

IP65 rated solar street light. It is designed with long life lithium battery for sustainable energy. Charging temperature in day time is between 0°C - 60°C. When temperature is below 0°C, its control system will automatically stop charging to protect the battery. Discharging temperature at night is between -20°C to 60°C. If ambient temperature is not within the above stated range, lifespan of batteries might be compromised.
