3mm	

● Panel cutout hole dimensions, mm

● Emergency stop pushbutton switches (AR22V3R-□□RZ286)

* Without accessories

Pushbuttons/Selectors/Pilot Lights/Buzzers

AR22/DR22 and AR30/DR30

Special products

Products equipped with contact protection cover

■ Features

A silicon rubber cover is provided for the contact block to keep out foreign matter such as dust, etc.
Other ratings and specifications are the same as those of the standard type.

■ Type

AR22 □ Z8

AR30 □ Z8

Specify "Z8" at the end of the type number of the standard type.

■ Dimensions

The only thing different from the standard product is the addition of a 1-mm thick silicon rubber cover around the contact block.

■ Applicable types

Type	Contact arrangement	Remarks
• Pushbuttons *1	1NO+1NC,	For use with a 1-step contact
• Emergency stop pushbuttons *2	2NO*5, 2NC	
• Selectors *3	1NO+3NC, 2NO+2NC, 3NO+1NC, 4NO*5, 4NC	For use with a 2-step contact
• Illuminated pushbuttons *4 (without transformer)	1NO*6, 1NC	For use with a 1-step contact
• Emergency stop illuminated pushbuttons*2 (without transformer)	1NO+2NC, 2NO+1NC, 3NO*6, 3NC	For use with a 2-step contact
• Illuminated selectors (without transformer)		

Notes: *1 Except for AR30B0R, B1R, B2R, B3R, N0R, and GPR.

*2 Except for unibody (VG types)

*3 Except for AR30HR

*4 Except for AR30Q7L

*5 Except for emergency stop pushbutton switch

*6 Except for emergency stop illuminated pushbutton switch

Resisting water-soluble cutting oils and heat

■ Features

Safer operation in environments exposed to water-miscible cutting fluids, machining oils, lubricating oils, cleaning oils and high humidity (up to 95%) is made possible by using materials that protect against rust and corrosion of components.
Other ratings and specifications are the same as those of the standard type.

■ Type

AR22 □ Z9, DR22 □ Z9

AR30 □ Z9, DR30 □ Z9

Specify "Z9" at the end of the type number of the standard type.

■ Dimensions

Same as those of the standard type

■ Applicable types

• AR22, DR22 series

AR 22 (Except for joy stick selectors, FAR, FBR, EAR, EBR types and VG types)

DR22 (Except for pilot lights with resistor unit and buzzers)

• AR30, DR30 series

AR30 (Except for Q7L, FAR, FBR, EAR, EBR, HR types and joy stick selectors)

DR30 (Except for D1L, F4M, F4N, M4M types, pilot lights with resistor/resistor unit and buzzers)

Meeting IP2X finger protection standards

■ Features

Conforms to EN standard EN60204-1 (protecting against electric shock). The terminal has IEC60529 degree of protection; IP2X finger protection secured (a mock human finger used in testing did not come into contact with charged parts). The contact block and lamp terminal can be easily mounted or removed with the terminal cover mounted.

■ Type

AR22 □ ZB, DR22 □ ZB

AR30 □ ZB, DR30 □ ZB

Specify "ZB" at the end of the type number of the standard type.

■ Accessories

- Contact block (plus terminal cover)
 NO contact: AR9B290-D
 NC contact: AR9B291-D
- Transformer unit (plus terminal cover)
 AR9T511-□ D

■ Ratings and specifications

- Protection degree: IP2X
- Terminal screw: M3.5
 Wiring can be done with a solid wire or fork shaped crimp terminal.

Note: Ring-type crimp terminals cannot be used.

- Other ratings and specifications are the same as those of the standard type.

■ Applicable types

- AR22, DR22 series
 AR22 (except for joy stick selectors)
 DR22: Without transformer, with transformer (except for short-body types, buzzers and numerical indicators)
- AR30, DR30 series
 AR30 (except for HR and joy stick selectors)
 DR30: Without transformer, with transformer (except for D1L, F4M, F4N, M4M types and buzzers)

Note: The terminal of the standard type VG has IP2X protection.

■ Dimensions, mm

AR22/Pushbutton switches

DR22/Without transformer

DR22/With transformer

Note: * Except for the types 110V AC, 127V AC and 220V AC.

Pushbuttons/Selectors/Pilot Lights/Buzzers

AR22/DR22 and AR30/DR30

Special products

Metal nut (chrome plated) types

■ Features

The nut is a metallic ring (chrome plated).
Other ratings and specifications are the same as those of the standard model.

■ Type

AR30 ZM

DR30 ZM

Specify "ZM" at the end of the type number of the standard type.

■ Dimensions, mm

Same as those of the standard types.

■ Applicable types

• AR30, DR30 series

AR30 (except for G4L, G9L, GSR*1, GPR*1, BOR*1, and HR*1 types)

DR30 with round bezel (except for IP54 buzzer type B8)*2

Notes: *1 Standard type is a metallic ring (chrome plated).

*2 The nut of types DR30B0, B5 and B6 buzzers are resin (chrome plated).

Resisting sulfuration gas

■ Features

These products can be used in environments having a concentration of hydrogen sulfide gas of 0.5 ppm or less. The metallic parts have been subjected to an anti-corrosion treatment (see note).

The contacts of the AR series are gold plated.

Note: The body is made of resin and cannot be used with gases that affect resins (plastics).

■ Type

AR22 Z4, DR22 Z4

AR30 Z4, DR30 Z4

Specify "Z4" at the end of the type number of the standard type.

■ Notes on use

- This product is resistant to light corrosive gas exposure.
- Other measures, such as covering the entire switch with a box, and the degree of protection of the panel should be taken into consideration.

■ Ratings and specifications

Hydrogen sulfide gas concentration of 0.5 ppm max.

Ambient storage temperature: 8 to 37°C

Humidity: 62 to 81%

Other ratings and specifications are the same as those of the standard type.

■ Dimensions, mm

Same as those of the standard types.

■ Applicable types

• AR22, DR22 series

AR22 (except for Joy stick selectors and VG type)

DR22 (except for pilot lights with resistor unit and buzzers)

• AR30, DR30 series

AR30 (except for HR and Joy stick selectors)

DR30 (except for F4M, F4N, M4M types, pilot lights with resistor/resistor unit and buzzers)

Command Switches AR16, DR16 and AF16, DF16 General information

- An integrated structure with built-in contacts that can reduce control panel depth.
- A wide variety of sockets are available to simplify wiring.
- Thin type and Standard types available for your control panel design. Select an optimum one to match your control panel design.

■ Features

Supporting smaller and thinner operator's panels

A structure that integrates operator and contacts to reduce panel-mounting depth. Terminals extending to the rear of the switch ensure easy wiring work.

- Standard type : 28.4mm deep
- Thin type : 35.9mm deep
- Emergency stop : 28mm deep

A wide variety of sockets reduce wiring work

Switches combine with a variety of sockets to simplify wiring.

- Fast-connection socket

- Applicable as a fast-connection terminal switch by combining the socket with a switch.
- Easily wired by simply removing the wire sheath and inserting the wires while pressing the insertion slot button (no soldering required).
- Incorporates a branch terminal for easy branching.

- Connector socket

- Applicable as a connector by combining the socket with receptacles.
- The socket holds the receptacles, making it easy to connect the receptacle to the switch with a single operation.

- Socket for PC board

- Applicable as a switch for PC board by combining the socket with a switch.
- Pattern wiring reduces the number of wiring man-hour and helps prevent faulty wiring.

Safety

- FUJI's original Trigger Action mechanism is used in the emergency stop pushbuttons. They are suitable for emergency stop and safety. This mechanism prevents the contacts from moving until the button is pushed and locked. (See page 04/180)

Degree of protection

The operator has IP65 protection for smooth operation without adverse effects from oil, water, or dusts.

Approvals

For further information related to approved type, see page 04/130 to 04/135

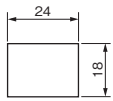

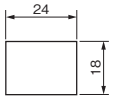

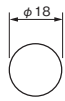

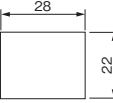

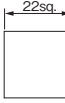

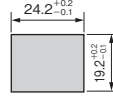

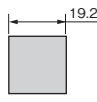

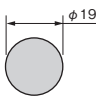

Note : commanded switches shipped as articles to China must conform to the Product Quality Law. Check with your Fuji Electric representative.

Item		• Illuminated pushbutton switch, pushbutton switch	• Selector switch	• Pilot lights
Rated insulation voltage U _i		250V AC/DC		
Durability	Mechanical	Momentary action: 1 million operations Alternate action: 250,000 operations	Maintained: 250,000 operations Spring/manual return: 250,000 operations Spring return: 250,000 operations	–
	Electrical	100,000 operations (at 220V AC 0.7A)		–
Operating frequency		1200 operations/hour (On-load factor: 40%)		–
Withstand voltage	Between live section and grounding	2000V AC, 1 minute		
	Between opposite polarity live sections	2000V AC, 1 minute		
Insulation resistance		100M Ω or more (500V DC megger)		
Rated impulse withstand voltage U _{imp}		2.5kV		
Conditional short-circuit current		1000A		
Short-circuit protective device		gG 2A (IEC60269 Fuse)		
Pollution degree		3		
Vibration		Resonance: frequency 10 to 55Hz, double amplitude 1.0mm Constant: frequency 16.7Hz, double amplitude 3mm		
Shock		Malfunction durability; 100m/s ² Mechanical durability; 500m/s ²		
Operational ambient temperature		–10 to +55°C (no icing or no condensation)		
Storage temperature		–40 to +70°C		
Relative humidity (inside control panel)		45 to 85%RH (–5 to +40°C) (no icing or no condensation)		
Degree of protection of operating (displaying) section		IP65 (dust-proof, water jet proof): IEC 60529		
Degree of protection of terminal section		IP2X (Fast-connection socket: AR6S690, Connector socket: AR6S691-C or Terminal cover: AR2Y261, At the connection)		

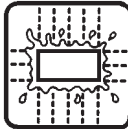

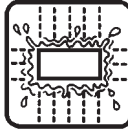

■ Specifications (Socket)

Item	Fast-connection socket	Connector socket	Socket for PC board
Rated insulation voltage Ui	250V AC/DC		60V AC/DC
Conventional free air thermal current Ith	3A	5A	3A
Rated impulse withstand voltage Uimp	2.5kV		0.5kV
Withstand voltage (Between live section and grounding)	2000V AC, 1 minute		1000V AC, 1 minute
Insulation resistance	100MΩ or more (500V DC megger)		
Operational ambient temperature	-10 to +55°C (no icing or no condensation)		
Storage temperature	-40 to +70°C		
Relative humidity	45 to 85%RH (-5 to +40°C) (no icing or no condensation)		
Pollution degree	3		

■ Degree of protection

- The table below shows the degree of protection stipulated by IEC (International Electrotechnical Commission) standard (IEC 60529).

IP- 6 5

Class	Degree of protection against human contact or penetration by a foreign object		Degree of protection against ingress of water	
5		<ul style="list-style-type: none"> Normal operation secured even if the dust that can pass through screen of 75μm mesh invades. 	Protection against water jets 	<ul style="list-style-type: none"> Protected against water jet from all directions. Water projected by nozzle (6.3mm-inner dia.) from all directions at 29.4kPa for 3min at a distance of 3m.
6		<ul style="list-style-type: none"> The dust which can pass through screen of 75μm mesh shall not invade. 	Protection against powerful water 	<ul style="list-style-type: none"> Protected against powerful water jet from all directions. Water projected by nozzle (12.5mm-inner dia.) from all directions at 98kPa for 3min at a distance of 3m.

■ Contact reliability

FUJI has confirmed that the product can be used in 1mA circuit conditions at 5V AC or DC. The operable range, however, may vary depending on the operational ambient conditions and type of load.

Command Switches

AR16 and DR16, AF16 and DF16

Specifications

■ Lamp ratings and current consumption

• Illuminated pushbutton switch, Pilot lights

Applied method	Lamp operational voltage	High-brightness LED lamp		
		Type	Lamp rated voltage	Current consumption
without transformer	6V AC/DC	DR6L695-A□	6V AC/DC	Green, Blue: 11mA AC, 7.5mA DC Red, Amber: 9mA AC, 7.5mA DC Orange: 10mA AC, 8.5mA DC Yellow: 30mA AC, 26mA DC
	12V AC/DC	DR6L695-B□	12V AC/DC	Green, Red, Amber, Blue: 7.5mA AC, 7.5mA DC Orange: 9mA AC, 8.5mA DC Yellow: 11mA AC, 8.5mA DC
	24V AC/DC	DR6L695-E□	24V AC/DC	Green, Red, Amber, Blue: 7.5mA AC, 7.5mA DC Orange, Yellow: 9mA AC, 8.5mA DC

Note: A box □ indicates the luminous color. For details, see the "Combination of Illuminated pushbutton / pilot light color and LED lamp luminous color".

■ Combination of Illuminated pushbutton / pilot light color and LED lamp luminous color

Illuminated pushbutton / pilot light color (lens color)		Luminous color of high-brightness LED lamp	
Type		Type	
Green	G	Green	DR6L695-■G
Red	R	Red	DR6L695-■R
White	W	Orange	DR6L695-■W
Yellow	Y	Yellow	DR6L695-■Y
Orange	A	Amber	DR6L695-■A
Blue	S	Blue	DR6L695-■S

Note: □ A box ■ indicates the lamp operational voltage. For details, see the "Lamp ratings and current consumption".

■ LED durability

Type of lamp	Durability (reference)	Judgment criterion
LED lamp	Approx. 30000h	When the brightness is less than 50% of initial value.

Note: The durability of LED lamp is a mean value in all colors.

■ Standard approved

UL508	cUL File No.E44592
CSA C22.2 No.14	
TÜV: EN60947-5-1	Pushbutton, Illuminated pushbutton: R50116757 Selector: R50116759 Pilot lights: R50116762
CCC: GB14048.5	Switches (except pilot lights): 2003010305071068 Pilot lights: 2003010305071044

■ Standard models approved by international standards

The standard models of AR16 and DR16, AF16 and DF16 series of the ϕ 16 Command Switches meet UL / CSA requirements, China Compulsory Certification (CCC) standards, and TÜV EN standards, thus ensuring easier direct or indirect export to North America and European countries with no safety standard concerns.

Command Switches AR16 and DR16, AF16 and DF16 Type number nomenclature

• Illuminated pushbutton switches

AR16 F0N – C2 E3 G

Product category _____

Category	Code

Safety Precautions

Read the Operating Instructions carefully before mounting, wiring, operating, servicing, or inspecting the command switch. Make sure that the Operating Instructions is delivered to the final user of the command switch.

- The safety precautions are classified into two levels, Warning and Caution, with meanings described as follows:

Warning : If operation is incorrect, a dangerous situation may occur, resulting in death or serious injuries.

Caution : If operation is incorrect, a dangerous situation may occur, resulting in minor to medium injuries or physical damage to equipment.

An item described under CAUTION may result in a serious accident, depending on the situation.

Warning
<ul style="list-style-type: none"> • Do not touch or approach any live part while power is supplied. An electric shock or burning may result. • Be sure to turn off the power before mounting, dismounting, wiring, or inspecting the product. An electric shock, burning from short-circuiting or equipment malfunction may result.
Caution
<ul style="list-style-type: none"> • Wire the product according to the wiring instructions in the Operating Instructions. Make sure that the size of the wires is suitable for the voltage and applied current. The wrong wiring may result in fire, accidents or malfunctions. • Treat the product as industrial waste when it is to be discarded.

■ Panel cutout, mm

- **Standard type** (common)

- **Thin type** (The panel cutout dimension varies depending on the operator or lens shape.)

- **Rectangular type**

- **Square type**

- **Round type**

■ Installation on panel

- As shown in the figure below, insert the switch main unit into the mounting hole from the front of the panel, attach the washer and tightening nut from the back of the panel, and securely tighten the nut with the wrench (AHX601).

Note: The proper tightening torque is 0.6 to 1.0 N•m.

Note: *1 Do not use pliers or other improper tools to tighten the nut, or tighten it excessively. Otherwise, the nut may be damaged or the switch may malfunction.

• Thin type

- As shown in the figure below, insert the switch main unit into the mounting hole from the front of the panel, attach the panel retainer from the back of the panel, and securely tighten the nut with the wrench (AHX601).

Note: The proper tightening torque is 0.6 to 1.0 N•m.

Note: *1 Do not use pliers or other improper tools to tighten the nut, or tighten it excessively. Otherwise, the nut may be damaged or the switch may malfunction.

■ Applicable panel thickness

Tables 1 and 2 show applicable panel thickness.

Table 1 Standard type (AR16/DR16 series)

Mounting condition	Applicable panel thickness, mm	
Without accessories	1 to 6	
With accessories	Protective cover	1 to 4
	Dust-tight cover	1 to 4
	Various sockets	1 to 3.2
	Terminal cover	1 to 3.2
	Protective cover + various sockets	1 to 1.6
	Protective cover + Terminal cover	1 to 1.6
	Dust-tight cover + various sockets	Cannot be used.
Dust-tight cover + Terminal cover	Cannot be used.	

Command Switches

AR16, DR16 and AF16, DF16

Panel cutout and mounting

Table 2 Thin type (AF16/DF16 series)

Mounting condition		Applicable panel thickness, mm
Without accessories		1 to 6
With accessories	Protective cover	1 to 4
	Various sockets	1 to 3.2
	Terminal cover	1 to 3.2
	Protective cover + various sockets	1 to 3.2
	Protective cover + Terminal cover	1 to 3.2

■ High-density mounting

Minimum mounting space (pitch) without accessories, mm

• Standard type (AR16/DR16 series)

Illuminated pushbuttons, pushbuttons, selectors, and pilot lights

- ① Rectangular ② Square ③ Round, dome

Note: Determine the mounting pitch by taking the operability and wiring work into consideration.

• Thin type (AF16/DF16 series)

Illuminated pushbuttons, pushbuttons, selectors, and pilot lights

- ① Rectangular ② Square ③ Round, dome

Note: Determine the mounting pitch by taking the operability and wiring work into consideration.

Minimum mounting space (pitch) with accessories, mm

- Protective cover AHX669 and AHX826

(Standard type)

① 43: with the cover fully opened

- Protective cover AHX671

(Standard type)

① 43: with the cover fully opened

- Protective cover AF6D826

(Thin type)

- Protective cover AF6D827

(Thin type)

- Dust-tight cover AHX668

(Standard type)

- Dust-tight cover AHX822

(Standard type)

- Minimum mounting spaces (pitch) with sockets, such as Fast-Connection socket (AR6S690), connector socket (AR6S691) and PC board-use socket (AR6S692) are the same as those without accessories.

Note: Determine the mounting pitch by taking the operability and wiring workability into consideration.

Safety Precautions

Read the Operating Instructions carefully before mounting, wiring, operating, servicing, or inspecting the command switch. Make sure that the Operating Instructions is delivered to the final user of the command switch.

- The safety precautions are classified into two levels, Warning and Caution, with meanings described as follows:

 **Warning** : If operation is incorrect, a dangerous situation may occur, resulting in death or serious injuries.

 **Caution** : If operation is incorrect, a dangerous situation may occur, resulting in minor to medium injuries or physical damage to equipment.

An item described under CAUTION may result in a serious accident, depending on the situation.

 Warning
<ul style="list-style-type: none"> • Do not touch or approach any live part while power is supplied. An electric shock or burning may result. • Be sure to turn off the power before mounting, dismounting, wiring, or inspecting the product. An electric shock, burning from short-circuiting, or equipment malfunction may result.
 Caution
<ul style="list-style-type: none"> • Wire the product according to the wiring instructions in the Operating Instructions. Make sure that the size of the wires is suitable for the voltage and applied current. The wrong wiring may result in fire, accidents, or malfunctions. • Treat the product as industrial waste when it is to be discarded.

Method of replacing color lens, legend plate, and screen
Replacing color lens (screen)

- Standard type (AR16/DR16 series)

To remove the color lens, fit the color lens remover (AHX618) to the grooves in the color lens and pull out the lens, or pry the lens lightly with a small slotted screwdriver.

- Thin type (AF16/DF16 Series)

To remove the color lens, pry the lens lightly with a small slotted screwdriver.

If one side of the color lens is separated from the screen, further insert the screwdriver and remove the color lens together with the screen. Do not pry the packing when doing this.

To fit the color lens, align the protrusion of switch main body with the groove of the screen, and press-fit them.

- Removing screen

Insert the tip of a small slotted screwdriver into the groove and press down the screwdriver in the direction of the arrow.

Command Switches AR16, DR16 and AF16, DF16 Notes on use

Fitting color lens to screen

• Rectangular type

Set the textured surface side of the legend plate with the screen side, then press-fit the color lens. When press-fitting, make sure that your fingers do not touch the reflective surface inside the screen.

• Square type

Set the textured surface side of the legend plate with the screen side, align the screen protrusion with the color lens groove, and press-fit together. When press-fitting, make sure that your fingers do not touch the reflective surface inside the screen.

• Round type

Align the protrusion of the legend plate with the groove of the screen, also align the screen protrusion and color lens groove, and press-fit together. When press-fitting, make sure that your fingers do not touch the reflective surface inside the screen.

• For alternate action type of illuminated pushbutton switches and pushbutton switches, do not remove the color lenses (screens) in locked (depressed) state. The internal mechanisms may be damaged.

■ Engraving legend plate

Engrave the surface of the legend plate.

- Material: Acrylic resin
- Engraving depth: 0.5 mm max.
- Paint: Use a paint that has alcohol as its main ingredient, such as melamine paint, phthalic acid paint, or acrylic paint.

• Legend plate size

Shape	Size, mm
Rectangular	
Square	
Round	

Notes: ¹ A legend sheet may be used, provided that the external dimensions do not exceed the corresponding outer size specified in the above table and that the thickness is 0.1 mm or below. (No legend sheets are provided with the product. Please prepare on customer side.)
² Do not engrave any part other than the legend plate.

■ Changing the operating angle position of selector switch

The bezel is separated from the knob (key), which makes it easy to change the operating angle position in 45° increments (the AR16 series rectangular or square type only).

The following figures show a knob type example. The key type is the same.

The desired position can be set in 45° intervals. Set the knob to the desired position, align the groove of the knob, and press-fit the knob.

■ Method of replacing lamp

- To remove the LED lamp, insert the lamp changer (AHX672) in the LED lamp and pull out the LED lamp.
- To mount the LED lamp, align the lamp terminal side of the main unit with the electrode side of the LED lamp, lightly hold the lamp by hand or with the head of the lamp changer (AHX672), and insert the lamp.
- The LED lamp has no polarity, so it can be powered by either AC or DC.

• Handling of LEDs

LED whose luminous color is green or blue is sensitive to static electricity. Be careful when handling the LED. Take thorough measures against static electricity and surges when handling the product. The following anti-electrostatic measure is recommended.

Use a wristband or anti-electrostatic glove when replacing LED lamps.

■ Wiring

- Wiring to tab terminal
 - Use 110 (2.8mm) series receptacles for tab terminals.
- Pay attention to the following points when soldering.
 - Type of solder: Use resin-core solder.
 - Use a soldering iron with a maximum power consumption of 60W (350(C) within five seconds. Make sure that the terminal is free of tension during soldering. Also, do not deform the terminal.
 - The melting point of lead-free solder is slightly high, which may make soldering difficult. Use a soldering iron that has a large soldering tip or high heat generation.
- Connectable wires
 - Two solid wires with a maximum diameter of 0.8 mm (solder)
 - One stranded wire with a maximum area of 0.75 mm² (solder)
 - Flat-type connection terminal (2.8□-1.25-5) 0.5 to 1.25mm²
 - (2.8□-0.5-5) 0.2 to 0.5mm²
- Use of contact blocks
 - When using NO and NC contacts in the same contact block, avoid connection that involves opposite polarity or wiring from different types of power supply.
- For wiring to adjacent terminals, use the terminal cover (AR6Y261) to prevent short-circuit, or an insulation tube to assure isolation. For solder terminals, caution is required if thick wires, in particular, are connected or a large quantity of solder is used.

• Terminal arrangement

Model	Circuit diagram (example)	Terminal arrangement (view from the terminal (back) side)
Illuminated pushbuttons (2PDT)		<p>[TOP] (▼) Display side</p> <p>Left-side contact Right-side contact</p>
Pushbuttons and selector switches (2PDT)		<p>[TOP] (▼) Display side</p>
Pilot lights		<p>[TOP] (▼) Display side</p>

Note: Only the left-side contact is applicable to the SPDT mechanism.

Command Switches

AR16, DR16 and AF16, DF16

Notes on use

■ LED Lamps

- LED lamp malfunctioning (incorrect lighting)

The LED lamp incorporates a circuit to prevent malfunctioning. Compared with conventional models, this LED lamp is less likely to malfunction, but it incorporates no absolute countermeasures.

A minute current (approximately 0.25 mA) turns on the LED lamp. A leakage current from the surge absorption circuit or noncontact circuit, or stray capacitance between cables, may also turn on the LED lamp.

In this case, a countermeasure (e.g., attaching a resistor in parallel with the LED lamp) is required.

- Countermeasure against malfunctioning

Malfunctioning can be prevented by connecting a shunt resistor (R) in parallel. The resistance in that case varies with the model and operating conditions.

- The permissible fluctuation range for the operating voltage of the 6V model is ±5% and that for the 12V or 24V model is ±10%. If the operating voltage is always 5% or 10% higher, select a resistor that will make the operating current the same as or lower than the rated current, and connect the resistor in series to the LED lamp.

- Calculation of external resistance

Example: Connecting a 24V red LED to a 48V circuit

$$\text{External resistance } [\Omega] = \frac{\text{Circuit voltage [V]} - \text{Rated voltage [V]}}{\text{Rated current [A]}}$$

$$= \frac{48-24}{7.5 \times 10^{-3}} = 3200 [\Omega]$$

→ Therefore, use an external resistor of 3.3kΩ 1W.
(Select a resistor with sufficient wattage.)

- Surges

High-brightness LED products use elements that are sensitive to static electricity. Keep in mind that an unusual voltage, such as a surge voltage, may cause the product to malfunction.

■ Selector Switches

- Knob type

The knob can be operated by turning it lightly. Be careful to operate the knob with a torque not exceeding 1N·m.

- Key type

- Types of keys

Five types (B, C, D, E, and F) are available in addition to the standard type (type A).

Make sure that the symbol on the key coincides with the symbol on the switch.

- Fully insert the key into the switch and turn the key. Do not pull on the key while turning it.
- Operate the key with a torque not exceeding 0.1N·m.
- Do not forcibly insert or extract the key.
- Do not attempt to operate the switch with the key insufficiently inserted or insert the wrong key. Otherwise, a malfunction may result.

■ Fast-connection socket

- Connectable wires

• Standed wire : 0.3 to 0.75 mm² (AWG22 to AWG18)

• Single wire : 0.5 to 1 mm dia.

• Recommended ferrule : Phoenix Contact, part number AI0, 34-8TQ

Wire size : 0.34 mm² (22 AWG)

Crimping tool : CRIMPFOX UD6-6

Note : Use a crimping tool with a hexagonal or round cross section.

Sheath external diameter: 2.8 mm dia. Max.

- Wire sheath stripping length

Note : If ferrules are used, securely insert the wire sheath inside a resin shell. Cut the end of the wire the same length as the ferrule or cut it at a position approximately 0.5 mm longer.

Check the length using the strip gauge on the surface of the socket displayed on the model nameplate. If standed wire is used, twist the wire so that there are no loose strands after stripping.

- Connection method

- (1) Insert the wire while pressing the button on the insertion slot with a small flat-head screwdriver (tip width of 2 mm max.). Release the button when the wire is all the way seated in the switch.
- (2) When disconnecting the wire, pull out the wire while pressing the button on the insertion slot with a small flat-head screwdriver. Cut the bare part of the wire if it was previously used, and then newly remove the sheath to reuse the wire.
- (3) Insert a single wire for each insertion slot.
- (4) Do not pull on the wires with excessive force (15 N or more) when you perform wiring. Make sure that not external force is exerted on the wires after wiring has been completed. The next time that a wire is inserted, the parts that support the wire may change shape and result in conduction failure.

- Terminal arrangement (Rear-side View)

- (1) Socket Terminal Arrangement for AR6S690-L2
- (2) Switch Terminal Arrangement for Illuminated 2PDT Contacts

■ Connector sockets

- Connectable wires
Stranded wire: 0.5 to 0.75 mm² (20AWG to 18AWG)
- Arrange for a receptacle terminal separately.
Nichifu Co., Ltd.: CMC62895F
- Check the insertion position and insert the receptacle terminal into the socket after connecting the wires to the receptacle terminal. (The wires once connected cannot be disconnected.) Lightly pull the wires and check that the receptacle terminal is securely connected to the socket.

- Align the ▲ mark of the socket and the TOP (▼) mark of the switch, and put the socket and switch together.

■ Socket for PC board

- Minimum mounting space (pitch), mm

Obtain the mounting pitch based on a reference line to minimize the cumulative error.
Make sure that the centering difference between the switch and the PCB socket does not exceed 0.25 mm.

- Apply the following panel cutout dimensions (in mm) to stabilize the operator position of the switch when combined with the socket.

AR16/DR16 (common)

AF16/DF16 (round type)

- Mount the switch to the panel. Make sure that the switch is free of any bends.

- PC board processing dimensions (in mm) as viewed from the socket mounting side.

- The reference is the center of the socket (switch).
- Switch terminal arrangement (as viewed from the socket mounting side)

Note: The right-side contact is connected in the case of an SPDT contact.

- Insert the socket so that the lever will be located in the 5mm-diameter through hole of the PC board. Set the lever to the lock position as viewed from the socket mounting side.

- Combine the switch-mounted panel with the socket on the PC board, and solder the socket terminal.

- Combine the PCB socket and the panel while making sure that the socket terminal does not fall off, and turn over the socket to do the soldering. Do not leave any space between the PC board and socket.
- After combining them, check that the lever as viewed from the soldering side is in the lock position, and solder the terminal.

Command Switches

AR16, DR16 and AF16, DF16

Notes on use

- Pay attention to the following points when soldering.
 - Type of solder: Use resin-core solder.
 - Finish soldering at 350°C within 5 seconds.
 - Do not wash the socket.
 - Solder the socket so that no flux adheres to it.
- The melting point of lead-free solder is slightly higher than lead solder, which may make soldering difficult. Use a soldering iron with a large tip or that provides a high heat generation.
- Using a spacer between the panel and the PC board
Make sure that the distance shown in the figure below is maintained between the panel and the PC board. The spacer dimensions vary with the thickness of the mounting panel.

Series	A (mm)
AR16/DR16	30.2±0.2
AF16/DF16	37.7±0.2

- Mounting and removing PC board sockets
 - Removing
Push down the socket levers all the way viewed from the soldering side in the direction of the free position and remove the PC board sockets. After removal, the socket levers will return to the lock position automatically.
 - Mounting
Check that the socket lever as viewed from the soldering side is in the lock position, lightly insert the terminal and socket so their position is aligned with the switch on the panel, press the socket-mounting portion of the PC board, and securely insert the entire socket until the socket lever snaps. (Check that the lever as viewed from the soldering side is in the lock position.)
- Use the switch within the following rated voltage range when the PCB socket is used.
 - Rated insulation voltage: 60V
 - Rated operational voltage: 24V
 - Conventional free air thermal current: 3A
- Use a 1.6-mm-thick double-sided through-hole printed circuit board made of copper-plated laminated epoxy resin on a woven glass fabric base.
- In case of standard type (AR16 and DR16 series), beware that the adopted models are not allowed to attach the protective cover to some models and that the adopted models cannot be mounted to some models afterward.

■ Others

- Operation
 - Do not hit or flip the button, or the button may be damaged.
 - Be sure to operate the button by hand.
 - Do not pull the button if the switch is an alternate action type.
- High-density mounting of illuminated type
 - When continuously lighting pilot lights or pressing illuminated pushbuttons, keep in mind that the ambient temperature may exceed the rated value due to the heat radiated by the lamp.
 - Be sure to ventilate the lamp /switch if the mounting panel is not made of metal or if the mounting panel is an enclosed type.
- Usage locations
 - Be sure to use and store the product within the rated ambient temperature and humidity ranges.
 - Although the product resists ordinary cutting oils and coolant oils, do not use the unit in places where special oils may be sprayed onto the product.
 - If dusts or filings accumulate in the gap between the button and the frame, the switch may fail to operate normally. Take appropriate measures, such as using a dust-proof protective cover, if the switch is to be used in places that are subject to dusts or filings.
 - The AR16/DR16 series and AF16/DF16 series are for indoor use. Make sure that the product is not exposed to direct sunlight.
 - Do not use the product in the places that are subject to the adverse effects of ozone or corrosive gases.

Command Switches

AR16, DR16 and AF16, DF16

Rating and specifications/AR16V

Integrated Contacts Structure Emergency stop pushbutton switches AR16V

■ Features

- Up to four sets of contacts in a one-piece structure with a panel depth dimension of 28 mm (non-illuminated type).

Non illuminated type

Illuminated type

- Both pull or turn reset methods are supported.
- Two button diameters are available: 32 mm (AR16V0) and 40 mm (AR16V1).
- Safety trigger-action mechanism that prevents the contacts from operating until the switch is locked, even if people or objects accidentally come into contact with the switch.
- Direct opening mechanism for NC contacts to ensure that the contacts can be opened even in the unlikely event that they become fused. (→)
- IP65 protection for operating section.

- RoHS compliance (EU Directive 2002/95/EC) is a standard feature.
- Compliance with UL/CSA standards, China Compulsory Certification (CCC) standards, and TÜV (EN standards).
- CE marking. 

■ Specifications (indoor use)

Item	AR16V	
Rated insulation voltage U_i	250V AC/DC	
Durability	Mechanical	100,000 operations
	Electrical	100,000 operations (AC-15, AC-13, AC-12, DC-13, DC-12)
Operating frequency	1200 operations / hour (On-load factor : 40%)	
Withstand voltage	Between live section and grounding	2000V AC, 1 minute
	Between opposite polarity live sections	2000V AC, 1 minute
Insulation resistance	100M Ω or more (500V DC megger)	
Rated impulse withstand voltage U_{imp}	2.5kV	
Conditional short-circuit current	1000A	
Short-circuit protective device	gG 6A (IEC60269 Fuse)	
Pollution degree	3	
Vibration	Operating extremes	: frequency 10 to 500 Hz, double amplitude 0.7mm acceleration 50m/s ²
	Damage limits	: frequency 10 to 500 Hz, double amplitude 0.7mm acceleration 50m/s ²
Shock	Malfunction durability	: 100m/s ²
	Mechanical durability	: 500m/s ²
Operational ambient temperature	-10 to +55°C (no icing or no condensation)	
Storage temperature	-40 to +70°C	
Relative humidity (inside control panel)	45 to 85%RH (-5 to 40°C) (no icing or no condensation)	
Degree of protection of operating (displaying) section	IP65 (dust-ploof, water jet proof): IEC 60529	
Degree of protection of control section	IP2X (Terminal cover : AR6Y262, At the connection)	
Terminal style	Solder terminal	
Connectable wire	0.75mm ² maximum (18AWG maximum)	

■ **Contact ratings**

• TÜV (EN60947-5-1), JIS C 8201-5-1 (1999)

Command Switches AR16, DR16 and AF16, DF16 Notes on use/AR16V

■ Notes on use

Safety Precautions

Read the Operating Instructions carefully before mounting, wiring, operating, servicing, or inspecting the command switch. Make sure that the Operating Instructions is delivered to the final user of the command switch.

- The safety precautions are classified into two levels, "**WARNING** and **CAUTION**", with meanings described follows.

WARNING: Indicates a potentially hazardous situation, which, if not avoided, could result in death or serious injury.

CAUTION: Indicates a potentially hazardous situation, which, if not avoided, may result in minor or moderate injury and/or damage to the equipment.

An item described under "**CAUTION**" may result in a serious accident, depending on the situation.

WARNING

- Do not touch or approach any live part while power is supplied. An electric shock or burning may result.
- Be sure to turn off the power before mounting, dismantling, wiring, or inspecting, the product.
An electric shock, burning from short-circuiting, or equipment malfunction may result.

CAUTION

- Wire the product according to the wiring instructions in the Operating Instructions. Make sure that the size of the wires is suitable for the voltage and applied current.
The wrong wiring may result in fire, accidents, or malfunctions.
- Treat the product as industrial waste when it is to be discarded.

■ Panel cutout (mm)

■ Applicable panel thickness

The applicable panel thickness is 1 to 6 mm. When the terminal cover (AR6Y262) is used, however, the applicable panel thickness will be 1 to 3.2 mm.

■ High-density mounting

The following minimum mounting pitch applies to high-density mounting.

Type	Dimension A
AR16V0□	41mm min.
AR16V1	45mm min.
With AR6P719	65mm min.

Note : Determine the mounting pitch by taking the operability and wiring workability into consideration.

• Installation on panel

As shown in the figure below, insert the switch main unit into the panel cutout from the front of the panel with the top of the switch main unit (marked with an inverted triangular) facing upward. Then, use a tightening wrench (AHX601) and secure the unit with a washer and tightening nut from the rear of the panel.

Note : The proper tightening torque is 0.6 to 1.0 N · m.

*1 : Do not use pliers or other improper tools tighten the nut, and do not tighten it excessively, or the nut may be damaged or switch may malfunction.

■ Wiring

- The wiring to this switch must be soldered. Keep the following items in mind when soldering.
 - Type of solder : Use resin-core solder.
 - Use a soldering iron with a maximum power consumption of 60W (350°C) within five seconds. Make sure that the terminals is free of tension during soldering. Also, do not deform the terminal.
- Lead-free solder has a high melting point, but the specific melting point depends on the type of lead-free solder. This may cause difficulty in soldering. Be careful not to overheat the solder if a soldering iron with a large soldering tip or a large heating capacity is used. Keep in mind that overheating the solder may result in product malfunctioning.
- Connectable wires
 - One Solid wires with a maximum diameter of 1.0mm
 - One standed wire with a maximum area of 0.75 mm²
- For wiring to adjacent terminals, use the terminal cover (AR6Y262) to prevent short-circuit, or an insulation tube to assure isolation. Care is necessary when two wires are connected together or a large quantity of solder is applied. In addition, keep in mind that overheating the tube may result in product malfunctioning if a heat-shrinking tube is used.

• Terminal arrangement

Model	Circuit diagram (example)	Terminal arrangement (view from the terminal (back) side)
Emergency stop pushbutton switches		<p>Top (marked with inverted triangular)</p> <p>Terminals 1-2 : b (NC) contact terminals Terminals 3-4 : a (NO) contact terminals Terminals a-b : Lamp terminals</p>
Emergency stop illuminated pushbutton switches		<p>Terminals 1-2 : b (NC) contact terminals Terminals 3-4 : a (NO) contact terminals Terminals a-b : Lamp terminals</p>

Note : If NO contacts are used in the contact configuration, they will be on the top of the unit (marked with the inverted triangular) and on the opposite side, regardless of the number of contacts.

■ Terminal cover (AR6Y262)

• Combination

The terminal cover must be attached in the correct direction. Make sure that the triangular on the terminal cover is aligned with the inverted triangular on the top of the unit. Also, when wiring the switch, check the alignment of these triangles and insert the wires correctly through the corresponding holes in the terminal cover.

■ Nameplate (AR6P719)

• Precautions

The nameplate must be attached. Attach the nameplate to an appropriate part, such as the panel, after removing the paper from the back of the nameplate.

Before attaching the nameplate, clean the surface to which the nameplate will be attached with alcohol.

The nameplate may come off if the surface is dirty or oily.

• Attachment Procedure (Example)

Remove portions ① and ② from the center of the nameplate, align the nameplate with the panel cutout, and lightly press on the front surface of the nameplate to attach it to the panel. Then remove portions ③ and ④, and press on the entire front surface of the nameplate to complete attaching it to the panel.

■ Others

Operation

- Do not hit or flip the button, or the button may be damaged. Be sure to operate the button by hand.
- To unlock the switch, turn the button approximately 45° clockwise (in the direction of the arrow) or pull out the button. Do not operate or handle the button with excessive force.
- Do not lock the emergency stop pushbutton switch during normal use. Push and lock the switch only in an emergency.

Storage and Usage Locations

- Be sure to use and store the product within the rated ambient temperature and humidity ranges.
- Although the product resists ordinary cutting oils and coolant oils, do not use the unit in places where special oils may be sprayed onto the product.
- If dusts or filings accumulate in the gap between the button and the frame, the switch may fail to operate normally.
- This switch are for indoor use. Make sure that the product is not exposed to direct sunlight.
- Do not use the product in the places that are subject to the adverse effects of ozone or corrosive gases.

Pushbuttons/Selectors/Pilot Lights/Buzzers

AH164, AH165 and AH165-2

General information

■ Features

Design basis

The 16mm dia. series of compact size pushbuttons are 'finger-size', and consequently take up little panel space. AH165-2 series operators are about twice as large as the AH164 and AH165 series operators for easier operation. With many types of operator available, the most suitable switch can be identified by color, shape and legend, and have a smooth, quality "snap-action". In spite of their small size they have a highly reliable mechanism, and are eminently suited for solid state and other electronic circuits. AH164, AH165 and AH165-2 series contact block holders can easily be removed manually. Moreover, the contact block can be easily attached or detached without using any special tools, thus facilitating addition or replacement of contact.

Selector switches

Selector switches can also be supplied in either knob-handle operated or key operated types.

Strong construction

The operator and contact blocks are molded from an excellent thermal resistance resin and can withstand the heat at the time of soldering. Since these pushbuttons are manufactured to industrial standards they can withstand vibration or shock thus eliminating lamp failure due to such causes as loose bases. With regard to the degree of protection, standard types which met the requirements of IP40 of IEC 60529, and oil tight types which meet the requirements of IP65 of the said, are available. This permits the application to various fields, from machine tools to OA (Office Automation) facilities.

Quality feel tough

Both the operator and contact block are precisely engineered. There is no fear of the switch malfunction even after long use and it continues to operate smoothly for its service life of about 1,000,000 operations.

Easy color change

Color lenses fit over the inner button. The lens can easily be removed using a small screwdriver

Note: The luminous color of LEDs and neon illumination types varies with the body color of the product.

Visible inscription

Button legends are printed on legend sheet, which is stuck to the legend plate on the inner button. The lettering is back lit by the switch lamp and the inscription is highly visible through the color lens. Contact FUJI for your lettering requirements.

Excellent switch reliability

The switch uses a snap-action mechanism. The pushbuttons are available with either momentary or alternative actions. The snap-action switch has a double break movement which operates independently of the speed of switching. The contacts are made from gold-flashed silver. High contact reliability of 1mA at 5V AC/DC is assured. Contact blocks are available in 1NO+1NC to 3NO+3NC arrangement.

Large terminals

Solder/tab terminal is provided as standard. Wire-wrap terminal is available on request.

Safety

FUJI's original Trigger Action mechanism is used in the emergency stop pushbuttons. They are suitable for emergency stop and safety. This mechanism prevents the contacts from moving until the button is pushed and locked.

- Provided with a trigger action mechanism conforming to EN418.
- Provided with direct opening action (approved by TÜV) conforming to EN60947-5-1 and EN60947-5-5.

Alternate action

In the case of alternate action when the button is depressed the contacts are maintained and remain so even if the finger is removed. The button will not return to its free position. In order to remove the lock, the button must be given a second pressure before the button will return to its free position. This makes it most suitable as the switch for a power source.

Pushbutton with finger guards

Finger guards are provided for square or rectangular type pushbuttons (SF, TF, SL and TL types) in order to prevent operational error of adjacent buttons.

Approvals

For further information related to approved type, see page 04/187 to 04/190.

AH164 (standard) / AH165 (oil-tight)

Pushbuttons/Selectors/Pilot Lights/Buzzers AH164 and AH165 Type number nomenclature

■ Type number nomenclature

Pushbuttons, illuminated pushbuttons and pilot lights

AH165 - L R 11 E 3 - W
① ② ③ ④ ⑤ ⑥ ⑦

① Product category

AH164: Standard (IP40)

AH165: Oil-tight (IP65)

② Operator or lens

• Operator for illuminated pushbutton

SL: Flush square head

SL5: Flush square head (Alternate)

TL: Flush rectangular head

TL5: Flush rectangular head (Alternate)

L: Extended round head

L5: Extended round head (Alternate)

TGL: Flush rectangular head with guard

TGL5: Flush rectangular head with guard (Alternate)

SGL: Flush square head with guard

SGL5: Flush square head with guard (Alternate)

• Operator for pushbuttons

SF: Flush square head

SF5: Flush square head (Alternate)

TF: Flush rectangular head

TF5: Flush rectangular head (Alternate)

E: Extended round head

E5: Extended round head (Alternate)

TGF: Flush rectangular head with guard

TGF5: Flush rectangular head with guard (Alternate)

SGF: Flush square head with guard

SGF5: Flush square head with guard (Alternate)

M: Mushroom head

M5: Mushroom head (Alternate)

SM: Convex square head

SM5: Convex square head (Alternate)

TM: Convex rectangular head

TM5: Convex rectangular head (Alternate)

V: Push-lock, turn-reset (32mm dia.)*1 *2

V1: Push-lock, turn-reset (40mm dia.)*1 *2

• Operator for emergency stop pushbuttons

V5: Push-lock, turn-reset (32mm dia.)*2

V6: Push-lock, turn-reset (40mm dia.)*2

• Lens for pilot lights

Z: Extended round

ZS: Flush square

ZT: Flush rectangular

ZM: Dome

Note: *1 Product with no trigger action mechanism

*2 AH165 type only, direct opening action

③ Color of button or lens

Code	color	Button	LED	Incandescent	Neon
G	Green	○	○	○	○
R	Red	○	○	○	○ (Orange)
B	Black*	○	—	—	—
Y	Yellow	○	○	○	○ (Orange)
W	White	○	○ (Orange)	○	○ (Orange)
S	Blue	○	○	○	○ (Green)
O	Orange	○	○ (Amber)	○	○
RG	Red/Green	—	○	—	—

Notes: • (): indicates luminous color

• AH165-V, V1, V5, V6: Red only

* Not available for illuminated types

④ Contact arrangement

01: 1NC*1

22: 2NO+2NC

02: 2NC*1

33: 3NO+3NC*2

11: 1NO+1NC

Notes: *1 Available for AH165-V, V1, V5, V6

*2 Not available for with transformer types

⑤ Lamp voltage

Code	LED	Incandescent**2	Neon*2
AA	5V DC*2	—	—
A	6V DC*2	5V AC/DC	—
B	12V DC	12V AC/DC	—
E	24V DC	24V AC/DC	—
H	100-110V AC*1 *2	100-110V AC*1	110V AC
K	—	—	120V AC
M	200-220V AC*1 *2	200-220V AC*1	220V AC
P	—	—	240V AC

Notes: *1 With transformer (LED: 24V, Incandescent: 28V)

*2 Not available AH165-ZM

• ZM type: LED lamp only (12, 24V DC)

⑥ Type of lamp

Blank: Incandescent

1: Neon

2: Spot LED, LED (ZM types)

3: Flat LED

⑦ Terminal

Blank: Solder/tab

W: Wire-wrap

S: Soder (AH165-V, V1, V5, V6 types only)

Note: ZM types: wire-wrap terminal only (Code is blank)

■ Specifications (Indoor use)

- Pushbutton switches, illuminated pushbutton switches selector switches, pilot lights

Item	AH164	AH165
Rated insulation voltage	250V AC/DC	
Ambient temperature (no condensation or no icing)	-20 to +70°C *1	-10 to +70°C *2
Humidity	45 to 85%RH (at -5 to +40°C), no condensation or no icing	
Durability (operations)	Mechanical Pushbutton switch Momentary action: 1 million Alternate action: 250,000 Push-lock, turn-reset: 100,000 Selector switch: 250,000 *3	
	Electrical 100,000 (220V AC 0.7A)	
Dielectric strength	2000V AC, 1 minute (Between lamp and contact terminals: 1500V AC, 1 minute)	
Conditional short-circuit current	1000A	
Short-circuit protective device	Fuse 1A *4	
Pollution degree	3	
Vibration	Resonance: 10 to 55Hz, double amplitude 0.1mm *5 Constant: 16.7Hz, double amplitude 3mm	
Shock	Malfunction durability: 100m/s ² *6 Mechanical durability: 500m/s ²	
Operating frequency	1200 operation/hour (on-load factor: 40%)	
Insulation resistance	100MΩ or more (500V DC megger)	
Degree of protection	IP40	IP65

Notes: *1 For illuminated pushbutton switch and pilot light: -20 to +55°C

*2 For illuminated pushbutton switch and pilot light: -10 to +55°C

*3 Key insertion/removal durability for selector switch key types: 10,000

*4 AH165-V, V1, JM, RJM, V5, V6 types: Fuse 5A

*5 Emergency stop type: 10 to 500Hz, double amplitude 0.7mm (acceleration 50m/s²), according to the test condition of EN60947-5-5 (1998)

*6 Emergency stop type: 150m/s²

● Buzzers

Item	AH164-TX	AH164-TX1
Rated insulation voltage	60V AC/DC	
Operating voltage	6V AC, 6V DC, 12 to 24V AC/DC 35 to 48V AC/DC	
Sound level	80dB (0.1m) 60dB(1m)	90dB (0.1m) 70dB(1m)
Durability	1000h	
Frequency	2 ±0.5kHz	2.4 to 3.3kHz
Intermittent cycle	Approx. 170 cycle/minute	
Current consumption	7mA(24, 48V DC) 15mA(6V DC) 20mA (6, 24V AC) 30mA (48V AC)	15mA (24, 48V DC) 25mA (6V DC) 30mA (24V AC) 40mA (48V AC) 50mA (6V AC)
Dielectric strength	1000V AC, 1 minute	
Insulation resistance	100MΩ or more (500V DC megger)	
Ambient temperature	-20 to +60°C (no condensation or no icing)	
Humidity	45 to 85%RH (at -5 to +40°C)	
Operator protection	IP00	

Item	AH164-TX2	AH165-X
Rated insulation voltage	60V AC/DC	
Operating voltage	6V AC/DC, 12 to 24V AC/DC 35 to 48V AC/DC	
Sound level	70dB to 90dB (0.1m) 50dB to 70dB (1m)	60dB to 80dB (0.1m) 40dB to 60dB (1m)
Durability	1000h	
Frequency	2 ±0.5kHz	2.4 to 3.3kHz
Intermittent cycle	Approx. 170 cycle/minute	
Current consumption	30mA (6V DC) 20mA (24, 48V DC) 40mA (6, 24, 48V AC)	
Dielectric strength	1000V AC, 1 minute	
Insulation resistance	100MΩ or more (500V DC megger)

Pushbuttons/Selectors/Pilot Lights/Buzzers

AH164 and AH165

Ratings and specifications

■ Contact ratings

● UL/CSA standards

Rated thermal current	Rated operational voltage	Maximum current	
		AC (Res. load)	DC (Res. load)
5A	24V 125V 250V	– – 5.0A	1.0A 0.2A –

● EN standards (TÜV approved)

Rated thermal current	Rated operational voltage	Rated operational current				
		AC 15 (Ind. load)	AC 13 (Ind. load)	AC 12 (Res. load)	DC 13 (Ind. load)	DC 12 (Res. load)
5A	24V 100 to 120V 100 to 125V 200 to 240V	– 0.3A – 0.3A	– 1.0A – 0.7A	– 1.5A – 1.0A	0.7A – 0.15A –	1.0A – 0.2A –

■ Lamp ratings

Rated operational voltage	Consumption		
	LED DC	Incandescent AC/DC	Neon AC
5V	7mA (Yellow: 28mA)	0.45W (6V)	–
6V	7mA (Yellow: 28mA)	–	–
12V	7mA	0.55W (14V)	–
24V	7mA	0.55W (28V)	–
110V	–	–	0.19VA
120V	–	–	0.21VA
220V	–	–	0.38VA
240V	–	–	0.42VA

Notes: • With transformer (LED): 2.6VA/110, 220V

• With transformer (Incandescent): 2VA/110, 220V

• For the incandescent lamps, the values in parentheses indicate the rated voltage of the lamps.

■ Contact reliability

FUJI has confirmed that the unit can be used in 1mA circuit conditions at 5V AC or DC. The operable range may vary depending on the ambient conditions and type of load.

■ Illuminated pushbutton switches/without transformer

• The operating angle range can be changed as shown below by setting the attached flange shifted by 45° in combination with the contact block.
 In this case, the minimum mounting pitch is 26mm because the contact block is shifted by 45° from the flange.

• Contact block position

• Contact arrangement and operator position: 2-position selector switch

Contact arrangement	1NO+1NC	2NO+2NC	3NO+3NC

Pushbuttons/Selectors/Pilot Lights

AH165-2

Ratings and specifications

■ Standards approved

UL508	File No. E44592
CSA C22.2 No.14	File No. LR20479 (except for AH165-2Z, 2ZE, 2SZ, 2SZE) File No. LR84365 (for AH165-2Z, 2ZE, 2SZ, 2SZE)
TÜV: EN60947-5-1	Pushbutton, illuminated pushbutton: R9250087 Selector (except for AH165-2H, SH), illuminated selector: R9250088 Selector (for AH165-2H, SH): R9250087 Pilot lights: R9250089

■ Specifications (Indoor use)

Item	AH165-2	
Rated insulation voltage	250V AC/DC	
Ambient temperature (no condensation or no icing)	-10 to +70°C *1	
Humidity	45 to 85%RH (at -5 to +40°C), no condensation or no icing	
Durability (operations)	Mechanical	Pushbutton and illuminated pushbutton switch Momentary action: 1 million Alternate action: 250,000 Push-lock, turn-reset: 100,000 With selector ring: 250,000
	Electrical	Selector and illuminated selector switch: 250,000*2 100,000 (220V AC 0.7A)
Dielectric strength	2000V AC, 1 minute (Between lamp and contact terminals: 1500V AC, 1 minute)	
Conditional short-circuit current	1000A	
Short-circuit protective device	Fuse 1A	
Pollution degree	3	
Vibration	Resonance: 10 to 55Hz, double amplitude 0.1mm Constant: 16.7Hz, double amplitude 3mm	
Shock	Malfunction durability: 100m/s ² Mechanical durability: 500m/s ²	
Operating frequency	1200 operation/hour (on-load factor: 40%)	
Insulation resistance	100MΩ or more (500V DC megger)	
Operator protection	IP65	

Notes: *1 For illuminated pushbutton, illuminated selector switch and pilot light: -10 to +55°C

*2 Key insertion/removal durability for selector switch key types: 10,000

■ Contact ratings

See page 04/194

■ Lamp ratings

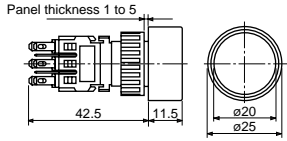

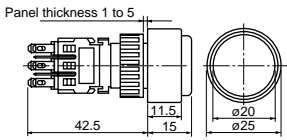

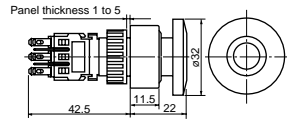

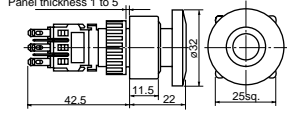

Rated operational voltage	Consumption		
	LED DC	Incandescent AC/DC	Neon AC
5V	7mA (Yellow: 28mA)	0.45W (6V)	—
6V	7mA (Yellow: 28mA)	—	—
12V	7mA	0.55W (14V)	—
24V	7mA	0.55W (28V)	—
110V	—	—	0.19VA
120V	—	—	0.21VA
220V	—	—	0.38VA
240V	—	—	0.42VA

Notes: For the incandescent lamps, the values in parentheses indicate the rated voltage of the lamps.

■ Contact reliability

FUJI has confirmed that the unit can be used in 1mA circuit conditions at 5V AC or DC. The operable range may vary depending on the ambient conditions and type of load.

Pushbuttons/Selectors/Pilot Lights/Buzzers AH164, AH165 and AH165-2 Notes on use

Notes on use

■ Installation on panel

- For installation, use dedicated wrench AHX601. The appropriate tightening torque is 0.6 to 1N·cm.
- The installation sequence is as follows:
Pass the operator base through the hole in the panel and secure it by tightening the bezel. Properly position the catch arms and the catch legs of the operator base and push the contact holder onto the operator base. To remove the contact holder, pull it while pressing the catch arms inward.

■ Mounting steps of switch with transformer

- ① Pass the switch operator through the panel hole and secure with a nut by way of the retainer metal from the front of the panel.
- ② Align the position of the catch arm of the contact block holder with that of the catch leg of the switch operator. Engage these two catches by pushing them together.
- ③ Insert and secure the transformer unit while assembling the contact block holder with the retainer metal.
- ④ Connect the receptacle terminal with lead wires extending from the transformer to the lamp terminal of the contact block holder. (Be care on the polarity of the LED. Red: +, Black: -)
- ⑤ Push in and secure the standard accessory insulation cover by aligning its position with each terminal. To replace the transformer, remove the transformer by widening the catch leg of the contact block holder. Pay attention not to excessively widen the catch leg. Mounting steps are the same as the above steps ③, ④, and ⑤.

■ Installing the protection cover / dust-tight cover, guard-ring

- Be careful that the panel thickness does not exceed the following:
- Panel thickness
 - Protection cover: 2.6mm max.
 - Dust-tight cover: 2.0mm max.
 - Guard ring: 2.5mm max.

■ Operating voltage and rated voltage of incandescent lamps

Rated voltage	Operating voltage
6V	4 to 5V
14V	10 to 12V
28V (Standard)	20 to 24V

Incandescent lamps should be operated at the operating voltages if a lamp service life of 5,000 to 10,000 hours are needed. The ambient temperature must not exceed 30°C if the lamp is used at the rated voltage continuously.

■ Method of replacing lamp

- Incandescent lamps/LED lamps/neon lamps
Remove the color lens and inner button with a remover AHX618. Then draw out the lamp with a lamp changer AHX672. When installing lamps, do it manually and in the reverse order of removing.
- Products with blue and green LEDs
The LED devices on products with high-brightness (blue and green) LEDs are very sensitive to static electricity. When replacing LED lamps do not allow static electricity to come into direct contact with the metal frame on the upper side of the LED lamp. The LED device may be damaged if this part is subjected to static electricity. When installing or removing an LED lamp, it is recommended that you use the lamp changer (AHX672).

- To replace the lamp of a AH165-2 illuminated pushbutton switch (ML, VL), remove the button and draw out the oil-tight cap.

- Then, replace the lamp using a lamp changer (AHX672) and push the oil-tight cap into its original position with its engaging projection properly adjusted (see the figure below).

Note: Lamp of AH165-ZM type can not be replaced.

■ **Method of replacing color lens**

- To remove the color lens, insert a small screwdriver into the color lens and twist in direction of the arrow.

- For an AH165-2, use a small standard screwdriver or a similar tool with a flat end. If one side of the color lens is removed from the screen, insert the screwdriver or a similar tool deeper and remove the color lens together with the screen.

■ **Replacing pushbuttons**

In the case of alternative action type pushbutton switches and illuminated pushbutton switches, be sure not to replace the pushbuttons in their locked state. This could result in internal damage to the mechanism.

■ **Description sheet**

The Fuji description sheet is 25μm thick. If preparing custom description sheets, make sure that the thickness is 0.1mm or less.

■ **Contact block**

To replace a contact block, use removing tool AGX012. If excessive force is applied when attempting to open the support legs for the contact block holder, deformation or damage may occur.

■ **Handling precautions**

- Do not apply torque in excess of 1.0 N•m to operate the selectors switch (Type "P"). Required operating force of switches is less than 0.1 N•m.
- Do not tap on a pushbutton to turn it ON or OFF, such handling may damage it. Be sure to operate the pushbutton by hand.

■ **Key type selector switch**

- Five key types (Type B to Type F) are available besides Type A, which is the standard key type.

Symbol on the key

Symbol on the main unit

Be sure to use a key with a symbol which is matched with the symbol on the main unit.

- Fully insert the key into the main unit before turning the key.
- The key turning force should not exceed 0.1 N•m.
- Do not pull out or insert the key forcibly.

■ **Wiring connections**

- Use a soldering iron with a wattage of not more than 30W and a tip length of more than 20mm.

Use a rosin-core solder

With a 30W iron complete soldering within 5 seconds, or 10 seconds with a 20W iron. Do not apply external force to the terminals. Do not deform the terminals.

Because lead-free solder's melting point is slightly high, soldering work may be difficult. Use a soldering iron whose tip is rather large or whose calorie is rather high.

- Wires that can be connected
 - Two solid wires with a maximum diameter of 0.8mm (solder)
 - One stranded wire with a maximum area of 0.75mm² (solder)
- Flat connection terminal
 - (2.8□-1.25-5) 0.5 to 1.25mm²
 - (2.8□-0.5-5) 0.2 to 0.5mm²
- Using contact blocks
 - When using NO and NC contacts in the same contact block, avoid connection that involves opposite polarity or wiring from different types of power supply.
- For wiring to adjacent terminals, use insulated tubing to prevent short-circuit and to assure isolation. For solder terminals, be careful when connecting thick wires. Do not use too much solder.
- Wiring to wire-wrap pin terminals
 - Select the appropriate wire sizes and tools from the table below.

Wire size	Bit	Sleeve	Number of effective wraps
0.4mm dia.	3-A	1-B	About 8
0.5mm dia.	1-A	1-B	About 6
(0.65mm dia.)	(2-A)	(2-B)	(About 6)

Use ordinary wrapping for connection.

Wires of 0.65mm dia. must not be used on adjacent terminals. However, 0.65mm dia. wire can be mixed with 0.4 and 0.5mm dia. wires.

- Wiring to tab terminals
 - Use receptacles, No. 110.

■ **Installing lamps in close order**

When continuously lighting pilot lights or pressing illuminated pushbuttons installed in close order, care must be taken that the ambient temperature does not exceed the rated value.

Pushbuttons/Selectors/Pilot Lights/Buzzers

AH164, AH165 and AH165-2

Notes on use

■ LEDs

• LED Lamp Malfunctioning

The LED lamp is lit by a very small level of current (approximately 0.01mA). Therefore, the it may be erroneously lit by a current leaking from the surge absorption circuit or semiconductor circuit or due to stray capacitance between cables. In that case, provide a countermeasure (e.g., connect a resistor in parallel with the LED lamp).

• Countermeasure for Malfunctioning

Shunt Resistor R or CR elements connected in parallel
Lamp malfunctions can be prevented by connecting a shunt resistor (R) or CR elements (a capacitor and resistor) in parallel with the LED lamp terminal. The resistance and CR values vary depending on the model and the operating conditions.

Example 1

- 24V DC
R: 10kΩ (1W)

Example 2

- 110V AC
C: 0.33μF (250V AC)
R: 120Ω (0.25W)
- 220V AC
C: 0.33μF (250V AC)
R: 120Ω (0.25W)

• Incoming surge

Be careful that since high luminance LED products use an element sensitive to static electricity, they may not be lit by an abnormal voltage like surge.

■ Using a flat LED in 48V DC circuit

When a flat LED lamps having a rated voltage of 24V DC is used with 48V DC circuit, connect an external resistor of 3,500Ω (1W).

■ Preventing the neon lamp from incorrectly turning ON

The neon lamp may incorrectly turn ON due to current leakage or voltage induction. In such a case, connect a shunt resistor in parallel with the lamp.

Example) 110V AC: 100k (0.25W)
220V AC: 50k (2W)

If an external surge of 3kV or more may occur, connect a surge absorption element in parallel with the lamp.

■ Operation

Do not use a hitting or bouncing action to operate the button, or the switch may break. Always operate the switch by hand.

■ Storage and operation site

- Use the unit within the rated operating ambient temperature and humidity ranges.
- Do not use the enclosed type in places where oil or water is sprayed or where dust accumulates. In places such as these, use the oil-tight type or provide a dust cover.
- The oil-tight type is evaluated with standard cutting oil and cooling oil applied. The oil-tight type cannot be used with some special oils.

■ Buzzer

• Noise

If the application circuit is likely to generate excessively strong noise, connect a surge absorber (e.g., FUJI'S ENC390D, provided that the switch is a 24V type) in parallel with the buzzer.

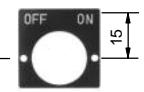

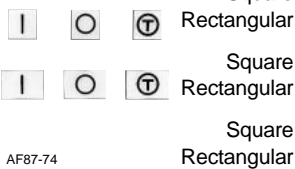

• Place of Use

- The buzzer does not have a drip-proof construction. Do not use the buzzer in places where oil or water is sprayed or where dust accumulates. If the buzzer is a splash-proof type, it will resist sprays of water.
- Do not use the buzzer in places that are subject to an excessive amount of corrosive gas.
 - Be careful that the buzzer is likely to sound erroneously due to leakage current or the like.

Accessories

Description	Type		
Sockets	Terminal	Type	Used with
	Solder/Tab Wire-wrap PC board	AHX697-S AHX697-W AHX697-P	Pushbuttons
Sockets for LED	Terminal	Type	
	Solder/Tab Wire-wrap	AHX697-SH3 AHX697-WH3	

SM-1097

Contact arrangement is 2NO+2NC only.
Except for AH165-2PL types

SM-1098

- Contact arrangement is 2NO+2NC only.
- These sockets are used only when LED lamps rated for 24V DC are used under 110V AC/DC.
- Except for AH164, 165 and 165-2 series pilot lights or AH165-2PL type.
- When side-by-side mounting and continuous lighting, note that a socket has higher temperature over the ambient temperature.

Dimensions, mm

Solder/Tab

PC board mounting Pushbuttons

Wire-wrap

PC board

Illuminated pushbuttons

For wiring to wire-wrap pin terminals, select appropriate wire sizes and tool from the table below.

Wire size	Bit	Sleeve	Number of effective wraps
0.4mm dia.	3-A	1-B	About 8
0.5mm dia. (0.65mm dia.)	1-A (2-A)	1-B (2-B)	About 6 (About 6)

Use ordinary wrapping for connection. Wires of 0.65mm dia. must not be used on adjacent terminals. However, 0.65mm dia. wire can be mixed with 0.4mm and 0.5mm dia. wires.

Multi display lights F series

■ Description

Provide a bright, colorful display surface.
More user-friendly with easy wiring and windows in a wide variety of sizes.

■ Features

Lightweight (LED display, 100V or 200V AC)

Only one-third the weight of FUJI conventional models.

Wide window size selection

A wide selection, including half-size windows.

AP30F: 30 x 30mm, 30 x 60mm, 15 x 30mm

AP40F: 40 x 40mm, 40 x 80mm, 20 x 40mm

Easy color and voltage changes

LEDs (with voltage-dividing resistors or voltage-dividing capacitors and resistors) are easily replaced from the panel surface.

Save energy

A sharp reduction in power consumption.

High brightness for more vivid colors

LEDs with two to eight times the brightness of those on FUJI conventional models. Newly added blue and pure white LEDs improve visibility.

Charged-section cover

A cover for the charged section is provided as a standard accessory.

Reduced depth (AP30 series, 100V or 200V AC)

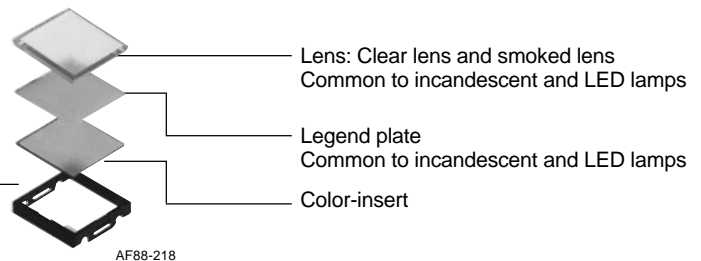

Two-thirds the depth of FUJI conventional models. And, the AP30F and AF40F feature the same depth.

■ Configuration of AP30F/AP40F

Lens case

Type number nomenclature

■ Type number nomenclature

AP30F- 04 05 □ E3-S 4 -SR (20) Z1

① ② ③ ④ ⑤ ⑥ ⑦ ⑧

① Basic type

AP30F: 30 × 30, 30 × 60, 60 × 30, 15 × 30mm (Window size)

AP40F: 40 × 40, 40 × 80, 80 × 40, 20 × 40mm

② Number of windows (=Row × Column)

	Row	Column	
AP30F	01,02,03,04,05,06,07,08,09,10 11,12,13,14,15,16,17,18,19,20	01,02,03,04,05,06,07,08,09,10 11,12,13,14,15,16,17,18,19,20	Max. 400
AP40F	01,02,03,04,05,06,07	01,02,03,04,05,06,07,08,09,10, 11,12,13,14,15	Max. 105

- Convert one rectangular window to two square windows.
- The number of windows is limited to 80 when transformer units are mounted.

③ Check terminal

C: with

Blank: without

④ Voltage unit and input voltage

AP30F series

	Incandescent	LED unit
Full-voltage type	A: 5.5V AC/DC C: 15.5V AC/DC D: 20V AC/DC E: 24V AC/DC	A3: 6V DC B3: 12V AC/DC C3: 15V AC/DC E3: 24V AC/DC ES: 24V AC/DC * F3: 48V AC/DC H3: 100-110V AC/DC L3: 115-127V AC/DC M3: 200-220V AC
Transformer unit	H: 100-110V AC L: 115-127V AC M: 200-220V AC Q: 230-254V AC S: 350-380V AC T: 400-440V AC V: 480V AC	Q3: 230-254V AC S3: 350-380V AC T3: 400-440V AC V3: 480V AC
Resistor unit	H6: 110V DC L6: 125V DC (Electric bulb 48V 1W)	—
Mixed type	X: Combination of the above three	X3: Combination of the above three types plus flicker and voltage stabilizer unit

* Short body type

AP40F series

	Incandescent	LED unit
Full-voltage type	C: 15.5V AC/DC D: 20V AC/DC E: 24V AC/DC	A3: 6V DC B3: 12V AC/DC C3: 15V AC/DC E3: 24V AC/DC ES: 24V AC/DC * F3: 48V AC/DC H3: 100-110V AC/DC L3: 115-127V AC/DC M3: 200-220V AC
Transformer unit	H: 100-110V AC L: 115-127V AC M: 200-220V AC Q: 230-254V AC S: 350-380V AC T: 400-440V AC V: 480V AC	Q3: 230-254V AC S3: 350-380V AC T3: 400-440V AC V3: 480V AC
Resistor unit	H6: 110V DC L6: 127V DC (Electric bulb 48V 2W)	—
Mixed type	X: Combination of the above three	X3: Combination of the above three types plus flicker and voltage stabilizer unit

* Short body type

Notes:

The combination of LED units and voltage units is limited as follows:

Code	Voltage unit	LED unit
E3FA	Flicker unit	24V (short body type)
E3FD		
E3C	Voltage stabilizer unit 27-35V AC/DC	24V (short body type)

- Two-color illumination face is only available for 24V AC/DC type.
- The flicker unit is available in square design only (S-type).

⑤ Shape of illuminated face

AP30F series

S: Square (30 × 30)

T: Rectangular, horizontally long (30 × 60)

V: Rectangular, vertically long (60 × 30)

H: Half-size (15 × 30) × 2

X: Mixture of S, T, and V

AP40F series

S: Square (40 × 40)

T: Rectangular, horizontally long (40 × 80)

V: Rectangular, vertically long (80 × 40)

H: Half-size (20 × 40) × 2

X: Mixture of S, T, and V

⑥ Illumination method

Blank: Single color, entire surface illumination

4: 2-color, entire surface illumination (for 24V AC/DC LEDs only)

2: 2-way rectangular-split illumination

⑦ Illuminated color

Using clear lens	Color plate (White)	Using smoked lens
R: Red	CR: Red	SR: Red
G: Green	CG: Green	SG: Green
Y: Yellow	CY: Yellow	SY: Yellow
O: Orange	CO: Orange	SO: Orange
W: White	CS: Blue	SW: White
S: Blue	RG: Red/green	SS: Blue
P: Pure-white*		

- Specify the number of windows in ().

- If two or more colors are specified using LED unit, the illuminated color ⑦ here should be blank.

* Not available for incandescent lamp

⑧ UL, CSA Approved (Option)

Using window layout sheet

Use the copies of the window layout sheet (See page 04/255) and specify for each of the window when ordering the following types.

- Types with letters on legend plate
- Types with symbol X for ④ voltage unit and input voltage
- Types with symbol X for ⑤ shape of illuminated face
- When two or more illuminated colors are specified for LED unit in ⑦.

■ Ordering information

Specify the following:

1. Type number

Multi Display Lights AP30F and AP40F Specifications and performance

Note: For H Type, count two-windows as one S-type window.

H type (Half size) S type (Square type)

■ Installation

Mounting panel

- Panel thickness: 1 to 6mm
- The panel thickness must be able to support the weight of the products and wiring cables. Take particular care in deciding the panel thickness when the products are heavy.

Panel cutout

Cut the mounting panel according to the numbers of rows and columns of windows. (See the dimensions on page 04/240 and 242.)

How to install

- Insert the product into the panel cutout from the front of the mounting panel. Make sure the product top and bottom are correctly oriented. The product nameplate is stuck to the top of the product.
- Fix the brackets into the side-plate slots at the back of the panel, as shown in the figure below, and clamp the product with the bracket screws. (Tightening torque : 0.4 to 0.6N•m)

■ Wiring

Terminal size

The M3.5 terminal screw is suitable for both phillips and slotted screwdrivers. The terminal washers are the self-lifting type. Use crimp terminals. (Tightening torque : 0.8 to 1.0N•m). Double crimp terminals can be connected.

Staggered terminals

Because the terminals are staggered, jumper connection is simple. Jumpers are supplied with products as standard. Rated current of jumper : 3A

■ Mass (g)

Mass of multi display light = Voltage unit × (rows × columns) + Side plate × (rows + columns)

AP30F

Description			Mass (g)
Voltage unit	Incandescent	Full-voltage type	29
		With transformer (short)	79
		With transformer	107
		With resistor unit	52
	LED	Full-voltage type	29
		With transformer	109
		Short body type	33
		With R/CR voltage dividing type	32
		2-color all surface illumination with check terminal half size	38
		With flicker unit	54
		With voltage stabilizer unit	54
		Side plate	27

The number of brackets required depends on the type as follows

Full-voltage type and transformer type with 1 to 20 lamps

Column	AP30F	01~02	03~08	09~15	16~20
Row	AP40F	01~02	03~06	07~11	12~15
AP30F	AP40F				
01~02	01~02				
03~06	03~04				
07~10	05~07				
11~15	-				
16~20	-				

Transformer type with 21 to 50 lamps

Rows or columns	1~2	3~4	5	6~8	9	10~12	13	14~16	17	18~20
Brackets required	1	2	3	4	5	6	7	8	9	10

The transformer type with over 20 lamps is very heavy and extra brackets are required. Fit brackets at equal intervals.

Transformer type with 51 to 80 lamps

Fit brackets in all slots.

AP40F

Description			Mass (g)
Voltage unit	Incandescent	Full-voltage type	32
		With transformer	110
		With resistor unit	64
		LED	Full-voltage type
	LED	With transformer	121
		Short body type	33
		With R/CR voltage dividing type	32
		2-color all surface illumination with check terminal half size	38
		With flicker unit	67
		With voltage stabilizer unit	67
		Side plate	28

Multi Display Lights AP30F and AP40F Notes on use

■ Replacing parts

Detaching lens case

To remove a lamp, place the tip of a flat-blade screwdriver in the groove at the edge of the lens case and press it in the direction of the arrow. The tip of the screwdriver should be 4.5mm or less wide and 0.6mm or less thick.

To remove both the LED unit and lens case, place the tip of flat-blade screwdriver in one of the indents on the edges of the lens case and press it in the direction of the arrow.

When installing an LED unit, press it into the frame so that the LED unit side with the arrow faces the top side of the frame (i.e., the side with the unit type nameplate). The LED unit must be in the correct orientation when installing it.

After installing the lens case and lens, use your finger to press the lens part firmly until it stops in place. To prevent defective lighting or other problems caused by static electricity, do not press directly on the LED chip surface with your finger.

■ Replacing color inserts and legend plates

To replace a color insert and legend plate, insert a flat-blade screwdriver and press it to remove the lens.

Using the specially-designed suction cup removal tool DN7Y020, replace a color insert and legend plate by applying the suction cup as shown in the diagram below.

Do not touch the chip when the color insert is removed from the LED unit and the LED chip is exposed. Defective lighting or other problems may be caused by static electricity. Install a color insert and legend plate by inserting their rough surfaces so that they face the lamp.

Replacing incandescent lamps

Insert and remove lamps using the hollow end of the lamp changer type AHX029.

LED unit color display

The operating voltage and lamp color are printed on the LED unit lamp using codes.

Rated voltage code \ Color code	Color code							
	R	A	W	Y	G	S	P	F
M	220R	220A	220W	220Y	220G	220S	220P	
L	127R	127A	127W	127Y	127G	127S	127P	
H	110R	110A	110W	110Y	110G	110S	110P	
F	48R	48A	48W	48Y	48G	48S	48P	
E	24R	24A	24W	24Y	24G	24S	24P	24F
C	15R	15A	15W	15Y	15G	15S	15P	
B	12R	12A	12W	12Y	12G	12S	12P	
6	6R	6A	6W	6Y	6G	6S	6P	
E (With check terminal)	24-RC	24-AC	24-WC	24-YC	24-GC	24-SC	24-PC	

Installing color inserts and legend plate

Inserting a color insert and legend plate

- For a color display when the lamp is OFF, insert first a color insert and then an opaque white legend plate into the lens case.
- For an opaque white display when the lamp is OFF, insert first a transparent color insert and then an opaque white legend plate into the lens case (only with LEDs).
- For smoked lenses, insert first a color insert and then an opaque white legend plate into the lens case.
- The legend plate and color inserts can be engraved.
- Do not touch the chip when the color insert is removed from the LED unit and the LED chip is exposed. Defective lighting or other problems may be caused by static electricity.

Opaque white display with the lamp off

Color display with the lamp off

LED polarity

The terminals of all 6V DC voltage products and DC flicker units have polarity, so care is needed when installing them. X1 is the positive terminal.

Connecting color lamps and half-size lamp windows

Terminals	Light color from two-color lamp	Half-size lamp window
X1 to X3	Green	Top
X1 to X2	Red	Bottom

Multi Display Lights AP30F and AP40F Notes on use

Assembling lens and lens case

Assemble the lens with lens case by mating lens projections with lens case indents.

■ Other precautions

1. Transformer units

- A maximum of 80 windows can function for a unit with transformers when the windows are square.
- Transformers are designed for a load of one incandescent lamp and one LED unit. It is not possible to connect additional loads.

2. Operating voltage and the rated voltage of incandescent lamp

- Incandescent lamps can be used within the lamp's rated voltage. If you need 5,000 to 10,000 hours of service life for incandescent lamp (at AC circuit), use the lamp within the standard operating voltage. Using incandescent lamps in DC circuit greatly reduces the lamp service life due to notching phenomenon. Use LED units in DC circuit instead.

Lamp rated voltage (V AC)	Standard operating voltage (V AC)
6.3	4 to 5.5
18	12 to 15
24	16 to 20
30	20 to 24

3. Flicker units

- When two or more flicker units are used in a Multi Display Light, they may not illuminate simultaneously because of variations in flicker unit circuits.
- Flicker units can be used only with square Multi Display Lights. They cannot be used with rectangular lights.

4. Continuous lighting

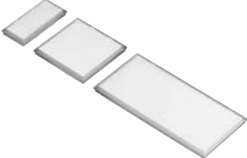

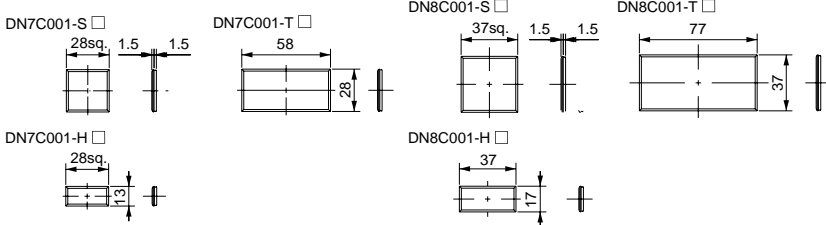

- For continuous light, the duty cycle should be 50% or less. If densely packed LEDs are lit continuously with a high duty cycle, LED life will be reduced.
- With 2-color lighting on the entire surface, do not use continuous lighting when lighting 2 colors simultaneously.

5. Store and operate these units within the temperature and humidity specifications on *page 04/237*.

6. Do not use these units at outdoor.

7. Do not use these units in places where dust or cuttings will accumulate. The lights may not turn ON if dust or cuttings penetrate into the units.

Multi Display Lights AP30F and AP40F Window layout sheet

■ Window layout ordering sheet

When ordering Multi Display Lights, fill in the necessary items in this ordering sheet on Page 04/255. (It is also recommended that you make copies of the sheet for future use.)

Cases in which you should order with the ordering sheet

- When ordering a mixture of LED luminous colors
- When ordering a mixture of window sizes in the illumination face
- When ordering a mixture of two-color illumination faces
- When ordering a mixture of input voltages
- When requesting embossed characters

Filling in the ordering sheet

1. Use lines to designate the borders of the illumination face.
2. Write the color code (G, R, W, Y, O, S) for each window into the bottom row of the window. For T and V types, write the code in only one place.
3. If you are requesting embossed characters, write the characters into the table.
4. For windows requiring more than 7 (vertical) or 15 (horizontal) spaces, continue writing on a separate ordering sheet.
5. Write in two places for a two-split illumination type.
6. When using a flicker unit or a voltage stabilizer unit, write the unit code into the bottom row of the window.

Rotary Switches AC09, 16 and 32

Digital code output type

Description

FUJI AC series rotary switches offer a wide choice of output codes. They feature sliding Au-flashed contacts for high contact reliability. Inhibitor and parity check circuits guard against switch malfunctions caused by error signals. With only seven connections to make, these switches are an economical solution to multiposition switching needs.

Features

- Au-flashed contacts for high contact reliability.

- The protection of operator section meets the IP65 (IEC), so these switches can be used in oil-splash environments, such as on machine tool control panels. (Except for AC32)
- A wide choice of output codes fits a broad range of applications. Available step angles are 15, 30, and 360°/26 (13.85°). Real binary code, complementary binary code, and real gray code are available.
- Switches are available with connectors or with lock rings for easy handling.
- Stopper screw positions are user selectable.

Ratings

Volts	Operational current (A) (resistive load)
50V AC	0.05
5V AC	0.5
25V DC	0.05
5V DC	0.25

Performance

Rated insulation voltage		50V
Operating temperature		-20 to +70°C
Humidity		45 to 85%RH (non condensation)
Service life	Mechanical	50,000 operations
	Electrical	50,000 operations
Dielectric strength	Between terminals	250V AC, 1 minute
	Between terminals and ground	1500V AC, 1 minute
Insulation resistance	Between terminals	500MΩ or more
	Between terminals and ground	5,000MΩ or more
Degree of protection (operator section)		AC09, AC16 : IP65 (IEC60529) AC32 : IP40 (IEC60529)

Type number nomenclature

AC 09 – C Z 0 / 25 L1 E A01 / 0007

Basic type

Mounting

- 09: M9 nut
- 16: M16 adapter
- 32: Adapter (32mm mounting pitch)

Type of code

- R: Real binary code
- C: Complementary binary code
- G: Real gray code

Angle of step

Angle	Setting position
X: 30°	0 to 11
W: 360°/13 (27.69°)	0 to 12
Y: 15°	0 to 23
Z: 360°/26 (13.85°)	0 to 25

Start position

Available step angle
0 to 11: 30°
0 to 12: 360°/13 (27.69°)
0 to 23: 15°
0 to 25: 360°/26 (13.85°)

End position

Available step angle
0 to 11: 30°
0 to 12: 360°/13 (27.69°)
0 to 23: 15°
0 to 25: 360°/26 (13.85°)

With or without lock ring

- Blank: Without lock ring
- 0007: With lock ring
- 0009: With adhesive lock ring

With or without connector

- Blank: 8-terminal, without connector
- A01: 8-terminal, with right-angle connector
- A02: 8-terminal, with straight connector
- B00: 7-terminal, without connector
- B01: 7-terminal, with right-angle connector
- B02: 7-terminal, with straight connector

With or without stopper screw

- Blank: With stopper screw
- E: Without stopper screw

Length of shaft (mm)

	AC09	AC16	AC32
L1:	16	—	14.5
L2:	18	—	16.5
L3:	20	—	18.5
L4:	22	19.5	20.5

Note: When shorter action than the maximum range of switch action is used, stopper screws are used. However, stopper screws are not used if the maximum action range is used when either 15° (symbol Y) or 360°/26 (symbol Z) is specified.

Panel cutting

■ Installation

AC09

Pass the switch body through the hole from the back of the panel, and secure it by tightening the hexagonal nut with a flat washer and a toothed lock washer.

The recommended tightening torque for the hexagonal nut is 1.5 to 2N·m.

Insert the lock ring (ACX001) between the panel and the flat washer, and the adhesive lock ring (ACX001A) between the switch body and the panel.

AC16

Pass the switch body with a bezel through the hole from the back of the panel, and secure it with a $\phi 16$ mounting nut. The recommended tightening torque for the nut is 0.6 to 1N·m.

AC32

Pass the switch body through the hole from the back of the panel, and secure it with two flat head screws from the face of the panel. The recommended tightening torque for the flat head screws is 0.3 to 0.5N·m.

■ Notes on use

1. Connecting wires

Note the following points when soldering:

- The power of the soldering iron must not be over 30W.
- Use solder with resin flux core.
- Complete soldering within 5 seconds if using a 30W soldering iron, or within 10 seconds if using a 20W soldering iron.

2. Note on the case linkage

3. Number of stopper screws shipped

- AC09 and AC32
 - Step angle: 30° (symbol X)
Positions 0/11 (0 to 11): one screw. User-selectable start and stop positions: two screws (one for start position, one for end position).
 - Step angle: 15° (symbol Y)
Positions 0/22 (0 to 22): one screw. User-selectable start and stop positions: two screws (one for start position, one for end position).
 - Step angle: $360^\circ/26$ (symbol Z)
Positions 0/24 (0 to 24): one screw. User-selectable start and stop positions: two screws (one for start position, one for end position).
- AC16
Customers can specify the stopper screw positions. The switch is then shipped with stopper screws already in the specified positions.

4. Stopper screw positions

Insert stopper screws into the switch body holes marked with letters, as shown in the insertion example on the right. These tables below show that the start position stopper screw is inserted in the hole on the left of the position setting and the end positions stopper screw is inserted in the hole on the right.

5. Installing a stopper screw

The maximum tightening torque for a stopper screw is 0.1N·m. Screw the stopper screw into position until it hits the body frame rib. Do not overtighten the screw.

Rotary Switches

AC 09, 16 and 32

Insertion example 1

- If symbol ① (step angle) is X-----type AC09-CX0/7L1:
Insert the start side stopper screw in hole A and the end side screw in hole Q.

- If symbol ① (step angle) is W-----type AC09-CW0/7L1:
Insert the start side stopper screw in hole A and the end side screw in hole Q.

- If symbol ① (step angle) is Y-----type AC09-CY0/7L1:
Insert the start side stopper screw in hole A and the end side screw in hole J.

Notes: 1. If the range of action is designated as 0/22 (0 to 22), insert a stopper screw into hole A only.
2. If the range of action is designated as 0/23 (0 to 23), no stopper screws are inserted (symbol ④ is E).

- If symbol ① (step angle) is Z-----type AC09-CZ0/7L1:
Insert the start side stopper screw in hole A and the end side screw in hole J.

Notes: 1. If the range of action is designated as 0/24 (0 to 24), insert a stopper screw in hole A only.
2. If the range of action is designated as 0/25 (0 to 25), no stopper screws are inserted (symbol ④ is E).

Insertion example 2

Cam-type control selector switches

■ Description

FUJI cam-type control switches are recommended for use on switchboards, control panels and switchgear because of their reliability in service. The main type is RC310 with operational current ratings of 10A.

Simplified and economical circuits can be designed around the RC310, since it can handle loads of up to 10A at 220VAC without the need of contactors. Typical examples of complex circuits based on the attractive features of these economical cam-type selector switches are given on pages 04/265 to 04/268.

FUJI is prepared to manufacture other versions to suit your particular applications, and switches with up to 12 selector positions can be made to order. RC310 switches are normally supplied with H-type handles. Alternative handle shapes available include the pistol-grip P-type, cane-handle shaped S-type and rosette shaped R-type.

Switches with a 2-12 position maintained type, 3-position center spring-return type and center spring-return type with locking device are also available.

■ Ordering information

Specify the following (See page 04/264):

1. Type number
2. Mounting method
3. Operation
4. Selector position and notch angles
5. No. of contact blocks
6. Contact arrangement
7. Handle
8. Handle colors

Panel Switches NS387 and RC310 Instrument switches

Voltmeter/Ammeter Changeover Switches

■ Description

These switches are used with voltmeters or ammeters in secondary PT or CT circuits. Normally, 3-phase line voltage or phase current is measured with 3 meters provided, which requires considerable switchboard or console space. Space can be saved by using NS387 and RC310 instrument switches, since the phase current or line voltage can be read with a single meter and either VS or AS (Voltmeter or Ammeter switch). FUJI AS's are precisely and ruggedly constructed, and open circuits do not occur at the time of switch-over, so eliminating the possibility of abnormal voltage trouble. NS387 is a

blade-type switch and RC310 is a cam-type. Both are compact in size and use highly dependable silver contacts. FUJI can also supply DC voltmeter type switches in addition to these for AC use.

■ Ordering information

Panel Switches

NS387

Control switches

Panel switches for industrial control switchboards

■ Description

NS387 control switches are used on control panels or consoles to operate H.V. circuit breakers or disconnecting switches. These switches are small in size, dependable and take up little switchboard space. Since they have a large current capacity they can be applied to many types of control circuits.

The movable blade has both an excellent contact performance and a long service life. Switches can be supplied in center spring return for momentary action and maintained versions, with 2, 3 and 4 positions. They can be fitted with H, K or R-type standard FUJI handles. The H-type is used as an ON-OFF switch to control circuit breakers or as a disconnecting switch. The K-type is mainly for regulation use and the R-type is used for controlling the power source. In addition to the standard handles key-controlled handles are also available.

Please refer to page 04/273 of this catalog for typical contact arrangements of these panel switches. We are in a position to supply many other types of switches to meet your particular application needs.

■ Technical data

Insulation resistance: Over 25MΩ at 500V DC
Dielectric strength: 2200V AC rms, 1 minute
Durability

Mechanical: 300,000 operations
Electrical: 100,000 operations at 220V AC 5A
Allowable ambient temperature: -5° to +40°C

■ Ratings

Contacts	Rated thermal current (A)	Making and breaking capacity

■ Special spanner

Use this spanner for installation or replacement

■ Ordering information

Specify the following (See page 04/273)

1. Type number
2. Letters or symbols to be printed on legend plate
3. Color of rosette (if you require other color but black standard color)
4. Color of handle
5. Options if required

■ **Type number nomenclature**

NS387 / **Basic type** / **1** + **1** + **1m** + **1m** **S1** **H1** **B** **L2**
 ① ② ③ ④ ⑤ ⑥ ⑦ ⑧

Construction

- Blank: Open type
- C: With transparent cover

Operation

- C: Maintained, 2-position
- A: Maintained, 3-position
- Blank: Spring return, 3-position

Handle locking device
 See page 04/274

Color of handle and rosette
 B: Black
 D: Dark green
 Note: The standard: Black (B).

Type of handle
 See page 04/274

With or without of micro switch
 Blank: Without
 S1: With a micro switch
 S2: With two micro switch
 Note: Specify the type of handle locking device when ordering a model equipped with a micro switch.

Note: Specify the embossed characters when ordering a model equipped with a legend plate.

Contact arrangement

Contact arrangement	Code	Contact position	Contact (varies depending on operation)			No. of combinations (varies depending on operation)		
			Blank	C	A	C	A	Blank
①	0-10	Contacts at right angles to the operating handle (in parallel to the operating handle only in the case of the 4-position changeover type)				①+③+④ ≤ 6-block	①+②+③ +④ ≤ 6-block	①+②+③ +④ ≤ 6-block
②	Blank, 1-10	The above contacts ① shifted clockwise by 45°		-		③+④ ≤ 4-block	③+④ ≤ 6-block	③+④ ≤ 4-block
③	0m-6m	Non-interrupting contacts at right angles to the operating handle (in parallel to the operating handle only in the case of the 4-position changeover type) Code "m" is added after the number of blocks.						
④	Blank, 1m-6m	The above contacts ③ shifted clockwise by 45° Code "m" is added after the number of blocks.						

Notes: • In each of the above contact forms, the symbol □ refers to the position of the operating handle.
 • If no contacts are required, leave ② and ④ blank and enter "0" for ① and ③.

• **Operation**

Operation	No. of positions	Handle position	Operation angle	Code
Maintained	2		90°	C
	3		45°	A
	4			D
Spring return	(3)			Blank
Spring / manual return	(3)			F
	(3)			E

• **Contact**

Standard contact

Non-break contact

For clockwise rotation, terminals 1, 3, and 4 are conductive before the continuity of terminals 1 and 4 is interrupted. After that, only terminals 1 and 3 are conductive.

Panel Switches

NS387

Control switches

■ Operating handle

• Combination of rosette and handle

Rosette	Handle	Type of handle (refer to 2. Shape of handle, table below)
For NS387	For NS387	Without micro switch: H, I, K KP1 – KP10 KQ1 – KQ10 KX1 – KX10 KY1 – KY10 R
	For RC310	Without micro switch: P, S, D, W
		With micro switch: H, P, S, K, D, R, W

Notes: • With micro switch equipped, NS387 panel switch are provided with NS387-use rosette as standard, and with the handle for RC310-1 cam switch.
 • The large handle (P, S, D, or W) for the RC310-1 is not compatible with any other handle.

• Shape of handle

For NS387	H type 	I type 	K type 	R type 	KP type 	KQ type 	KX type 	KY type
For RC310	H type 	R type 	W type 	S type 	P type 	K type 	D type 	

• Types of handle locking

Code	Center spring return type	Maintained type
Blank	In the case of the NS387, the handle can be turned after being pulled, and the handle then returns to the center position automatically when it is released. If the handle needs to be turned without being pulled, order a model with "no handle lock". The RC310 handle can be turned without being locked.	The handle can be turned without being locked.
L1	With a handle for the RC310. The handle can be turned after being pulled, and the handle then returns to the center position automatically when it is released.	The handle can be turned after being pulled, and the handle stops at each notch when it is released.
L2	The handle can be turned without being pulled, and will return to the center position automatically when it is released. The micro switch is activated while the handle is pulled in the center position, and the switch is reset when the handle is released. The handle, however, does not turn left or right when it is pulled.	The handle can be turned after being pulled, and when it is released in any notch position, the handle will stop at that notch position. Moreover, when the handle is pulled in any notch position, the micro switch will be activated, and both the micro switch and handle will be reset when the handle is released. However, the handle cannot be switched to any other notch while it is in the pulled condition.
L3	The handle can be turned without being pulled, and will return to the center position automatically when it is released. When the handle is pulled in the left position, the lock mechanism will activate and no other notch can be selected. In that case, the handle will automatically return to the center position when it is pressed in the shaft direction.	–
L4	The handle can be turned after being pulled. When it is released, the handle will automatically return to the center position in the pulled condition. The handle will return when it is pressed in the shaft direction.	–
L5	The handle can be turned without being pulled, and will return to the center position automatically when it is released. The micro switch will be activated when the handle is pulled in the center position, and the handle will return when the handle is pressed in the shaft direction.	–

Note: If a micro switch is equipped, it will be activated when the handle is pulled.

■ Assembled typical switches

Operation	Type(example)	Contact arrangement	Description
Center spring return	NS387/2 + 0mHD		<ul style="list-style-type: none"> The handle can be turned after being pulled, and will return to the center position automatically when it is released.
	NS387/2 + 2 + 0mHB		<ul style="list-style-type: none"> The handle can be turned after being pulled, and will return to the center position automatically when it is released.
	NS387/1 + 1mHB		<ul style="list-style-type: none"> The handle can be turned after being pulled, and will return to the center position automatically when it is released.
	NS387/2 + 0mS1B		<ul style="list-style-type: none"> RC310-1 handle, equipped with a rosette. Add L1 for the pull-and-turn type.
	NS387/1 + 0mS1HDL2		<ul style="list-style-type: none"> Provided with a micro switch, RC310-1 handle, and a rosette for the NS387. The handle can be turned without being pulled, and will return to the center position automatically when it is released. The micro switch will be activated while the handle is pulled in the center position.
	NS387/5 + 0mSBL3		<ul style="list-style-type: none"> RC310-1 handle, equipped with the NS387 rosette. When the handle is pulled in the left position, it will be locked, and the handle will automatically return to the center position when it is pressed in the shaft direction.
	NS387/1 + 0mS1H1BL4		<ul style="list-style-type: none"> Equipped with a micro switch, RC310-1 handle, and a rosette for the NS387. The handle can be turned after being pulled, and will return to the center position automatically when it is released, but the handle remains in the pulled condition. The handle will be reset when it is pressed. The micro switch will be activated while the handle is pulled.
Maintained 2-position	NS387/C3 + 1mKB		—
	NS387/C6 + 0mW1D		<ul style="list-style-type: none"> RC310-1 cam switch handle, equipped with a rosette.
Maintained 3-position	NS387/A6 + 0mRB		—
	NS387/A2 + 0mH1B		<ul style="list-style-type: none"> RC310-1 cam switch handle, equipped with a rosette.
	NS387/A3 + 3 + 0mS1KDL2		<ul style="list-style-type: none"> RC310-1 cam switch handle, equipped with the NS387 rosette. The handle can be turned left or right without being pulled. The micro switch will be activated while the handle is pulled.

For other than above, contact FUJI.

04

Terminal Blocks

General Information

■ Description

FUJI can supply a variety of terminal blocks for switchboard or switchgear use. FUJI terminal blocks and end barriers are strongly constructed from a phenol resin and have adequate creepage distance and excellent insulation characteristics. Good connections are assured by convenient screw terminals and solderless box lugs. All terminal blocks are designed to carry their rated amperage without danger of overheating. FUJI terminal blocks are available in a variety of types, some of which are illustrated on this page.

AYBN type is simple to assemble and is designed to speed up installation. It is available in up to 12 poles and 600 Amps versions.

AYBS type terminal blocks are made from the highest quality phenol resin and resists tracking. Current ratings are available up to 115 Amps and 12 poles. The customer is required to assemble the channel-mounted type himself. The modular construction allows the number of blocks in a channel to be increased or decreased very easily.

In addition we can also supply the **LT4D type** which is provided with an isolating switch, and **SKT type** power terminal blocks, which are used in motor circuits, power source and similar circuits. Testing terminals type **LT5** for CT, VT secondary circuits are also available.

SB-232

SB-277

Type AYBN

General purpose terminal blocks
600 Volts 15 to 600 Amps

■ **Further information:** See page 04/277.

SB-279

SB-279

Type AYBS

High quality terminal blocks
600 Volts 49 to 115 Amps

■ **Further information:** See page 04/279.

Type LT4D

Rail mounted terminal blocks with isolating switch
660 Volts 20 Amps

■ **Further information:** See page 04/280.

AF01-220

Type SKT

Terminal block with pressure solderless box lug type connector on one side and screw type connector on the other.

600 Volts 50 to 200 Amps

■ **Further information:** See page 04/281.

Type LT5

Testing terminal and link for VT and CT circuit
250 Volts AC/DC 30 Amps

■ **Further information:** See page 04/288.

■ Wire gauge and square

The following table shows the relationship between B.W.G., A.W.G. wire gauge and mm² cross-sections. In this catalog wire sizes are quoted in mm². Please use this table for reference.

Gauge	Square	Gauge	Square
B.W.G.	mm ²	B.W.G.	mm ²

Terminal Blocks

Type LT4D

Channel mounted type terminal blocks with isolating switch

660 Volts 20 Amps
 Wire size: Maximum 5.5mm²
 Terminal screw: M4

These blocks are provided with isolating switches. When opening the control circuit tentatively for testing or inspection purposes please operate the switch knob. If the leads of an ammeter are connected to both ends of the terminal block and then open the switch the ammeter will then be connected in series and this will allow measurement.

Warning

Do not use this switch for secondary CT circuits. Incorrect operation could be dangerous.

Illustration	Description	Type	Minimum quantity per order

With transparent cover power terminal blocks

600 Volts 50 to 200 Amps
Wire size: 2 to 100 mm²

- Transparent terminal cover allows the wiring configuration to be checked externally.
- Slotted hexagon head bolts that can be tightened with screwdrivers or box wrenches are used for the terminals.
- The line side and load side are provided with hinged terminal covers to ensure safety and allow easier maintenance and inspections.
- cUL approved, file No. E45457
SKT14A-3C to SKT100A-3C only.

■ Features

- Any number of poles can be assembled on a 35mm DIN rail.
- A lineup of 10 models supporting screw sizes from M3.5 to M16 and a maximum current of 600A is available.
- Our standard models are approved by UL, CSA, and TÜV.
- The molded material conforms to the UL standard for self-extinguishing materials (UL94V-0).
- Mounting is performed by simply pressing the block down onto the rail (except for models LT2E-200 to 600).

Terminal Blocks Type LT2E

■ Performance

Rated insulation voltage	600V
Ambient operating conditions	Temperature -25 to 60°C (with no icing or condensation) Relative humidity 45% to 85%
Temperature rise	Temperature rise in conducting metal is less than 35K.
Insulation resistance	200MΩ between charged parts, and between charged parts and the metal mounting plate (Measured at 500V DC megger.)
Dielectric strength	2,500V AC (1 min)
Applicable standards	Conforms to JIS C 2811

■ Material

Main body	PPE (modified polyphenylene ether resin) (black) UL94V-0
Conductive plate	C2680R (Ni-plated)
Terminal screws	SWRM (Zn-plated)
Side panel	PPE (modified polyphenylene ether resin) (black) UL94V-0
Cover	PC (translucent polycarbonate resin) UL94V-0
Legend plate	PVC (white)

	TÜV J9551165		660	250-600	

Note: The values in the above table are for when standard wires and crimp terminals are used for connection. Use the terminal block together with the crimp terminals and wires approved for the desired standard.

Testing Terminals Type LT5

Testing terminals for VT, CT circuit – For panel mounting

250 Volts AC or DC, 30 Amps
Wire size: Maximum 8mm²

These terminals are used in VT and CT secondary circuits.
These are used to test protective relays or meters or for carrying out calibration.

■ Ordering information

Specify the following:

1. Ordering code or type number
2. Quantity: One pack (10 pcs) is minimum.

■ Technical data

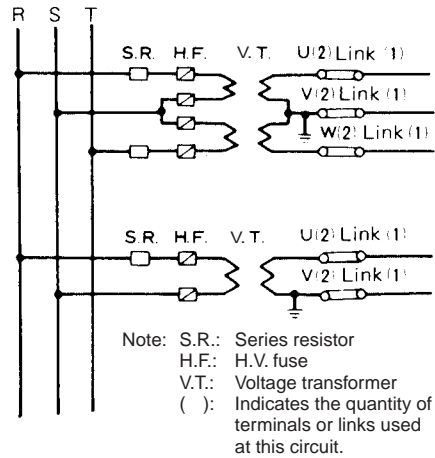

Insulation resistance: Over 100MΩ at 500V DC

Dielectric strength: 2000V AC rms. 1 minute

Ambient temperature: -25° to +50°C

■ Applications

VT circuit

CT circuit

Note: C.T.: Current transformer
(): Indicates the quantity of terminals or links used at this circuit.

Illustration	Description	Etched letters (Standard)	Type

Illuminated Switches/Pilot Lights

AG22 and AG23

General information

■ Description

AG series Command Switches are designed to be installed in a square or rectangular hole. AG23 series are 25 x 32mm rectangular type while AG22 series are 25mm regular square type. Either of them comprises illuminated pushbutton switch and pilot light. The illuminated pushbutton switches are available either in momentary action or alternative action. Moreover, their light sources are also available in either incandescent lamp or LED lamp. These AG series Command Switches are highly suitable for use with instrumentation panels or control panels. Their contacts use Au-flashed Ag contacts and adopt a sliding mechanism, thus ensuring a high contact reliability. The color inserts for indicators are available up to 4-way split types. Each indicator is provided with 5-color inserts and the color you desire can be easily replace.

■ Features

● Excellent contact reliability

These switches combine Au-flashed Ag contact and sliding mechanism features so as to ensure a high contact reliability even when used with low-voltage, small current circuits of 5V 1mA range. Therefore, they allow direct input to IC's. Moreover, their contacts are a double-break type, thus permitting their application to 240V AC circuits.

● Terminals are both use of soldering and tab terminal types

They are subjected to "solder plated" so as to permit accurate soldering.

● Contact can be added or replaced

The contact block comprises 1NO and 1NC. In AG23 series the contact arrangement is available up to 4NO+4NC and in AG22 series up to 2NO+2NC.

● Small in depth and compactly built

Both AG22 and AG23 series Command Switches are as small as 52mm in depth and their buttons are extruded only 5mm from the panel surface.

● The color inserts are available in max. 4-way split

The 4-color inserts can be positioned in any of the four quarters of the total display area. 6 combinations are available.

In these switches with incandescent lamp, their lens colors can be replaced with one from the "colored plate kit" which is provided for illuminated pushbutton switches or pilot lights.

■ Construction

AG23 (Incandescent lamp)

■ Approvals

For further information related to approved type, see page 04CD/1/2 to 04CD/1/3.

3-position				

Note: The operator position shown is where the nameplate-stuck-surface is positioned toward you.

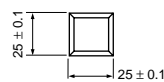

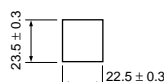

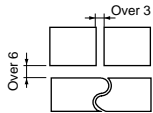

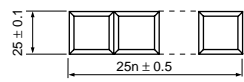

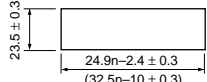

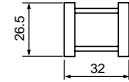

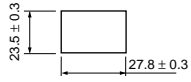

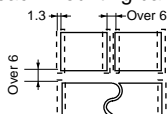

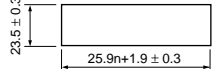

Notes on use

■ **Mounting the Switches (Pilot lights)**

Mounting the switches by inserting them into place in the front of the mounting panel.
 The switches will be held in position by the mounting springs.

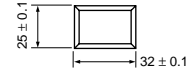

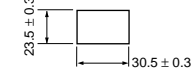

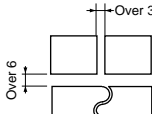

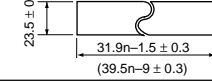

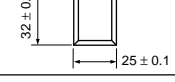

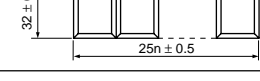

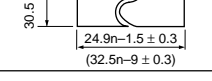

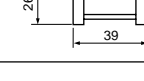

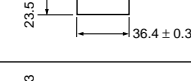

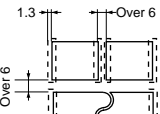

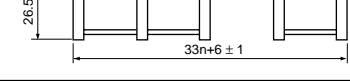

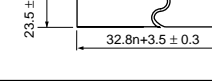

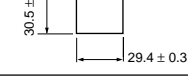

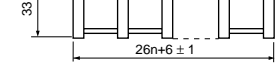

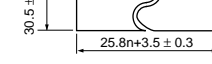

■ **Panel cutting**

● **AG 22**

Description		Mounting design	Panel cutting	Remarks
Flange mounting	Individual mounting (Horizontal)			Panel cutting space between rows of units 
	Manifold mounting (Horizontal)			
Barrier mounting	Individual mounting (Horizontal)			Panel cutting space between rows of units Dotted line indicates the position of each mounting barrier 
	Manifold mounting (Horizontal)			

Notes • n: Number of mounted unit Max 10 Panel thickness: 1 to 5 mm (with dust covers: 1 to 4 mm)
 • For vertical mounting, contact FUJI
 • The dimensions in parentheses are for tandem mounting of switches with dust covers.

● **AG 23**

Description		Mounting design	Panel cutting	Remarks
Flange mounting	Individual mounting (Horizontal)			Panel cutting space between rows of units 
	Manifold mounting (Horizontal)			
	Individual mounting (Vertical)			
	Manifold mounting (Vertical)			
Barrier mounting	Individual mounting (Horizontal)			Panel cutting space between rows of units Dotted line indicates the position of each mounting barrier 
	Manifold mounting (Horizontal)			
	Individual mounting (Vertical)			
	Manifold mounting (Vertical)			

Notes • n: Number of mounted unit Max10 Panel thickness: 1 to 5 mm (with dust covers: 1 to 4 mm)
 • The dimensions in parentheses are for tandem mounting of switches with dust covers.

Illuminated Switches/Pilot Lights

AG22 and AG23

Notes on use

■ Installing or removing switches

- To install switches in the standard mounting or barrier-isolated single-unit mounting method, insert the switches one at a time from the front of the panel.
- Installing the main bodies of the switches
If the mounting panel is vertical, install the switches with their nameplates positioned at the bottom. If the mounting panel is horizontal, install the switches with their nameplates positioned on this side.
- If the mounting panel is thin (1 to 2 mm thick), make panel cutouts smaller.

- When the barrier-isolated tandem-mounting method is employed, you can sequentially install switches one by one. For the final one, place a part of the center barrier in the mounting hole beforehand, and then insert the switch into the mounting hole so that the end barrier is in close contact with the main body of the switch (procedure: Fig.2 to Fig.1)
- To remove a switch which has been installed in the standard mounting or barrier-isolated single-unit mounting method, push out the switch by pushing it from the back of the panel while holding the panel by pushing it inward.
- To remove switches which have been installed in the barrier-isolated tandem-mounting method, proceed as follows: disengage the rear of the barrier on both sides of the switch to be removed so that the barriers are attached to the switch and, push the switch outward from the back of the panel while holding the front of the mounting panel firm, and take out the switch by opening the barriers by bending them to both sides on the front side of the panel (procedure: Fig.1 to Fig.2)

■ Operating voltage and rated voltage of incandescent lamps

Rated voltage	Operating voltage
6V	4 to 5V
14V	10 to 12V
18V	12 to 15V
28V (Standard)	20 to 24V

Incandescent lamps should be operated at the operating voltages if a lamp service life of 5,000 to 10,000 hours are needed. The ambient temperature must not exceed 30°C if the lamp is used at the rated voltage continuously.

■ Removing the lighting unit...AG23 (Oblong)

To remove the lighting unit, refer to the illustrations given in the below. (Especially when removing the unit installed on a panel)

Remarks*The unit has two jaws at lower left as indicated with the asterisks

Cross section A-A (main components only)

■ Lamp replacement (For illuminated pushbutton and pilot lights)

To replace a lamp, pull out the entire lighting unit and replace the lamp from the back of the lamp holder. Install the lighting unit so that it conforms with the contact end inside the switch main-body. The inserting force must not be greater than 60N.

■ Installing the lighting section

Install the lighting unit aligning the "TOP" display on the lighting unit and switch main-body as shown in the below.

Do not push the internal mechanism of the switch main body while the lamp unit has been removed. Deformation of contact piece for the lamp may result in poor lighting or malfunction.

■ Replacing the lamp (Lever type or rocker type)

To remove the lamp, remove the lens by using a screwdriver or other pointed tool (see the illustrations in the below) and then pull out the lamp by using a lamp remover (Type AHX672). To install the lamp, insert it with your fingers and then put back the lens.

Illuminated Switches/Pilot Lights AG22 and AG23 Notes on use

■ Removeing or installing the lens

To remove the lens, slide it horizontally. To install the lens, align it with the lamp house and insert it from the top.

■ Installing the color plate and nameplate

Install the color plate and Nameplate in the lens section with their grained surfaces directed inward.

■ Removeing or installing the nameplate (Lever type)

To remove the nameplate from the lens, press the studs of the lens against a flat plane so that the lens is widened slightly, and insert a screwdriver or other pointed tool into the groove of the nameplate. (See the illustration in the below.)

To install the nameplate into the cover, put the end of the nameplate in the cover and then press the nameplate into the cover by pinching them with your fingers. (See the illustration in the below.)

■ Contact block

To replace a contact block, use removing tool AGX012. If excessive force is applied when attempting to open the support legs for the contact block holder, deformation or damage may occur.

■ Contacts configuration modifications

Note that there are certain restrictions on contact configuration modifications.

No modifications other than those below are available. Although it is not impossible to modify a switch with 3a3b or 4a4b into that with 2a2b, do not attempt this modification because the layout of the contacts of the former differs from that of the latter.

Caution: never remove any of the contact units or dummy units which are located at both ends. If you do, the main units of the switches may be damaged, may become unable to be installed, or other troubles may result.

■ Wiring connections

• Use a soldering iron with a wattage of not more than 30W and a tip length of more than 20mm.

Use a rosin-core solder

With a 30W iron complete soldering within 5 seconds, or 10 seconds with a 20W iron. Do not apply external force to the terminals. Do not deform the terminals.

Because lead-free solder's melting point is slightly high, soldering work may be difficult. Use a soldering iron whose tip is rather large or whose calorie is rather high.

• Wires that can be connected

Two solid wires with a maximum diameter of 0.8mm (solder)

One stranded wire with a maximum area of 0.75mm² (solder)

• Using contact blocks

When using NO and NC contacts in the same contact block, avoid connection that involves opposite polarity or wiring from different types of power supply.

• For wiring to adjacent terminals, use insulated tubing to prevent short-circuit and to assure isolation. For solder terminals, be careful when connecting thick wires. Do not use too much solder.

■ Installing lamps in close order

When continuously lighting pilot lights or pressing illuminated pushbuttons installed in close order, care must be taken that the ambient temperature does not exceed the rated value.

■ Alternate types

AG23-L5

AG22-L5

Do not open/close the switch with its leaf spring held pressed. If you do, the alternate mechanism can be damaged.

Illuminated Switches/Pilot Lights

AG22 and AG23

Notes on use

■ Dismounting the switch (Main body)

- ① To remove the main body of a rectangular command switch installed on a panel, bend the mounting springs and push them outside of the main body. If it is densely packed with other devices, use the removing tool (Type AGX013) for ease of removal.
- ② For how to use the removing tool, see the illustration in the below. Insert the tool from back of the switch (main-body) and then push out the switch.

■ Operation

Do not use a hitting or bouncing action to operate the button, or the switch may break. Always operate the switch by hand.

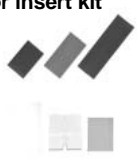

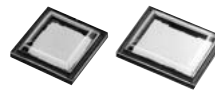

■ Storage and operating environment

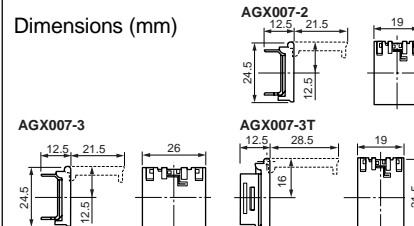

Observe the operating ambient temperature and humidity specifications indicated in the catalog or other related material. Do not use the switches in a location where they are exposed to being splashed with oil or water. The location must not be dusty.

- If it is inevitable that the installed switches will be exposed to dust or metallic particles caused by factory installation work or other tasks, cover the switches with suitable sheets to protect them.
- If using the switches in a dusty atmosphere cannot be avoided protect the switches with dust covers.

PC board		AGX005-P		AG23
Solder/tab		AGX004-2S	1a1b	
Wire wrap		AGX004-2W	2a2b	
PC board		AGX004-2P		
Solder/tab	AGX004-4S	3a3b		
Wire wrap	AGX004-4W	4a4b		
PC board	AGX004-4P			

AGX004			
For wiring to wire-wrap pin terminals, select appropriate wire sizes and tool from the table below.			
Wire size	Bit	Sleeve	Number of effective wraps
0.4mm dia.	3-A	1-B	About 8
0.5mm dia.	1-A	2-B	About 6
(0.65mm dia.)	(2-A)	(2-B)	(About 6)

Use ordinary wrapping for connection. Wires of 0.65mm dia. must not be used on adjacent terminals. However, 0.65mm dia. wire can be mixed with 0.4mm and 0.5mm dia. wires.

*2 Combined indicators and sockets.

Pushbuttons/Selectors/Pilot Lights AM22 and DM22 General information

The full range of the contact blocks and transformer units suitable for the AR22 and DR22 series may also be fitted to the AM22 and DM22 series.

■ Features

Quick-replacement contact blocks and transformer units

The snap-on construction makes replacement and addition of contact blocks and transformer units very simple and straightforward.

Oil-and dust-proof operator module construction

The protection level of the AM22/DM22 operator modules conforms to IEC Standard IP65. The special seals protect the operator modules and switch mechanisms against oil, dust, and grime, thus ensuring high performance in dusty and moist environments.

Miniaturization

- Pushbutton and selector switches with 1NO+1NC: 40mm deep
Pilot lights: 35mm deep
- The transformer now occupies far less space.

Self-cleaning contacts

All the contacts are double break type and feature self-cleaning action. Every time the switch is operated, the contact surfaces are wiped with a sliding movement, thus ensuring high contact reliability even at low voltage and small current levels (5V, 5mA).

Metal nut

Safer model with metal nut is also available

Wiring

- Wiring from two directions is possible.
- Wiring in both vertical and lateral directions facilitates wiring in narrow spaces.
- Color coding of contact blocks makes wiring easy.
1NO: Blue, 1NC: Red
Lamp terminal and transformer unit: Black

Safety

- A terminal cover is provided, assuring safety and security.
- FUJI's original Trigger Action mechanism is used in the emergency stop pushbuttons. They are suitable for emergency stop and safety. This mechanism prevents the contacts from moving until the button is pushed and locked.

Protection

- Excellent oil-tight construction (IP65) of the operator.
- Closure of the contact block has been improved.

■ Approvals

For further information related to approved type, see page 04CD/2/2 to 04CD/2/3.

■ Lamp durability

Lamp	Durability (reference)	Judgement criterion
LED	Approx. 30000h	When brightness is less than 50% of initial value
Incandescent	Approx. 5000h (AC)	When the bulb burns out

Note: • The operating voltage for incandescent lamps is set at 80 to 90% of the lamp's rated voltage.
• The durability of LED lamp is a mean value in all colors.

Estimated durability for LED lamps

Notes: • Durability at $T_a=25^\circ\text{C}$
• Durability is affected by temperature, humidity, and voltage fluctuation.

Incandescent lamp voltage characteristics

■ Combination of lens color and LED lamp luminous color

Button Color	Code	LED lamp	
		Luminous color	Type

Notes on use

Notes on use

■ Panel cutout hole

Fig. 1 Panel cutout hole dimensions, mm

Note : If key-washer or legend plate are not used, 3.2mm-wide location holes shown in Fig. 1 need not be cutout.

■ Mounting operator to panel

1. Pushbutton with a round bezel (ordinary mounting)

Insert the operator into the cutout hole from the back of the panel, and tighten the nut with the AR9A006 wrench from the front of the panel to secure the operator as shown in Fig.2.

Fig. 2 Pushbutton with a round bezel

AF95-465

Note : Recommended tightening torque is from 1.0 to 1.5N·m.

2. Mounting Procedure for the M3R and M8R

• Insert the operator through the cutout hole from behind the panel and secure it by the guard ring from the front of the panel.

Note: The correct tightening torque is 1.0 to 1.5 N·m.

• Use the wrench (AR9A001) to mount the button.

Note: The correct tightening torque is 0.5 to 1.0 N·m.

Fig. 3

■ Method for changing the button, lens, and nameplate

● AM22F0R, F5R, E0R, E5R, G3R, G8R

- To remove the button, insert a small flat-tip screwdriver in the groove around the periphery of the button, and gently pry it off working the screwdriver around the entire periphery.
- To attach the button, align the I-shaped protrusion on the back side of the button with the cross-shaped groove on the plunger and push the button in.

Fig. 4a

Fig. 4b

- In case of G3R, G8R: Loosen and pull the nut, and the button will come off.

Fig. 5

● AM22M0R, M5R, M4R, M0L, M4L, M5L, M9L

• The button is threaded. Attach it and remove it by hand. When attaching the button, make sure that it is screwed in completely.

Note: The correct tightening torque is 0.5 to 1.0 N·m.

• For illuminated pushbutton switches, insert the groove of the nameplate onto the protrusion on the plunger and push in the nameplate.

Fig. 6

● **AM22V0E, VSE, VME, V0F, VDF, VSF**

As shown in Fig.7, engage the tips of the AM9A008 wrench into the indentations around the pushbutton center button, and turn the wrench to loosen and remove the pushbutton center button, then remove the pushbutton.

Note: The correct tightening torque is 0.5 to 1.0N•m.

Fig. 7

Insert the operator into the cutout hole from the back of the panel, and as shown in Fig.8, insert the pushbutton into the operator cylinder while aligning the grooves inside the pushbutton with the protrusions on the operator.

Note: The correct tightening torque is 0.5 to 1.0N•m.

Fig. 8 Setting pushbutton to operator cylinder

● **AM22F0L, F5L, E0L, E5L, G4L, G9L, G2L, DM22E3L**

Engage the protrusions on the front end of the wrench (AR9A001) with the groove on the lens and screw on the lens.

Note: The correct tightening torque is 0.5 to 1.0 N•m.

● **Attaching the nameplate**

Insert the groove of the nameplate onto the protrusion on the plunger.

Fig. 9

● **DM22D0L, K0L**

Push the end of the wrench (AHX702) onto the lens and turn the wrench to attach or remove the lens.

Note: The correct tightening torque is 0.5 to 1.0 N•m.

Fig. 10

● **AM22PR, PCR, WR, WCR**

- (1) As shown in the following figure, insert the tip of a small flathead screwdriver into the selector tip groove. Rotate the screwdriver in the direction indicated by the arrow until the selector tip rises, and draw out the knob.
- (2) Attach the operator in the same manner as described in step 1.
- (3) Insert the knob, with the selector tip in the floated state, into the original position of the rotation tube, and push the selector tip into place.

Fig. 11a

Fig. 11b

● **AM22PL**

To remove an illuminated switch, insert a small flathead screwdriver or the like into the groove around the periphery of the knob and pry it off.

Fig. 12a

Fig. 12b

*Use a small flathead screwdriver with a head that is about 4 mm wide.

Pushbuttons/Selectors/Pilot Lights

AM22 and DM22

Notes on use

● AM22JR, JCR

- For key type switches, the decorative cover and nut are threaded. Removing the decorative cover enables the nut to be removed. Make sure to tighten the decorative cover so that there is no play.

Note: The correct tightening torque is 0.3 to 0.5 N•m.

Fig. 13

■ Water-proof and dust-proof cap

Applicable type: Water-proof cap AHX797
Dust-proof cap AM9D797

When attached to the panel in combination with a water-proof or dust-proof cap, the water-proof cap or dust-proof cap may sink downward and prevent the depressed button from returning to its original position.

As shown in the following figure, cut an approximately 5-mm air outlet in the portion of the ring packing touching the panel surface. Also, reduce the number of packing rings by one below the standard number. The clamp ring tightening torque is 1 to 1.5 N•m.

Fig. 14

Degree of protection

The water-proof cap or dust-proof cap seals the panel surface to provide IP65 protection.

- AM9D797 : Air outlet groove packing provided.

■ Using accessory ring-packings

Use the required number of ring-packings (1.3mm-thick, 5 pieces, resin mold).

Table below is a guideline for using the packings.

If a locking nut or legend plate is used, the thickness must be counted as an additional panel thickness.

Panel thickness vs. number of packings (reference data)

Effective panel thickness including lock-ring and legend plate thicknesses	Number of packings
1.0mm to less than 1.6mm	
1.6mm to less than 2.8mm	
2.8mm to less than 3.8mm	
3.8mm to less than 4.8mm	
4.8mm to less than 6.0mm	

■ Minimum mounting space, mm

The minimum mounting spaces required for AM22•DM22 command switches are given below. (Fig. 15)

Fig. 15

- Illuminated pushbutton and pushbutton
- Emergency stop illuminated pushbutton and emergency stop pushbutton
- Illuminated and non-illuminated selectors
- Pilot light

Notes: *1 • AM22M0L, M5L, M0R, M5R, V0E, V0F, VDF: 42
• AM22M3R, M8R: 49
• AM22WR, WCR: 40

*2 When mounting contact blocks at 30mm pitch, use it circuit of 380V or less.

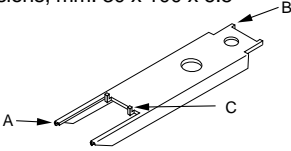

*3 Short body with transformer types: 50mm.

*4 This dimension applies when transformer units or contact blocks face each other.

*5 This dimension applies when transformer unit or contact block is mounted on only one side.

Other items are the same as for the AR22 and DR22 series, see page 04/53 to 04/57

Pushbuttons/Selectors/Pilot Lights

AM22 and DM22

Special products

Products equipped with contact protection cover

■ Features

A silicon rubber cover is provided for the contact block to keep out foreign matter such as dust, etc.
Other ratings and specifications are the same as those of the standard type.

■ Type

AM22 □ Z8

Specify "Z8" at the end of the type number of the standard type.

■ Dimensions

The only thing different from the standard product is the addition of a 1-mm thick silicon rubber cover around the contact block.

■ Applicable types

Type	Contact arrangement	Remarks
<ul style="list-style-type: none"> • Pushbuttons • Emergency stop pushbuttons • Selectors 	1NO+1NC, 2NO*1, 2NC	For use with a 1-step contact
	1NO+3NC, 2NO+2NC, 3NO+1NC, 4NO*1, 4NC	For use with a 2-step contact
<ul style="list-style-type: none"> • Illuminated pushbuttons (without transformer) 	1NO*2, 1NC	For use with a 1-step contact
<ul style="list-style-type: none"> • Emergency stop illuminated pushbuttons (without transformer) 	1NO+2NC, 2NO+1NC, 3NO*2, 3NC	For use with a 2-step contact
<ul style="list-style-type: none"> • Illuminated selectors (without transformer) 		

Notes: *1 Except for emergency stop pushbutton switch

*2 Except for emergency stop illuminated pushbutton switch

Resisting water-soluble cutting oils and heat

■ Features

Safer operation in environments exposed to water-miscible cutting fluids, machining oils, lubricating oils, cleaning oils and high humidity (up to 95%) is made possible by using materials that protect against rust and corrosion of components.
Other ratings and specifications are the same as those of the standard type.

■ Type

AM22 □ Z9, DM22 □ Z9

Specify "Z9" at the end of the type number of the standard type.

■ Dimensions

Same as those of the standard type

■ Applicable types

• AM22, DM22 series

AM22 (Except for emergency stop pushbutton switch and emergency stop illuminated pushbutton switch)

DM22 (Except for pilot lights with resistor unit)

Meeting IP2X finger protection standards

■ Features

Conforms to EN standard EN60204-1 (protecting against electric shock). The terminal has IEC60529 degree of protection; IP2X finger protection secured (a mock human finger used in testing did not come into contact with charged parts). The contact block and lamp terminal can be easily mounted or removed with the terminal cover mounted.

■ Type

AM22 □ ZB, DM22 □ ZB

Specify "ZB" at the end of the type number of the standard type.

■ Accessories

- Contact block (plus terminal cover)
 NO contact: AR9B290-□ D
 NC contact: AR9B291-□ D
- Transformer unit (plus terminal cover)
 AR9T511-□ D

■ Ratings and specifications

- Protection degree: IP2X
- Terminal screw: M3.5
 Wiring can be done with a solid wire or fork shaped crimp terminal.

Note: Ring-type crimp terminals cannot be used.

- Other ratings and specifications are the same as those of the standard type.

■ Applicable types

AM22

DM22: Without transformer, with transformer (except for short-body types)

■ Dimensions, mm

AM22/Pushbutton switches

DM22/Without transformer

DM22/With transformer

Note : * Except for the types 110V AC, 127V AC and 220V AC.

Pushbuttons/Selectors/Pilot Lights

AM22 and DM22

Special products

Metal nut (aluminum) types

■ Features

The nut is an aluminum ring.
Other ratings and specifications are the same as those of the standard model.

■ Type

AM22 □ ZM

DM22 □ ZM

Specify "ZM" at the end of the type number of the standard type.

■ Dimensions, mm

Same as those of the standard types.

■ Applicable types

AM22 (except for G4L, G9L, M3R, M8R, V□E*, V□F* types)
DM22 with round bezel

Note: * Standard type is a metallic ring (chrome plated).

Resisting sulfuration gas

■ Features

These products can be used in environments having a concentration of hydrogen sulfide gas of 0.5 ppm or less. The metallic parts have been subjected to an anti-corrosion treatment (see note).

The contacts of the AM series are gold plated.

Note: The body is made of resin and cannot be used with gases that affect resins (plastics).

■ Type

AM22 □ Z4, DM22 □ Z4

Specify "Z4" at the end of the type number of the standard type.

■ Notes on use

- This product is resistant to light corrosive gas exposure.
- Other measures, such as covering the entire switch with a box, and the degree of protection of the panel should be taken into consideration.

■ Ratings and specifications

Hydrogen sulfide gas concentration of 0.5 ppm max.

Ambient storage temperature: 8 to 37°C

Humidity: 62 to 81%

Other ratings and specifications are the same as those of the standard type.

■ Dimensions, mm

Same as those of the standard types.

■ Applicable types

AM22

DM22 (except for pilot lights with resistor unit)

(except for emergency stop pushbutton switch and emergency stop illuminated pushbutton switch)

DM22□ ZB	2003010305063383

- Note: Certified for all types listed in the above items
except for short-body transformer of pilot light.

Features

■ **Oil and dust-proof construction**

Protection complies with IEC Standard IP65. Special seals keep out oil, water, dust, and chips. This gives FUJI switches superior performance where dampness and dirt are likely to cause trouble. FUJI recommended where reliability is important.

■ **Slide-action self-cleaning contacts**

All contacts are double-break and self-cleaning. With each operation, the contact surfaces are wiped by sliding that ensures positive engagement and excellent conductivity even in very low level circuits (5V, 5mA) and in corrosive environments.

■ **Snap-on contact blocks and transformer**

The contact blocks are easily snapped on, without using screws. Light transformers can also be mounted without tools.

■ **A wide variety of operators**

Pushbuttons, illuminated pushbuttons, 2- or 3-position selector switches, and key-operated selector switches, etc. Choose the one you need.

■ **Contact blocks available up to 4NO+4NC**

The AH25 series controls from one to eight control blocks in combination. Each contact block contains a set of 1NO or 1NC contacts.

■ **Terminal covers**

Terminal covers make mounting safe. These covers can be used to indicate device numbers.

SP-987

■ **Easily replaced color tips**

Only a screwdriver is needed to replace the buttons. A wide variety of colors available to suit to your needs.

■ **Bright, long-life lamp**

LED lamps that have a longer service life than standard incandescent lamps are available. FUJI LED lamps are bright and can be used with both AC and DC, much the same way as incandescent lamps.

■ **Approvals**

UL listed 
 CSA certified 

For further information related to approved type, see page 04CD/3/2 to 04CD/3/4

Pushbuttons/Selectors/Pilot Lights

AH25

Quick reference guide

■ Pushbutton switches

Type	Description	Type	Description
AH25-F Flush round head  AF87-312 	The button surface is flush with the locking nut. Momentary type. <i>See page 04CD/3/10</i>	AH25-M Mushroom head  SG-185 	Mushroom head button. Momentary type. <i>See page 04CD/3/10</i>
AH25-F5 Flush round head /Alternate action  SG-166 	The button surface is flush with the locking nut. Push-ON/push-OFF type. <i>See page 04CD/3/10</i>	AH25-M5 Mushroom head /Alternate action  SG-183 	Mushroom head button. Push-ON/push-OFF type. <i>See page 04CD/3/10</i>
AH25-E Extended round head  AF87-314 	The button surface projects 7mm from the locking nut. Momentary type. <i>See page 04CD/3/10</i>	AH25-V Push-lock, turn-reset  AF89-414 	Locked when the button is pushed. To reset turn the button to the right. <i>See page 04CD/3/11</i>
AH25-E5 Extended round head /Alternate action  SG-175 	The button surface projects 7mm from the locking nut. Push-ON/push-OFF type. <i>See page 04CD/3/10</i>	AH25-U Wobble stick  SG-202 	The contact works when the lever is moved in any direction. Spring return action. <i>See page 04CD/3/11</i>
AH25-G Extended with half guard  SG-171 	The upper half of the button has a guard ring to help prevent operating errors. Momentary type. <i>See page 04CD/3/10</i>	AH25-SF Flush square head  SG-208 	The button surface is flush with the guard. Momentary type. Operator protection conforms to IP40. <i>See page 04CD/3/11</i>
AH25-G5 Extended with half guard /Alternate action  SG-172 	The upper half of the button has a guard ring to help prevent operating errors. Push-ON/push-OFF type. <i>See page 04CD/3/10</i>	AH25-SF5 Flush square head /Alternate action  SG-210 	The button surface is flush with the guard. Push-ON/push-OFF type. Operator protection conforms to IP40. <i>See page 04CD/3/11</i>
AH25-G1 Extended with full guard  AF87-179 	The button has a guard ring to help prevent operating errors. Momentary type. <i>See page 04CD/3/10</i>	AH25-SE Extended square head  SG-206 	The button surface projects 7mm from the guard. Momentary type. Operator protection conforms to IP40. <i>See page 04CD/3/11</i>
AH25-G6 Extended with full guard /Alternate action  SG-176 	The button has a guard ring to help prevent operating errors. Push-ON/push-OFF type. <i>See page 04CD/3/10</i>	AH25-SE5 Extended square head /Alternate action  SG-207 	The button surface projects 7mm from the guard. Push-ON/push-OFF type. Operator protection conforms to IP40. <i>See page 04CD/3/11</i>

Type	Description
AH25-S1, S2, S3, S4, S5, S6 Pushbutton with selector ring (2-position)  	Turning the ring to the left or right changes over the contact. <i>See page 04CD/3/13</i>

■ Mechanically interlocked pushbutton switches

Type	Description
AH25-□/□ Mechanically interlocked  	Two buttons are interlocked by a lever. When one is ON, the other is OFF. <i>See page 04CD/3/14</i>

■ Illuminated pushbutton switches

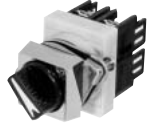

Type	Description	Type	Description
AH25-L Extended round head  	The surface of the illuminated button projects about 15mm from the locking nut. Momentary type. <i>See page 04CD/3/15</i>	AH25-L4 Extend with transparent full guard  	The illuminated button has a guard ring to help prevent operating errors. Momentary action. <i>See page 04CD/3/15</i>
AH25-L5 Extended round head /Alternate action  	The surface of the illuminated button projects about 15mm from the locking nut. <i>See page 04CD/3/15</i>	AH25-VL Push-lock, turn-reset  	Locked when the illuminated button is pushed. To reset, turn the button to the right. <i>See page 04CD/3/16</i>
AH25-L2 Extended with full guard (With openings)  	The illuminated button has a guard ring to help prevent operating errors. Momentary type. <i>See page 04CD/3/15</i>	AH25-SL Extended square head  	The illuminated button projects about 8mm from the guard. Momentary type. Operator protection conforms to IP40. <i>See page 04CD/3/16</i>
AH25-L6 Extended with full guard (With openings) /Alternate action  	The illuminated button has a guard ring to help prevent operating errors. Push-ON/push-OFF type. <i>See page 04CD/3/15</i>	AH25-SL5 Extended square head / Alternate action  	The illuminated button projects about 8mm from the guard. Push-ON/push-OFF type. Operator protection conforms to IP40. <i>See page 04CD/3/16</i>
AH25-L3 Extended with full guard  	The illuminated button has a guard ring to help prevent operating errors. Momentary action. <i>See page 04CD/3/15</i>	AH25-SL1 Flush square head  	The illuminated button has a built-in legend plate. Momentary type. Operator protection conforms to IP40. <i>See page 04CD/3/16</i>
AH25-L7 Extended with full guard /Alternate action  	The illuminated button has a guard ring to help prevent operating errors. Push-ON/push-OFF type. <i>See page 04CD/3/15</i>	AH25-SL6 Flush square head/ Alternate action  	The illuminated button has a built-in legend plate. Push-ON/push-OFF type. Operator protection conforms to IP40. <i>See page 04CD/3/16</i>

■ Contact reliability

The AH25 command switches can be used in low level circuit of 5V AC/DC, 5mA. The operating environment and the types of load, however, may affect the operating range.

Note: Replace the □ mark by the lamp luminous color code.

■ Lamp durability

Lamp	Durability (reference)	Judgement criterion
LED	Approx. 30000h	When brightness is less than 50% of initial value
Incandescent	Approx. 5000h (AC)	When the bulb burns out

Note: • The operating voltage for incandescent lamps is set at 80 to 90% of the lamp's rated voltage.
• The durability of LED lamp is a mean value in all colors.

Estimated durability for LED lamps

Notes: • Durability at Ta=25°C
• Durability is affected by temperature, humidity, and voltage fluctuation.

Incandescent lamp voltage characteristics

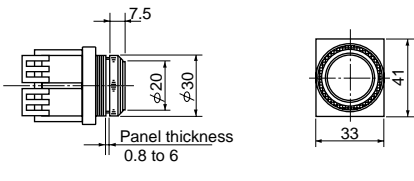

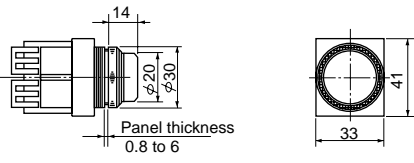

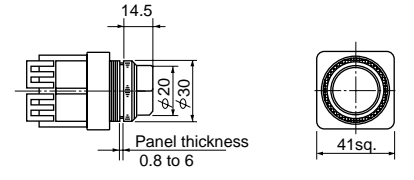

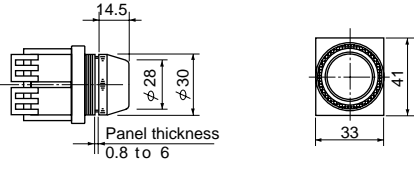

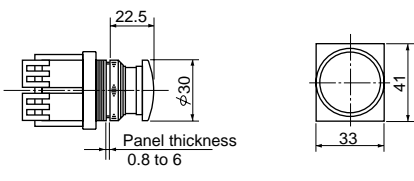

■ Combination of lens color and LED luminous color

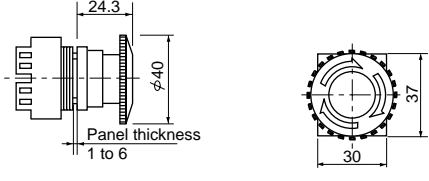

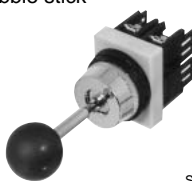

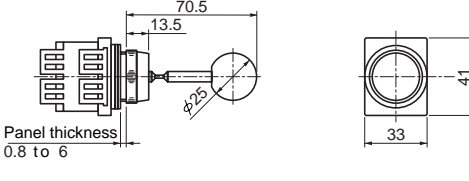

Lens color (lens or color plate)		LED lamp (high-brightness)		
Color	Code	Luminous color	Type	Type *1
Green	G	Green	APX510-■G	APX508-■G
Red	R	Red	APX510-■R	APX508-■R

F, F5, E, E5, G, G5, G1, G6, M, M5, U, S1~S6, SF, SF5, SE, SE5, L, L5, L3, L2, L4, SL, SL5, SL1, SL6, P, PW, SP, J, SJ, PC, PL

*1 G, G5 type: 42

*2 This dimension applies SF, SF5, SE, SE5, SL, SL5, SL1, SL6, SP, SJ types.

*3 L, SL type: 44 (not meet with the live section.)

• **Push-lock type**

V, VL

• **Pilot light**

ZM, ZK, ZS, ZN

Without transformer

With transformer

■ **Panel cutout hole**

Note: If key-washer or legend plate are not used, 4.5mm dia. location holes sown and the same pilot light type ZS, ZN need not cutout.

*4 ZS, ZN type: In case of horizontal mounting

Pushbuttons/Selectors/Pilot Lights

AH25

Notes on use

■ Replace buttons

(1) To replace AH25 type F, E and G buttons with a different color, insert a flat-blade screwdriver into the groove on the button. To install them, align the button projection and the recess on the inner button and press them together firmly.

(2) To replace the color tip of AH25 type G (with half guard), do not make the trip groove face the guard.

(3) For AH25-M, V, VL, remove the button and mount the switch to the panel.

a) Tighten the button completely. The button stroke is adjusted only when it is completely tightened. If tightening is insufficient, stroke increases and destroys the contact.

■ Replace the contact block

(1) AH25 contacts can be increased with snap-fitting contact block. To add a contact block, push the additional contact block straight in until it clicks. When adding more than two contact blocks, join the slots on both sides and make sure that the contact blocks facing each other are not open. After addition or replacement, operate the switches a few times to check that they work correctly.

(2) To remove a contact block, use a screwdriver to slightly open the mounting leg, and remove the contact block from the side of the opening leg. When two contact blocks are mounted release one a little, and then the other, and remove both at the same time. The same thing goes for transformers joined to contact blocks. Be careful not to force the mounting leg. Using a special tool (AHX321), the units can be removed more easily.

b) Determine the panel thickness and number of adjustment packings with the table.

Do not adjust the button stroke with a liner under the button.

■ Exchange of transformer

(1) A transformer can be easily snap-fitted to an AH25 pilot light. When a transformer is added to a pilot light without a transformer, attach a cover to the terminal of the pilot light to avoid wiring errors.

(2) The capacity of the transformer is set for the lamp. No other load can be applied.

■ Water-proof and dust-proof cap

Applicable type:

Water-proof cap AHX106, 155
Dust-proof cap AHX025, 026, 027
AHX046, 047, 048
AHX105, 112, 114

When attached to the panel in combination with a water-proof or dust-proof cap, the water-proof cap or dust-proof cap may sink downward and prevent the depressed button from returning to its original position. As shown in the following figure, cut an approximately 5-mm air outlet in the portion of the ring packing touching the panel surface. Also, reduce the number of packing rings by one below the standard number. The clamp ring tightening torque is 1.5 to 2.5 N•m.

■ Degree of protection

The water-proof cap or dust-proof cap seals the panel surface to provide IP65 protection.

■ Adjustment packing

Four 1.6mm packings (molded as one) are included. Based on the thickness of the mounting panel, adjust the number as shown in the table. To mount to a panels thinner than 1.6mm, one 1.6mm packing is needed (Purchased separately).

Mounting panel thickness and number of packings (reference)

Mounting panel thickness (mm)	Number of packings
0.8 to 2.0	5
2.0 to 3.2	4
3.2 to 4.5	3
4.5 to 6.0	2

Notes:

- When using a key washer or legend plate, decrement one from the numbers in the above table.
- When more than four packings are needed, these are bought separately.

■ **Terminal layout**

Notes: * The positive and negative terminals are used for 6V DC applications.

Other items are the same as for the AR22 and DR22 series, see page 04/53 to 04/57.

■ **Description**

- **Enclosed type**
Enclosed type steel boxes finished respectively with one to five holes. Rounded, smooth design. Selectable from the 22mm, 25mm, and 30mm dia. series command switches according to the application.
- **Dust protected type, protected against water jets**
Made of lightweight, strong aluminum die-casting. Rounded, smooth design. Series of models finished respectively with one to four holes. (Note: Only 22 dia. series models incorporate four holes.)

■ **Type number nomenclature**

AHX 9 0 1 A
① ② ③ ④

① **Product category**
AHX: Type

② **Size of mounting hole**
2: 22mm dia. series
1: 25mm dia. series
0: 30mm dia. series
9: without hole

③ **Number of mounting hole**

- **Enclosed type**
 - 1: 1 hole*1
 - 2: 2 holes
 - 3: 3 holes
 - 4: 4 holes
 - 5: 5 holes
- **Dust protected type, protected against water jets**
 - 1: 1 hole*2
 - 2: 2 holes
 - 3: 3 holes
 - 4: 4 hole*3
 - 9: 1 hole*1

Notes: *1 Dedicated box with one hole
*2 Same as the box for two holes in external dimension
*3 Only 22mm dia. series can be manufactured

④ **Degree of protection**

- A: Enclosed type
- W: Dust protected type, protected against water jets

■ Specifications

Description	Enclosed type	Dust protected type, protected against water jets
Degree of Protection	IP40(IEC 60529)	IP65(IEC 60529)
Material	Steel	Aluminum die cast
Ambient temperature (No condensation or no icing)	-25 to +50°C	
Humidity	45 to 85% RH(with in -5 to +40°C)	
Applicable type *1	22, 25, 30mm dia.Command switch series AK22, RC310-F Cam type selector switch 30mm dia. short-body type meter	See the description in the below: Mountable switches and degree of protection
Depth	73mm	84mm
Laed hole	Knockout hole (22mm dia. top side , 27mm dia. bottom side)	
Options	Mounting bracket: A mounting bracket is available, with which the command box can be mounted vertical or at an angle of 15 (see page 04CD/4/4)	
	Command boxes incorporating switches are available	

Note: *1 Check the effective depth of the box when selecting mountable switches.

■ Mountable switches and degree of protection (Dust protected type, protected against water jets)

The degree of protection of the command box is IP65, which, however, changes according to the device to which the command box is mounted. Check the depth of the command box when selecting the device. Consult your Fuji Electric FA representative when using the command box outdoors (e.g., plating factory yards, seashores, and places exposed to special cutting oil).

Conforms to IEC standard IP65 (Dust protected type, protected against water jets)

●25mm dia. 30mm dia. series pushbuttons.*

Note: *Except for conform to IEC standard IP40 (Enclosed type)

Pushbutton switches, illuminated pushbutton switches, selector switches, pilot lights, and joy stick selector switches.

●22mm dia. series pushbuttons.

Pushbutton switches, illuminated pushbutton switches, selector switches, pilot lights, and joy stick selector switches.

●Cam switch

AK22 series (22mm dia.), RC310F series (30mm dia.).

Conforms to IEC standard IP40 (Enclosed type)

●25mm dia. series pushbuttons.

Sqare head pushbutton switch, illuminated sqare head pushbutton switch, sqare head selector switches, sqare head pilot lights, sqare head pilot lights with legend plate.

●30mm dia. series pushbuttons.

Illuminated pushbutton switches(push-pull type), pilot lights with dome with dimmer control.

Note on use

■ **Precautions for panel (wall) mounting (Dust protected type, protected against water jets)**

● Do not insert M4 screws into the waterproof bushings that are press-fit into the four mounting holes of the casing and hit the screws with a hammer, or otherwise the screws will break through the waterproof bushings (see fig. 1).

● Insert the screws into the panel mounting holes and secure the screws with nuts (see fig. 2). The waterproof performance of the casing remains unchanged when the screws are inserted into the bushings.

Catalog Disclaimer

The information contained in this catalog does not constitute an express or implied warranty of quality, any warranty of merchantability or fitness for a particular purpose is hereby disclaimed.

Since the user's product information, specific use application, and conditions of use are all outside of Fuji Electric FA Components & Systems' control, **it shall be the responsibility of the user to determine the suitability of any of the products mentioned for the user's application.**

One Year Limited Warranty

The products identified in this catalog shall be sold pursuant to the terms and conditions identified in the "Conditions of Sale" issued by Fuji Electric FA with each order confirmation.

Except to the extent otherwise provided for in the Conditions of Sale issued by Fuji Electric FA, Fuji Electric FA warrants that the Fuji Electric FA products identified in this catalog shall be free from significant defects in materials and workmanship provided the product has not been: 1) repaired or altered by others than Fuji Electric FA; 2) subjected to negligence, accident, misuse, or damage by circumstances beyond Fuji Electric FA's control; 3) improperly operated, maintained or stored; or 4) used in other than normal use or service. This warranty shall apply only to defects appearing within one (1) year from the date of shipment by Fuji Electric FA, and in such case, only if such defects are reported to Fuji Electric FA within thirty (30) days of discovery by purchaser. Such notice should be submitted in writing to Fuji Electric FA at 5-7, Nihonbashi Odemma-cho, Chuo-ku, Tokyo, Japan. The sole and exclusive remedy with respect to the above warranty whether such claim is based on warranty, contract, negligence, strict liability or any other theory, is limited to the repair or replacement of such product or, at Fuji Electric FA's option reimbursement by Fuji Electric FA of the purchase price paid to Fuji Electric FA for the particular product. **Fuji Electric FA does not make any other representations or warranties, whether oral or in writing, expressed or implied, including but not limited to any warranty regarding merchantability or fitness for a particular purpose.** Except as provided in the Conditions of Sale, no agent or representative of Fuji Electric FA is authorized to modify the terms of this warranty in writing or orally.

In no event shall Fuji Electric FA be liable for special, indirect or consequential damages, including but not limited to, loss of use of the product, other equipment, plant and power system which is installed with the product, loss of profits or revenues, cost of capital, or claims against the purchaser or user of the product by its customers resulting from the use of information, recommendations and descriptions contained herein. The purchaser agrees to pass on to its customers and users, in writing at the time inquiries and orders are received by buyer, Fuji Electric FA's warranty as set forth above.

Caution "Safety precautions"

- Operate (keep) in the environment specified in the operating instructions and manual. High temperature, high humidity, condensation, dust, corrosive gases, oil, organic solvents, excessive vibration or shock might cause electric shock, fire, erratic operation or failure.
- Follow the regulations of industrial wastes when the product is to be discarded.
- The products covered in this catalog have not been designed or manufactured for use in equipment or systems which, in the event of failure, can lead to loss of human life.
- If you intend to use the products covered in this catalog for special applications, such as for nuclear energy control, aerospace, medical, or transportation, please consult your Fuji Electric FA agent.
- Be sure to provide protective measures when using the product covered in these catalogs in equipment which, in the event of failure, may lead to loss of human life or other grave results.
- Follow the directions of the operating instructions when mounting the product.

D&C CATALOG DIGEST INDEX

Individual
catalog No.

LOW VOLTAGE PRODUCTS Up to 600 Volts

01 Magnetic Contactors and Starters
Thermal Overload Relays, Solid-state Contactors

02 Manual Motor Starters and Contactors
Combination Starters

03 Industrial Relays, Industrial Control Relays
Annunciator Relay Unit, Time Delay Relays

04 Pushbuttons, Selector Switches, Pilot Lights
Rotary Switches, Cam Type Selector Switches
Panel Switches, Terminal Blocks, Testing Terminals

05 Limit Switches, Proximity Switches
Photoelectric Switches

06 Molded Case Circuit Breakers
Air Circuit Breakers

07 Earth Leakage Circuit Breakers
Earth Leakage Protective Relays

08 Circuit Protectors
Low Voltage Current-Limiting Fuses

09 Measuring Instruments, Arresters, Transducers
Power Factor Controllers
Power Monitoring Equipment (F-MPC)

10 AC Power Regulators
Noise Suppression Filters
Control Power Transformers

HIGH VOLTAGE PRODUCTS Up to 36kV

11 Disconnecting Switches, Power Fuses
Air Load Break Switches
Instrument Transformers — VT, CT

12 Vacuum Circuit Breakers, Vacuum Magnetic Contactors
Protective Relays
